Inequality and Nutritional Transition in Economic History Francisco J. Medina-Albaladejo, José Miguel Martínez-Carrión, Salvador Calatayud, 2023-04-13. Food consumption and nutrition are historically among the most characteristic features of inequality in living standards driven by socioeconomic, gender, generational and geographical reasons. Nutrition directly impacts mortality, life expectancy, height and illness and thus becomes a good indicator of living standards and their evolution over time. However, one issue that remains unresolved is how to measure past diet inequalities with the available sources. This book evaluates nutritional inequalities in Spain from the nineteenth century to the present.

day It explores the socioeconomic gender generational and geographical variations in food consumption and nutrition in Spain during this period Deriving historical data on nutrition and diet has always been difficult due to issues with available sources This book adopts a multi dimensional approach and two complementary methodologies capable of presenting a more comprehensive picture the first analyses diets based on primary sources while the second examines the effect of nutritional inequalities on biological living standards with special emphasis on average height This combination allows for greater precision than previous studies on the impacts of food inequality This book will be of significant interest to scholars from different academic branches especially historians economic historians and historians of science economists and also doctors endocrinologists paediatricians anthropologists nutritionists and expert in cooperation and development *OECD-FAO Agricultural Outlook 2019-2028* OECD, Food and Agriculture Organization of the United Nations, 2019-07-08 The Agricultural Outlook 2019 2028 is a collaborative effort of the Organisation for Economic Co operation and Development OECD and the Food and Agriculture Organization FAO of the United Nations It brings together the commodity policy and country expertise of both organisations as well **OECD-FAO Agricultural Outlook 2019-2028** Food and Agriculture Organization of the United Nations, Organisation for Economic Co-operation and Development, 2019-07-08 The Agricultural Outlook 2019 2028 is a collaborative effort of the Organisation for Economic Co operation and Development OECD and the Food and Agriculture Organization FAO of the United Nations It brings together the commodity policy and country expertise of both organisations as well as input from collaborating member countries to provide an annual assessment of the prospects for the coming decade of national regional and global agricultural commodity markets This year s Special Feature will focus on agricultural development in Latin America [Health Benefits of Nuts and Dried Fruits](#) Cesaretti Alasalvar, Jordi Salas-Salvado, Emilio Ros, Joan Sabate, 2020-02-06 Nuts and dried fruits are part of our daily diet They are consumed whole or as ingredients of many food products such as muffins cereals chocolates energy bars breads and cookies among others Health Benefits of Nuts and Dried Fruits provides a comprehensive overview of the literature on the health benefits of nuts and dried fruits The book summarizes the current state of knowledge in key research areas and provides ideas for future scientific research and product development Nuts a term that comprises tree nuts and peanuts are highly nutritious containing health promoting macronutrients micronutrients vitamins and bioactive phytochemicals they are one of the edible foods with the highest content in antioxidants The consumption of nuts is recognized for its health promoting properties which ranges from a consistent cholesterol lowering effect in clinical trials to a robust association with reduced risk of cardiovascular disease and all cause mortality in prospective studies In spite of the high energy content of nuts there is no evidence that their frequent consumption promotes obesity and they may even help control it Dried fruits which serve as important healthful snacks worldwide are nutritionally equivalent to fresh fruits while providing all of their bioactive components in concentrated form While the evidence level concerning the health effects of dried fruits lags behind that on nuts it suggests that individuals who
