Threat, 2015-04-15 In *Nursing Civil Rights* Charissa J Threat investigates the parallel battles against occupational segregation by African American women and white men in the U S Army As Threat reveals both groups viewed their circumstances with the Army Nurse Corps as a civil rights matter Each conducted separate integration campaigns to end the discrimination they suffered Yet their stories defy the narrative that civil rights struggles inevitably arced toward social justice Threat tells how progressive elements in the campaigns did indeed break down barriers in both military and civilian nursing At the same time she follows conservative threads to portray how some of the women

who succeeded as agents of change became defenders of exclusionary practices when men sought military nursing careers. The ironic result was a struggle that simultaneously confronted and reaffirmed the social hierarchies that nurtured discrimination.

COMPASSION, CARE AND COURAGE A Nurse's Journey RGN. KHALID SAEED ALI ALQAHTANI, LPN. SAAD AYED AWDHAH, RGN. ABDULRAHEM SALMAN HAMDAN ALMALKI, Nursing is not just a profession its a calling and that calling is made of threads of compassion care and courage. Compassion Care and Courage A Nurse s Journey is a document of individual experience and a testament from the rest of us to those who roam hospital and home hallways professing our profession with confident hands tender hearts and unwavering nerves. From the prenatal beginning sparks of excitement in childhood to silent will ushering genius called for in the most critical moments the nursing career is paved in profound experience some bright and shining others painful but all fundamentally human. We encounter others at some of the most vulnerable points in their lives as nurses. We hear their fears their hopes and sometimes their last words. This privilege is sacred. Within these pages are tales woven from sweat and sacrifice chapters buoyed by clinical expertise and moments developed out of compassion and perseverance. In this episode we look at the history of the profession from the wards lit by the lantern of Florence Nightingale to the telehealth platforms of the 21st century. We salute nursing educators researchers frontline responders and the many who are characteristically practicing change agents in boardrooms and policy circles. The many chapters in here contribute to different aspects of nursing life be it the ethical dilemmas burnout leading through a crisis or in finding joy through patients and reflection. What I d really like to accomplish is not just documenting the journey of one nurse but a message that all nurses out there for what we are and why it goes beyond you or me. I invite the different readers nurses students patients and those who just have to be curious to walk this pathway with me. I hope you walk away with a greater respect for the quiet strength of nurses the emotional labor that they carry and the bravery of caring deeply in a world that often hurries. Let this book be a mirror and a map a mirror for reflection on where we have been and a map for where the heart of nursing needs to go.

Organisation and Management of Intensive Care D. Reis Miranda,D.W. Ryan,Wilmar Schaufeli,V. Fidler,2012-12-06 From  
the viewpoint of a health economist the intensive care unit ICU is a particularly fascinating phenomenon It is the epitome of  
high tech medicine and frequently portrayed as the place where life saving miracles are routinely wrought But the popular  
imagina tion is also caught up in the darker side when agonizing decisions have to be made to avoid futile and inhuman  
continuation of expen sive treatments My analytical interests led me to approach these issues by asking what the evidence  
tells us about which ICU activities are very bene ficial in relationship to their costs and which are not This quickly translates  
into a slightly different question namely which patients are most appropriately treated in an ICU and which not Unfor tunately  
it is very hard to answer these questions because it has pro ved very difficult to investigate these issues in the manner which  
is now regarded as the gold standard namely by conducting rando mized clinical trials or alternative courses of action I think  
this is a pity and I am not at all convinced that it would be unethical to do so in many cases because there is wide variation in  
practice and ge nuine doubt as to which practices are best the two conditions that need to be fulfilled before such a trial is  
justifiable
