**Nyiragongo, the Forbidden Volcano** Haroun Tazieff, 1979 Good No Highlights No Markup all pages are intact Slight Shelfwear may have the corners slightly dented may have slight color changes slightly damaged spine **Volcano and Geothermal Tourism** Patricia Erfurt-Cooper, Malcolm Cooper, 2010-08-12 There are over 1300 active volcanoes worldwide and many more dormant or extinct Some are developed as tourist destinations others are not but have great potential Mount Fuji in Japan attracts over 100 million visitors per year and has immense cultural and spiritual significance while a number of volcanic areas in national parks for example Teide in Spain Yellowstone in the US Vesuvius in Italy and Tongariro in New Zealand attract between one to four million tourists each year In the last decade the designation of nearly 50 geoparks around the world has highlighted their potential for tourism development This book provides the first global review and assessment of the sustainable use of active and dormant volcanic and geothermal environments for geotourism The volcano based tourism sector is further augmented through a closely linked range of geothermal resources and attractions such as geysers and hot springs which are discussed in detail throughout individual chapters covering all key volcanic and geothermal regions around the world It is shown that volcano and geothermal tourism is a subsection of nature based geotourism and incorporates a variety of other tourism categories such as adventure tourism extreme tourism ecotourism green tourism educational tourism and hot spring tourism This comprehensive book covers the most important issues of this growing tourism sector whilst incorporating relevant global research making it an essential resource for all in the field Includes colour plates **Volcanic Hazards** R. J. Blong, 1984-12-12 Volcanic Hazards A Sourcebook on the Effects of Eruptions provides a comprehensive discussion of volcanic eruptions and their effects This volume provides background data on volcanic activity with attention directed specifically at those types of activity and those characteristics which are hazardous It establishes the direct effects of volcanic eruptions on humans in terms of death and injuries and social aspects such as perception of eruption hazards evacuation panic looting and religious beliefs It discusses the indirect consequences of volcanic eruptions for humans by illustrating the effects on buildings utilities communication networks and machinery agriculture and commercial activity This book should be of interest to planners engineers city administrators agriculturalists and emergency services personnel who must deal with the effects of volcanic hazards to volcanologists and geologists who did not know eruptions affected so many things to geographers environmentalists and natural hazard scientists who are interested in the interrelatedness of phenomena and to citizens who have experienced or might yet experience some of these effects *Volcanoes of the World* Lee Siebert, Tom Simkin, Paul Kimberly, 2011-02-09 This impressive scientific resource presents up to date information on ten thousand years of volcanic activity on Earth In the decade and a half since the previous edition was published new studies have refined assessments of the ages of many volcanoes and several thousand new eruptions have been documented This edition updates the book's key components a directory of volcanoes active during

the Holocene a chronology of eruptions over the past ten thousand years a gazetteer of volcano names synonyms and subsidiary features an extensive list of references and an introduction placing these data in context This edition also includes new photographs data on the most common rock types forming each volcano information on population densities near volcanoes and other features making it the most comprehensive source available on Earth's dynamic volcanism

**Running the Rift** Naomi Benaron, 2025-05-01 Running the Rift follows the progress of Jean Patrick Nkuba from the day he knows that running will be his life to the moment he must run to save his life A naturally gifted athlete he sprints over the thousand hills of Rwanda and dreams of becoming his country's first Olympic medal winner in track But Jean Patrick is a Tutsi in a world that has become increasingly restrictive and violent for his people As tensions mount between the Hutu and Tutsi he holds fast to his dream that running might deliver him and his people from the brutality around them Winner of the Bellwether Prize for Socially Engaged Fiction Naomi Benaron has written a stunning and gorgeous novel that through the eyes of one unforgettable boy explores a country's unraveling its tentative new beginning and the love that binds its people together

**Historical Dictionary of the Democratic Republic of the Congo** Emizet Francois Kisangani, 2016-11-18 This book looks at 55 years of independence over eight decades of colonial rule and earlier kingdoms and groups that shared the Congolese territory This fourth edition highlights new developments and the increasing importance of the DRC in the Great Lakes Region and Africa in particular as well as its important role in the international environment This fourth edition of Historical Dictionary of the Democratic Republic of the Congo contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 700 cross-referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about the Democratic Republic of the Congo

**Geomorphology** Mateo Gutierrez, 2012-12-07 This book provides a detailed coverage of the landforms of Planet Earth and the processes that shaped them The study of these morphologies some of which formed during past geological periods under environmental conditions very different from those of today makes it possible to reconstruct the evolution of relief and to infer environmental changes that have involved geological media the climate or human activity A major advance of Geomorphology in recent decades is the development of techniques that make it possible to quantify morphogenetic processes and rates at which forms change under different environmental conditions The development of Geochronology or absolute dating methods is helping us correct the limitations of relative dating that have prevailed in Geomorphology for many years The ability to assign numerical ages to both landforms and deposits opens up multiple possibilities for reconstructing the evolution of relief making correlations calculating rates and estimating recurrence periods A theme of major concern facing people today is the possible warming of the planet due to the release of greenhouse gases into the environment Investigations conducted by the scientific community show that this temperature increase is at least partially anthropogenic Given this more than probable cause and effect

relationship the most sensible and prudent path is to design and apply mitigation measures to alleviate this heating that can negatively affect both the natural environment and human society The information that Geomorphology can provide on the recent past Historical Geomorphology may be very useful in making predictions on the activity of these potentially dangerous processes in the future and on the possible effects of environmental changes The aim of this book is to provide a general vision of the multiple aspects of Geomorphology and to provide a methodological foundation to approach the study of various branches of geomorphology To this end the book contains a basic bibliography that can be used for future research In addition applied aspects of Geomorphology are covered at the end of each chapter to provide knowledge of the activities of geomorphologists in the professional world
