## **Open Moral Communities:**

Open Moral Communities Seymour J. Mandelbaum, 2000 Seymour Mandelbaum's extended reflection on communities and the myths that sustain them is a plea for a communitarian sensibility. Communities are critically important in maintaining and adapting public moral orders. To do so they must recruit, socialize and discipline members, distinguish between members and strangers, collect resources and cultivate a domain of competence. The communitarian sensibility is a disposition to assess the impact of innovative opportunities and compelling moral claims on the design, repair and dissolution of communities and communal fields with a healthy skepticism about unlikely strategies. The book is divided into three parts. The first part sets out the role of communities in the creation of moral orders and discusses the implications of three prevalent myths about community. The second part discusses six terms: theory, story, time, city, tool and plan that figure prominently in both professional and lay constructions of public orders. The third part presents two cases in which ambiguous moral claims for redemption and justice challenge the pluralism of the open myth. One concerns exclusionary zoning in New Jersey; the other the 1985 attack on the MOVE compound in West Philadelphia. Mandelbaum's blending of moral philosophy and concrete examples concludes with an account of citizenship in liberal republics.

*Moral Communities* Mark D. Steinberg, 2024-07-26 This valuable study offers a rare perspective on the social and political crisis in late Imperial Russia. Mark D. Steinberg focuses on employers, supervisors and workers in the printing industry as it evolved from a state-dependent handicraft to a capitalist industry. He explores class relations and the values, norms and perceptions with which they were made meaningful. Using archival and printed sources, Steinberg examines

economic changes workplace relations professional organizations unions strikes and political activism as well as shop customs trade festivals and everyday life In rich detail he describes efforts to build a community of masters and men united by shared interests and moral norms The collapse of this ideal in the face of growing class conflict is also explored giving a full view of an important moment in Russian history This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992      **From Pleasure**

**Machines to Moral Communities** Geoffrey M. Hodgson, 2013 Are humans at their core seekers of their own pleasure or cooperative members of society Paradoxically they are both Pleasure seeking can take place only within the context of what works within a defined community and central to any community are the evolved codes and principles guiding appropriate behavior or morality The complex interaction of morality and self interest is at the heart of Geoffrey M Hodgson s approach to evolutionary economics which is designed to bring about a better understanding of human behavior In *From Pleasure Machines to Moral Communities* Hodgson casts a critical eye on neoclassical individualism its foundations and flaws and turns to recent insights from research on the evolutionary bases of human behavior He focuses his attention on the evolution of morality its meaning why it came about and how it influences human attitudes and behavior This more nuanced understanding sets the stage for a fascinating investigation of its implications on a range of pressing issues drawn from diverse environments including the business world and crucial policy realms like health care and ecology This book provides a valuable complement to Hodgson s earlier work with Thorbjørn Knudsen on evolutionary economics in *Darwin s Conjecture* extending the evolutionary outlook to include moral and policy related issues      Explorations in Planning Theory Luigi

Mazza, 2017-09-29 What is this thing called planning What is its domain What do planners do How do they talk What are the limits and possibilities for planning imposed by power politics knowledge technology interpretation ethics and institutional design In this comprehensive volume the foremost voices in planning explore the foundational ideas and issues of the profession *Explorations in Planning Theory* is an extended inquiry into the practice of the profession As such it is a landmark text that defines the field for today s planners and the next generation As Seymour J Mandelbaum notes in the introduction the shared framework of these essays captures a pervasive interest in the behavior values character and experience of professional planners at work All of the chapters in this volume are written to address arguments that are important in the community of planning theoreticians and are crafted in the language of that community While many of the contributors included here differ in their styles the editors note that students experienced practitioners and scholars of city and regional planning will find this work illuminating and helpful in their research      *Dialogical Planning in a Fragmented Society*

Thomas L. Harper, Stanley Stein, 2018-02-06 The culmination of a critical study of neo pragmatism philosophy and its

application to planning Dialogical Planning in a Fragmented Society begins with philosopher Stanley M Stein's examination of neo pragmatism and his thoughts on how it can be useful in the field of environmental design specifically how it can be applied to planning procedures and problems Neo pragmatism is an approach that has been in the past best expressed or implied in the writing of Hilary Putnam Richard Rorty and in particular Donald Davidson John Rawls and Ludwig Wittgenstein Thomas L Harper furthers this tradition by providing the context for this theoretical application from his academic background in economics and management as well as his practical experience with political decision making processes community planning and economic development The result is a fresh synthesis of ideas a new approach to thinking about planning theory and its implications for and relationship with practice Philosopher Michael Walzer has asserted that philosophy reflects and articulates the political culture of its time and politics presents and enacts the arguments of philosophy Similarly the authors view planning theory as planning reflected upon in tranquility away from the tumult of battle and planning practice as planning theory acted out in the confusion of the trenches Each changes the other in a dynamic way and the authors demonstrate the intimate and inextricable link between them **The Network Society** Louis Albrechts, Seymour Mandelbaum, 2007-05-07 Editors are well known experts in the field as are many of the contributors Spatial and technological networks are of high interest and this book examines their relationship and deals with the challenges that they raise for planners and policy makers A strong focus on the political and sociological aspect of network based societies and cities *The End of God-Talk* Anthony B. Pinn, 2012-01-19 In this groundbreaking study Anthony B Pinn challenges the long held assumption that African American theology is solely theist arguing that this assumption has excluded a rapidly growing segment of the African American population non theists Rejecting the assumption of theism as the African American orientation Pinn poses a crucial question What is a non theistic theology *Public Norms and Aspirations* Willem Salet, 2018-03-05 The aspirations of individuals organizations and states and their perceptions of problems and possible solutions circulate fast in this instantaneous society Yet the deliberation of the underlying public norms seems to escape the attention of the public Institutions enable people to have reliable expectations of one another even when they are unsure of each other's aspirations and purposes Public norms enable people to act under conditions of increasing uncertainty To fulfill this role in society institutions need enhancement maintenance and innovation Public Norms and Aspirations aims to improve the methodology of planning research and practice by exploring the co evolution of institutional innovation and the philosophy of pragmatism in processes of action As most attention in planning research and planning practices goes to the pragmatic approaches of aspirations and problem solving the field is awaiting an upgrade of institutional perspectives This book aims to explore the interaction of institutional and pragmatic thought and to suggest how these two approaches might be integrated and applied in successful planning research Searching this combination at the interface of sociology planning and law Salet opens a unique niche in the existing planning literature **Pragmatic Spatial**

**Planning** Charles Hoch, 2019-07-10 Instead of seeking theory to justify practical professional judgments this book describes how professionals can and should use theory to guide these judgments Professional spatial planning in the US and globally continues to suffer from a weak conceptual grasp of its own practice Practitioners routinely recognize the value and wisdom of practical judgment finely attuned to context nuance and complexity but later offer banal testimony and glib stories of just so best practice discrediting the ambiguity of their own experience The chapters in this book provide a vocabulary tailored to the conventions of practical judgment challenging students and practitioners to treat professional expertise as work in progress rather than best practice Instead of seeking theory to justify practical professional judgments Hoch describes how professionals can and should use theory to guide these judgments The pragmatist plan helps cope with complexity rather than control it making it invaluable in the anyone's pursuit of a planning career This book will appeal to a wide cross section of students and scholars especially those working in urban planning public policy and government Rethinking Community Research David Studdert, Valerie Walkerdine, 2016-08-24 This book sheds new light on the complex inter relations that make up class power local history and space It turns community thinking on its head by understanding community not as an object but as a relational process with sociality at its core Based on fieldwork from one market town and the work of Hannah Arendt it demonstrates how a new approach to social practices can illuminate our understanding of commonality and communal being Whilst community has become both a much derided and much touted term this thought provoking work shows that it is at the heart of social process It will appeal to researchers of sociology social policy politics public health and geography as well as those involved in public policy design and implementation **Guidance for Healthcare Ethics Committees** D. Micah Hester, Toby L. Schonfeld, 2022-03-10 Every accredited American hospital is required to have a process for handling ethical concerns within the institution For the most part hospitals satisfy this requirement by constituting an institutional healthcare ethics committee HEC However many of these individuals while well intentioned have neither the training in ethics nor the tools at their disposal to address properly the ethical considerations brought to them Yet healthcare providers and patients turn to these committee members for ethical insight This book focuses on HEC member education by providing definitive and comprehensive learning content for members of HECs This second edition is fully updated throughout and adds new chapters that reflect the evolving nature of health care Chapters are written by internationally recognized experts in bioethics and are directed specifically at members of HECs Each chapter includes learning objectives case presentations and discussion questions to facilitate committee conversation Nietzsche as Political Philosopher Manuel Knoll, Barry Stocker, 2014-08-27 This collection establishes Nietzsche's importance as a political philosopher It includes a substantial introduction and eighteen chapters by some of the most renowned Nietzsche scholars The book examines Nietzsche's connections with political thought since Plato major influences on him his methodology and his influence on subsequent thought The book includes extensive coverage of the debate between radical aristocratic readings of Nietzsche and more

liberal or democratic readings Close readings of Nietzsche's texts are combined with a contextualising approach to build up a complete picture of his place in political philosophy Topics include the relevance of Bonapartism and classical liberalism Nietzsche on Christianity the cultural history of Germany the *bermensch* ethics and politics in Nietzsche and the controversial question of his political preferences and affinities Nietzsche's political thought is compared with that of Humboldt Weber and Foucault The book is essential reading for anyone concerned with Nietzsche's thought political philosophy and the history of political ideas     Encounters in Planning Thought Beatrix Haselsberger, 2017-01-06

*Encounters in Planning Thought* builds on the intellectual legacy of spatial planning through essays by leading scholars from around the world including John Friedmann Peter Marcuse Patsy Healey Andreas Faludi Judith Innes Rachele Alterman and many more Each author provides a fascinating and inspiring unravelling of his or her own intellectual journey in the context of events political and economic forces and prevailing ideas and practices as well as their own personal lives This is crucial reading for those interested in spatial planning including those studying the theory and history of spatial planning

*Encounters in Planning Thought* sets out a comprehensive intellectual institutional and practical agenda for the discipline of spatial planning as it heads towards its next half century Together the essays form a solid base on which to understand the most salient elements to be taken forward by current and future generations of spatial planners     The Oxford Handbook of Urban Planning Randall Crane, Rachel Weber, 2015 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making     **Cities and the Politics of Difference** Michael A. Burayidi, 2015-01-01 The essays in this collection cover the practical and theoretical issues that surround integrating considerations of diversity in all its forms and guises into planning practice and theory     At the Roots of Christian Bioethics Ana Smith Iltis, Mark J. Cherry, 2014-05-14 *At the Roots of Christian Bioethics* explores Professor H Tristram Engelhardt Jr's pursuit for the decisive ground of the meaning of human existence and knowledge of appropriate moral choice Engelhardt has been the most influential cogent but critical voice within bioethics of the past several decades The essays in this volume compass epistemological methodological and topical contributions to bioethics political theory and Christian theology Each explores Engelhardt's diagnosis of the contemporary social and cultural crisis seeking to make sense of the decidedly post Christian and often openly anti Christian ethics that dominates public morality and political policy Each author investigates Engelhardt's personal and tireless enquiry to secure ultimate moral foundations as well as to recognize the full implications of the results of his investigations that Christian bioethics does not originate in human reason but in the command of God     Market Menagerie Smita Srinivas, 2012-04-04 *Market Menagerie* examines technological advance and market regulation in the health industries of nations such as India Brazil South Africa Nigeria and Japan Pharmaceutical and life science industries can reinforce economic development and industry growth but not necessarily positive health outcomes

Yet well crafted industrial and health policies can strengthen each other and reconcile economic and social goals This book advocates moving beyond traditional market failure to bring together three uncommonly paired themes the growth of industrial capabilities the politics of health access and the geography of production and redistribution

**Voluntarism, Community Life, and the American Ethic** Robert S. Ogilvie, 2004-06-18 This is a major contribution to the literature on social participation and voluntary action It is the first systematic ethnographic study I know that treats volunteers and the institutions they create John Van Til author of Growing Civil Society Students and faculty interested in the issue of homelessness will find the book instructive Recommended Choice Why do people volunteer and what motivates them to stick with it How do local organizations create community How does voluntary participation foster moral development in volunteers to create a better citizenry In this fascinating study of volunteers at the Partnership for the Homeless in New York City Robert S Ogilvie provides bold and engaging answers to these questions He describes how volunteer programs such as the Partnership generate ethical development in and among participants and how the Partnership s volunteers have made it such a continued success since the early 1980s Ogilvie s examination of voluntarism suggests that the American ethic is essential for sustaining community life and to the future well being of a democratic society

**Human Ecology** Frederick R. Steiner, 2016-02-16 Humans have always been influenced by natural landscapes and always will be even as we create ever larger cities and our developments fundamentally change the nature of the earth around us In Human Ecology noted city planner and landscape architect Frederick Steiner encourages us to consider how human cultures have been shaped by natural forces and how we might use this understanding to contribute to a future where both nature and people thrive Human ecology is the study of the interrelationships between humans and their environment drawing on diverse fields from biology and geography to sociology engineering and architecture Steiner admirably synthesizes these perspectives through the lens of landscape architecture a discipline that requires its practitioners to consciously connect humans and their environments After laying out eight principles for understanding human ecology the book s chapters build from the smallest scale of connection our homes and expand to community scales regions nations and ultimately examine global relationships between people and nature In this age of climate change a new approach to planning and design is required to envision a livable future Human Ecology provides architects landscape architects urban designers and planners and students in those fields with timeless principles for new creative thinking about how their work can shape a vibrant resilient future for ourselves and our planet
