Oogenesis The Storage of Developmental Information focuses on the processes reactions and transformations involved in oogenesis The book first offers information on embryonic development as a communication problem formation of the egg cells and the egg nucleus during oogenesis Topics include decoding of developmental information egg membranes oogenesis phase of nuclear activity cytochemistry of the nucleus and the egg cell The manuscript also ponders on the cytoplasm and its inclusions and the relationships between the egg cell and the auxiliary cells The text elaborates on the metabolism of the oocyte cortex and polarity and symmetry The book also examines the storage of developmental information and information theory and biology Genotypical information physical foundation of developmental biology and information and finality are discussed The manuscript is a dependable reference for readers interested in oogenesis Control Mechanisms in Developmental Processes Michael Locke,2012-12-02 Control Mechanisms in Developmental Processes covers the proceedings of the 1967 26th Symposium of The Society for Developmental Biology held in La Jolla California This book is divided into three parts encompassing 10 chapters that summarize the role of cytoplasmic units and the nucleus in developmental processes and the regulatory mechanisms The opening part of the book describes the chemical changes during the development of plastids in leaves of higher plants The book goes on discussing the nuclear and cytoplasmic controls in Neurospora morphology This compilation also examines the aspects of development growth and control in the basal bodies and flagella of Chlamydomonas reinhardtii The second part describes genetic systems in plants that serve to initiate or program the sequence in plant development and the life cycle of hybrids between somatic cells of different species A chapter discusses the genetic basis of higher plant morphogenesis by analysis of the differences between genotypes that differ from each other with respect to a single gene having a pronounced and highly specific effect upon form A discussion on the activation of protein synthesis upon fertilization and early development of animal eggs to the biochemical basis of the determination process is also included The concluding part deals with the differentiation of erythroid cells the induction of hemoglobin synthesis the regulation of heme and globin synthesis and the role of heme in the synthesis and assembly of hemoglobin This part also describes the differentiation of cells to the point where they can perform the various types of immunological reactions This book is an invaluable source for developmental biologists and researchers *Oogenesis: the Storage of Developmental Information* Christiaan Pieter RAVEN,1961 Schering Symposium on Intrinsic and Extrinsic Factors in Early Mammalian Development, Venice, April 20 to 23, 1970 Gerhard Raspé,2017-02-22 Advances in the Biosciences 6 Schering Symposium on Intrinsic and Extrinsic Factors in Early Mammalian Development Venice April 20 to 23 1970 is a collection of papers presented at the Schering Symposium on Intrinsic and Extrinsic Factors in Early Mammalian

Development held in Venice Italy on April 20 23 1970 Contributors explore intrinsic and extrinsic mechanisms underlying early development in mammals and cover topics ranging from transmission of maternal proteins into oocytes to normal and abnormal fertilization in mammals experimental early parthenogenesis in mammals and nutrient requirements for the culture of preimplantation embryos in vitro This book is comprised of 33 chapters and begins with an overview of the oocyte and the egg touching on subjects such as electron microscopy of the primary and secondary oocyte experimental early parthenogenesis in mammals and laparoscopic recovery of pre ovulatory human oocytes after priming of the ovaries with gonadotrophins The next section is devoted to intrinsic and extrinsic influence on the metabolism of preimplantation embryos and includes chapters dealing with the composition of oviductal and uterine fluids the role of uterine proteins in embryonic development sex chromosome markers as indicators in embryonic development and manipulations of the blastocyst The remaining chapters examine placental and fetal physiology immunology and teratology and differentiation of tissues This monograph will be of interest to biologists and physiologists

The Invertebrates R. S. K. Barnes, Peter P. Calow, P. J. W. Olive, D. W. Golding, J. I. Spicer, 2009-04-13 The majority of undergraduate texts in invertebrate zoology of which there are many fall into one of two categories They either offer a systematic treatment of groups of animals phylum by phylum or adopt a functional approach to the various anatomical and physiological systems of the better known species The Invertebrates is the first and only textbook to integrate both approaches and thus meet the modern teaching needs of the subject This is the only invertebrate textbook to integrate systematics and functional approaches The molecular systematics sections have been completely updated for the new edition Strong evolutionary theme which reflects the importance of molecular techniques throughout Distills the essential characteristics of each invertebrate group and lists diagnostic features to allow comparisons between phyla New phyla have been added for the new edition Stresses comparisons in physiology reproduction and development Improved layout and illustration quality Second edition has sold 14000 copies Nature of the first edition Students will like this book It deserves to succeed

Gene Activity in Early Development Eric H. Davidson,2014-06-28 Gene Activity in Early Development reviews the state of knowledge regarding genomic function in the programming and operation of what Bonnet in 1762 described as the miracle of epigenesis The book is divided into four sections Section I is concerned with gene activity in early embryogenesis with the time of onset and the nature of embryo genome control and with recent attempts to analyze the shifting patterns of gene expression as development proceeds Section II reviews various classic and recent studies relevant to the phenomenon of cytoplasmic localization of morphogenetic potential and discusses the significance from a contemporary vantage point of this often neglected area of developmental biology Section III deals with genomic function in oogenesis beginning with a general survey of what could be described loosely as the natural history of the oocyte nucleus and proceeding to current attempts to understand the character and the ultimate function of the oocyte gene products Section IV discusses various aspects of the general problem of gene regulation in animal cells

Insect Ultrastructure H. Akai,R.C. King,2013-11-09 Fourteen years have passed since the publication of David Spencer Smith s Insect Cells Their Structure and Function Here the results of a decade of electronmicroscopic studies on insect cells were summarized in an organized and integrated fashion for the first time and the ultrastructural characteristics of different specialized cells and tissues were abundantly illustrated in the 117 plates this monograph contained In the intervening period great progress has been made in the field of Insect Ultrastructure Organelles not even mentioned in Smith s book such as synaptonemal complexes clathrin baskets fusomes and reticular junctions have been identified and functions proposed for them There have also been many technical advances that have profoundly influenced the direction of subsequent research A spectacular example would be the development by Miller and Beatty of the chromosomal spreading technique which allowed for the first time ultrastructural studies on segments of chromosomes containing genes in various stages of replication and transcription Then there is the

freeze fracture procedure first described by Moor and his colleagues This technique permitted an analysis of intercellular junctions that was impossible with the conventional sectioning methods The results greatly clarified our understanding of the channels for ion movement and the permeability barriers between cells and also the membrane changes that occur during the embryonic differentiation and metamorphosis of various types of insect cells *Selected Basic Science Books in the Reference Collection of the National Library of Medicine* National Library of Medicine (U.S.),1964 Vertebrate Reproduction Volker Blüm,2012-12-06 Oral birth in the Australian gastric brooding frog *Rheobatrachus sUus* 2 Preface I have deliberately chosen the title picture to the preface which shows the oral birth of a young gastric brooding frog *Rheobatrachus situs* to draw the reader's attention to the preface since I wish to explain why the book was written and illustrated in the way it now appears The book has grown out of the material of a lecture course taking 3 to 4 hours per week each semester that I have given for several years at the Ruhr University Bochum as the theoretical basis for an intensive 4 week practical course on vertebrate reproduction for students of biology For various reasons I am a hardened opponent of giving lecture notes to the students On the other hand I found that my students made great efforts to work through and supplement their own lecture notes by studying the literature However there are no suitable textbooks on vertebrate reproduction written in German and the standard work in this field is now several decades old and deals mainly with mammals The students were therefore often frustrated in their efforts given the limited time they had available I have therefore decided to present here the most important structural and functional aspects of vertebrate reproduction and include other material to extend the framework of my original lectures **Cellular and Molecular Biology of Plant Seed Development** Brian A. Larkins,Indra K. Vasil,2013-03-09 The beginnings of human civilization can be traced back to the time nearly 12 000 years ago when the early humans gradually changed from a life of hunting and gathering food to producing food This beginning of primitive agriculture ensured a dependable supply of food and fostered the living together of people in groups and the development of society During this time plant seeds were recognized as a valuable source of food and nutrition and began to be used for growing plants for food Ever since plant seeds have played an important role in the development of the human civilization Even today seeds of a few crop species such as the cereals and legumes are the primary source of most human food and the predominant commodity in international agriculture Owing to their great importance as food for humans and in international trade seeds have been a favorite object of study by developmental biologists and physiologists nutritionists and chemists A wealth of useful information is available on the biology of seeds **Sea Urchin Development: Cellular and Molecular Aspects** Louis W. Stearns,1974 Good No Highlights No Markup all pages are intact Slight Shelfwear may have the corners slightly dented may have slight color changes slightly damaged spine Developmental Biology and Pathology A. Gropp,Kurt Benirschke,2012-12-06 The early development of the mammalian embryo belongs to a period which for the student provides the particularly deep fascination

connected with the processes of germination of the first tender buds of life. Moreover, developmental biology encompasses a very large part of biology if broadly defined; almost all of it. The same is true for the field of pathology if the manifold possibilities of disorders of the orderly arranged pathways of developmental processes are considered. Normal development in its earliest steps and it would be difficult to see it otherwise means the functioning of very intricate systems of complex interdependent cycles controlled by structural, genetic, physiological and biochemical determinants. However, disturbances interfering with them in their very different ways can lead to fetal death, disorders of growth and differentiation, malformation and disease, sometimes as late as in the next generation or later. This is indeed the concern of the pathologist to whom and to whose interest in developmental pathology this book is dedicated. The outlines of the present volume were conceived at a symposium on Control of early embryogenesis and factors responsible for failure of embryonic development held May 14, 1974 in Travemünde and sponsored by the Deutsche Forschungsgemeinschaft. Almost fifty active participants attended this conference. At the time and in keeping with the purpose of the conference, publication of the proceedings was not envisaged.

Biology of Fertilization V3 Charles

Metz, 2012-12-02. The Fertilization Response of the Egg is the third and final volume of the Biology of Fertilization which provides a detailed discussion of the responses of the egg to the fertilizing sperm collectively called as the activation of the egg. It is an anthology of physiological articles written by biology and physiology professionals. The book is divided into 12 chapters, half of which focused on the sea urchin egg fertilization as it is the most studied form. The first two chapters cover the discussions on the first visible egg responses to fertilization and the formation of the fertilization membrane. The following chapter describes the relationship of sperm entry into the amphibian egg and the establishment of the symmetry of the embryo. Other chapters focus on the electrical and ionic changes of the egg plasma membrane and cytoplasm. The remaining parts of the book describe the synthetic activities in the egg that are initiated during fertilization. These include description of DNA and maternal RNA syntheses, nuclear-cytoplasm interactions, protein synthesis during oogenesis and early embryogenesis, and the expression of maternal messenger RNA. The book is an excellent reference for undergraduate and graduate biology students specifically in physiology, embryogenesis and developmental biology. It can also be an invaluable source of information for lecturers and professionals in biology.
