Diet for a Large Planet Chris Otter, 2023-06-05 In this magisterial study Chris Otter traces Britain's transition to a diet rich in animal proteins and refined carbohydrates like wheat and sugar a diet that required more acreage than that of Britain itself and that if followed everywhere would soon deplete the planet's resources as the title announces this was truly a diet for a large planet From the late 1700s to the end of World War II Otter accounts for the structures practices and ideologies generated by Britain's nutrition transition He shows how Britain was the first nation to undergo the population explosion urbanization and industrialization we associate with modernity and how it managed the unprecedented problem of how to feed its growing population Its radical solution would be to outsource its food production leading away from a locally produced plant based diet to one reliant on global markets international trade networks and enormous agro food systems that would have planetary effects on famine war the world economy and the wider earth system Not only did this phase in Britain's history make the consumption of meat white bread sugar and butter a coveted diet linked to development luxury and power it also opened up a new phase in economic history one whose dramatic effects endure to this day whether in terms of health problems eating disorders or the seemingly endless world food crisis

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70

Animal Husbandry in Ancient Israel Aharon Sasson, 2016-04-08 Animals have been used to human advantage for thousands of years *Animal Husbandry in Ancient Israel* presents an analysis of caprines and cattle husbandry in the Southern Levantine Bronze and Iron Age The book employs key methodological

approaches comparative analysis taphonomy Geographic Information System spatial analysis and ethnographic studies to challenge prevalent views on the Southern Levantine ancient economy Animal Husbandry in Ancient Israel argues that the key concern of nomadic rural and urban populations was survival the common household maintained a self sufficient economy rather than profit specialization or trade The book will be of value to all those interested in the dynamic relationship between humans and animals in ancient Israel

Protein and Energy Kenneth John Carpenter,1994-05-27 The author reviews the long standing debate over the relative merits of a high protein versus a low protein diet At a time when the concern has resurfaced that over consumption of protein in affluent societies may damage health this book provides a fascinating historical perspective
