Strategy and Architecture of Health Care Information Systems Michael K. Bourke, 2013-03-09 Information technology constantly changes and quickly becomes obsolete The methodology of planning and implementing a health care information system however is more constant Through practical step by step guidelines the author demonstrates how to establish the strategy and architecture against which vendor and system decisions must be made Both management and technical perspectives are discussed Thus regardless of the technology used the health care administrator and systems manager learn to implement information systems successfully and to link those systems with business strategy to achieve higher quality and more cost effective patient care

Shop Floor Control Systems A. Bauer, J. Browne, R. Bowden, J. Duggan, 2012-12-06 In recent years there has been a tremendous upsurge of interest in manufacturing systems design and analysis Large industrial companies have realized that their manufacturing facilities can be a source of tremendous opportunity if managed well or a huge corporate liability if managed poorly In particular industrial managers have realized the potential of well designed and installed production planning and control systems Manufacturing in an environment of short product life cycles and increasing product diversity looks to techniques such as manufacturing resource planning Just In Time JIT and total quality control among others to meet the challenge Customers are demanding high quality products and very fast turn around on orders Manufacturing personnel are aware of the lead time from receipt of order to delivery of completed orders at the customer's premises It is clear that this production lead time is for the majority of manufacturing firms greatly in excess of the actual processing or manufacturing time There are many reasons for this among them poor coordination between the sales and manufacturing function Some are within the control of the manufacturing function Others are not
