Nutrition defined by Merriam Webster is the process of eating the right kind of food so you can grow properly and be healthy. However, making the right food and nutrition choices and finding the best and most accurate nutrition information can be a challenge, especially when a disease or injury is present. There are a wide range of ways that nutrition can be healing, from a simple broth that provides fluids and electrolytes to therapeutic nutrition for diabetes, irritable bowel syndrome or osteoporosis. Registered Dietitians/Nutritionists (RDs) have expertise in disease management and translation of nutrition requirements to foods to consume. However, nutrition care often does not receive the attention in the outpatient setting that is needed to achieve nutrition goals. The purpose of this book is to provide pertinent and concise nutrition care information for Registered
