Ontology Of Consciousness:

An Ontology of Consciousness R. Ellis, 2013-03-09 The object of this study is to find a coherent theoretical approach to three problems which appear to interrelate in complex ways 1 What is the ontological status of consciousness 2 How can there be unconscious prereflective or self alienated consciousness And 3 Is there a self or ego formed by means of the interrelation of more elementary states of consciousness The motivation for combining such a diversity of difficult questions is that we often learn more by looking at interrelations of problems than we could by viewing them only in isolation The three questions posed here have emerged as especially problematic in the context of twentieth century philosophy 1 The question of the ontological status of consciousness The question What is consciousness is one of the most perplexing in philosophy so perplexing that many have been motivated to proceed as though consciousness did not exist If William James was speaking rhetorically when he said Consciousness does not exist 1 many behaviorists of the recent past were not 2 James meant only to imply that consciousness is not an independently existing soul substance alongside physical substances He did not mean that we do not really have consciousness and he did not provide final resolution for the problem of the causal interrelations between consciousness and the physical realm e.g. our bodies Many recent philosophers and psychologists however try to proceed as though these problems did not exist

Mind and its Place in the World

Alexander Batthyány, Avshalom Elitzur, 2013-05-02 What is mind What is its relationship to the physical world Is consciousness a causative agent in the physical world With much progress being made in the neurosciences many have thought that these questions could be answered by reducing them to questions about physical systems such as the brain But this approach has foundered on the core problem of consciousness Why is it that some brain processes are accompanied by conscious awareness This anthology points out new sources and unexamined paths of consciousness research By presenting a wide spectrum of non reductive theories the volume endeavours to overcome the dichotomy between dualism and monism that keeps plaguing the debate in favour of new and more differentiated positions

Ontology of Consciousness Helmut Wautischer, 2008-04-11 Scholars from many different disciplines examine consciousness through the lens of intellectual approaches and cultures ranging from cosmology research and cell biophysics laboratories to pre Columbian Mesoamerica and Tibetan Tantric Buddhism in a volume that extends consciousness studies beyond the limits of current neuroscience research The hard problem of today's consciousness studies is subjective experience understanding why some brain processing is accompanied by an experienced inner life Recent scientific advances offer insights for understanding the physiological and chemical phenomenology of consciousness But by leaving aside the internal experiential nature of consciousness in favor of mapping neural activity such science leaves many questions unanswered In Ontology of Consciousness scholars from a range of disciplines from neurophysiology to parapsychology from mathematics to anthropology and indigenous non Western modes of thought go beyond these limits of current neuroscience research to

explore insights offered by other intellectual approaches to consciousness These scholars focus their attention on such philosophical approaches to consciousness as Tibetan Tantric Buddhism North American Indian insights pre Columbian Mesoamerican civilization and the Byzantine Empire Some draw on artifacts and ethnographic data to make their point Others translate cultural concepts of consciousness into modern scientific language using models and mathematical mappings Many consider individual experiences of sentience and existence as seen in African communalism Hindi psychology Zen Buddhism Indian vibhuti phenomena existentialism philosophical realism and modern psychiatry Some reveal current views and conundrums in neurobiology to comprehend sentient intellection Contributors Karim Akerma Matthijs Cornelissen Antoine Courban Mario Crocco Christian de Quincey Thomas B Fowler Erlendur Haraldsson David J Hufford Pavel B Ivanov Heinz Kimmerle Stanley Krippner Armand J Labb James Maffie Hubert Markl Graham Parkes Michael Polemis E Richard Sorenson Mircea Steriade Thomas Szasz Mariela Szirko Robert A F Thurman Edith L B Turner Julia Watkin Helmut Wautischer

Consciousness and the Ontology of Properties Mihretu P. Guta, 2018-07-20 This book aims to show the centrality of a proper ontology of properties in thinking about consciousness Philosophers have long grappled with what is now known as the hard problem of consciousness i e how can subjective or qualitative features of our experience such as how a strawberry tastes arise from brain states More recently philosophers have incorporated what seems like promising empirical research from neuroscience and cognitive psychology in an attempt to bridge the gap between measurable mental states on the one hand and phenomenal qualities on the other In *Consciousness and the Ontology of Properties* many of the leading philosophers working on this issue as well as a few emerging scholars have written 14 new essays on this problem The essays address topics as diverse as substance dualism mental causation the metaphysics of artificial intelligence the logic of conceivability constitution extended minds the emergence of consciousness and neuroscience and the unity and neural correlates of consciousness but are nonetheless unified in a collective objective the need for a proper ontology of properties to understand the hard problem of consciousness both on non empirical and empirical grounds

Beyond Conceptual Dualism Giuseppe Vicari, 2008 This book is a systematic analysis of John R Searle s philosophy of mind Searle s view of mind as a set of subjective and biologically embodied processes can account for our being part of nature qua mindful beings This model finds support in neuroscience and offers reliable solutions to the problems of consciousness mental causation and the self

Immanence and Illusion in Sartre's Ontology of Consciousness Caleb Heldt, 2020-07-31 This book is a critical re evaluation of Jean Paul Sartre s phenomenological ontology in which a theory of egological complicity and self deception informing his later better known theory of bad faith is developed This novel reinterpretation offers a systematic challenge to orthodox apprehensions of Sartre s conceptualization of transcendental consciousness and the role that the ego plays within his account of pre reflective consciousness Heldt persuasively demonstrates how an adequate comprehension of Sartre s theories of negation and reflection can reveal the world as it appears to human consciousness as one in which our

reality is capable of becoming littered with illusions As the foundation upon which the rest of Sartre s philosophical project is built it is essential that the phenomenological ontology of Sartre s early writings be interpreted with clarity This book provides such a reinterpretation In doing so a philosophical inquiry emerges which is genuinely contemporary in its aim and scope and which seeks to demonstrate the significance of Sartre s thought not only as significant to the history of philosophy but to ongoing debates in continental philosophy and philosophy of mind

Ontology after Philosophical Psychology Michela Bella,2019-08-21 Ontology after Philosophical Psychology addresses the question of William James s continuity of consciousness with a view to its possible actualizations In particular Michela Bella critically delineates James s discourse In the wake of Darwin s theory of evolution at the end of the nineteenth century James s reflections emerged in the field of physiological psychology where he developed for the case for a renewed epistemology and a new metaphysical framework to help us understand the most interesting theories and scientific discoveries about the human mind Bella s analysis of the theme of continuity makes it possible to appreciate both historically and theoretically the importance of James s gradual transition from making observations of experimental psychology on the continuity of thought to developing an epistemological and ontological argument that continuity is a characteristic of experience and reality This analysis makes it possible both to clarify James s position in relation to his historical context and to highlight the most original results of his work

The Mind's Construction Matthew Soteriou,2013-08-29 Matthew Soteriou provides an original philosophical account of sensory and cognitive aspects of consciousness He explores distinctions of temporal character in our mental lives especially in relation to the exercise of agency and illuminates the more general issue of the place and role of mental action in the metaphysics of mind

Lasker,Dennis Joseph Murphy,International Institute for Advanced Studies in Systems Research and Cybernetics,1994-01-01 **Consciousness and the Ontology of Properties** Mihretu P. Guta,2019 Transontology , *Metaphysics in the Philosophy of Consciousness* Henry Longueville Mansel,2022-08-04 Reprint of the original first published in 1860 **Metaphysics** Henry Longueville Mansel,1860 **The Blackwell Companion to Consciousness** Susan Schneider,Max Velmans,2017-05-08 Updated and revised the highly anticipated second edition of The Blackwell Companion to Consciousness offers a collection of readings that together represent the most thorough and comprehensive survey of the nature of consciousness available today Features updates to scientific chapters reflecting the latest research in the field Includes 18 new theoretical empirical and methodological chapters covering integrated information theory renewed interest in panpsychism and more Covers a wide array of topics that include the origins and extent of consciousness various consciousness experiences such as meditation and drug induced states and the neuroscience of consciousness Presents 54 peer reviewed chapters written by leading experts in the study of consciousness from across a variety of academic disciplines **A Phenomenological Ontology of Freedom** Dr. Ethar Al-Saraf, The free will debate has been an issue of serious and significant tension in the history of Western philosophy For Martin Heidegger and Jean Paul Sartre debate has been rendered intractable by a fundamental misunderstanding of the terms involved This is exacerbated they argue by a failure to identify and adopt an appropriate methodological approach to the problem In this respect and for both philosophers this error in the free will debate is symptomatic of a broader misunderstanding of philosophical enquiry as such and the method it necessitates For Heidegger the entire history of Analytic Western ontology has been fatally misconceived as a result of an effort to define the being of entities in static terms The insistence on framing questions in respect of whether what a being is thus obstructs any meaningful enquiry by conceding existence at the outset of the investigation He demands nothing less than the destruction of that framework as a necessary step towards a radical account of freedom as a necessary feature of human experience Sartre s project is founded on Heidegger s argument though he is critical of what he considers the ethical ambiguities inherent to

Heidegger's account of Dasein. Instead, Sartre pushes the premises of Heidegger's project into a definitive claim about the nature of consciousness. Therein, he argues that as the only being for whom meaning is possible, consciousness is distanced from beings by nothingness, which ensures its ontological freedom. We propose that a thorough investigation of their projects will reveal an account of ontological freedom that does not suffer from the shortcomings of Sartrean existentialism whilst avoiding the methodological missteps of the traditional discourse. Moreover, we will suggest that overcoming Heidegger's ambiguities can be achieved by advancing his concerns into an interrogation of the ground of Dasein and its ontological priority. Thus, we can satisfy Sartre's criticism while reinforcing the commitment to a radically different approach to philosophical enquiry. Our investigation will argue that although Sartre has misconstrued Heidegger's work, making comprehension of his freedom all the more complicated, an argument persists which sheds new light on a seemingly stubborn philosophical problem. In so doing, a challenge will be presented to some of the fundamental premises of modern

philosophical discourse promising to reorient the approach to enquiry as such. **Dark Pool of Light, Volume One**
Richard Grossinger, 2012-08-21. In books like *Embryogenesis and Embryos*, *Galaxies and Sentient Beings*, author Richard Grossinger brought together the subjects of biological embryology and the esoteric process of human consciousness becoming embodied. The embryo is the universe writing itself on its own body. In *Dark Pool of Light*, his latest creation, Grossinger weaves neuroscience-based behaviorism and the phenomenology of being and reality together with psychological and psychospiritual views of that single thing which is most difficult to understand or vindicate: our own existence. In 2008, Grossinger began studying with noted psychic teacher John Friedlander, who helped him refine his vision of cerebral and somatic awareness to still subtler levels. *Dark Pool of Light* began unnamed in the journals of my psychic work with John. Friedlander says Grossinger not so much a record of actual practices as insights from them and extensions out of them. An expansive inquiry into the nature of consciousness, the series examines the tension between the scientific and philosophical and psychic views of the same phenomena and includes field notes and experiential exercises that invite the reader to make their own explorations. *Dark Pool of Light* is divided into three volumes which the author calls movements; the allusion to music is apt for the book unfolds in a truly symphonic manner. In Volume 1, Grossinger begins with the scientific and philosophical analytical views of reality, exploring the science, parascience, philosophy, and psychology of consciousness. Covering topics as diverse as current discoveries in neuroscience and the philosophy of the ancient Greeks, the book gives a broad overview of the bodies of knowledge concerning the nature of reality and consciousness. **Samkhya-Yoga**

Philosophy of Consciousness Ranjan Kumar Panda, 2025-06-14. This book exclusively deals with the study of consciousness in Samkhya Yoga Philosophy. Samkhya Yoga is two allied philosophical systems in which consciousness is the focal point of discussion. The book investigates consciousness from metaphysical, epistemological, and ethical or normative perspectives. Concepts such as Duhkha (suffering), Purusa (consciousness), Chitta (self), the mental, chittavrti (mental modification), Prakrti (and

Trigunas nature and its attributes are critically discussed to reconstruct the metaphysics of consciousness All the chapters have contemporary relevance as they delve into the nature of causation and provide an all inclusive viewpoint of consciousness by emphasizing its normative perspective The contributions in the book are from eminent scholars working in the field of consciousness and other related topics such as cognition mind causality knowledge and liberation The book provides a comprehensive viewpoint of consciousness by emphasizing its normative perspective concerning the notion of engaged selfhood for jivanmukta It is an invaluable resource for contemporary readers in the field of philosophy of mind across Indian and Western philosophy traditions
