Open Source Web Services:

Online Maps with APIs and WebServices Michael P. Peterson, 2012-03-30 The Internet has become the major form of map delivery The current presentation of maps is based on the use of online services This session examines developments related to online methods of map delivery particularly Application Programmer Interfaces APIs and MapServices in general including Google Maps API and similar services Map mashups have had a major impact on how spatial information is presented The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world Overlaying features on top of these maps provides a frame of reference for the map user A particular advantage for thematic mapping is the ability to spatially reference thematic data [Web Services](#) Anne Thomas Manes, 2003 Written by the author who Enterprise Systems Journal noted for her uncanny ability to apply technology to create new solutions Helps identify scenarios and applications where Web services can provide the best ROI for your company Foreword by Brown and Hagel bestselling Web services authors of Out of the Box [Advanced JAX-WS Web Services](#) Alessio Soldano, 2014-10-01 In this book you ll learn the concepts of SOAP based Web Services architecture and get practical advice on building and deploying Web Services in the enterprise Starting from the basics and the best practices for setting up a development environment this book enters into the inner details of the JAX WS in a clear and concise way You will also learn about the major toolkits available for creating compiling and testing SOAP Web Services and how to address common issues such as debugging data and securing its content **Webservices** Hrushikesh Mohanty, Prasant Kumar Pattnaik, 2018-11-30 This book focuses on web service specification search composition validation resiliency security and engineering and discusses various service specification standards like WSDL SAWSDL WSMO and OWLS The theory and associated algorithms for service specification verification are detailed using formal models like Petrinet FSM and UML The book also explores various approaches proposed for web service search and composition highlighting input output parameter based search and selection of services based on both functional and non functional parameters In turn it examines various types of composite web services and presents an overview of popular fault handling strategies for each of these types Lastly it discusses the standards used for implementing web service security on the basis of a case study and introduces the Web Service Development Life Cycle WSDLC which defines co operation between several industry partners to develop web services in a more structured way *Software Engineering for Modern Web Applications: Methodologies and Technologies* Brandon, Daniel M., 2008-06-30 This book presents current effective software engineering methods for the design and development of modern Web based applications Provided by publisher **Open Source Systems** Ernesto Damiani, Brian Fitzgerald, Walt Scacchi, Marco Scotto, 2006-08-29 Early research studies on open source software development often betrayed a mild surprise that loosely coordinated networks of volunteers could manage the design and implementation of highly complex software products In the past few years a wider research community has become increasingly aware of the

tremendous contribution that open source development is making to the software industry business and society in general Software engineering researchers are exploring OSS specifically with respect to development tools and methodologies while organizational scientists and economists are keen on understanding how open sources have brought large communities of people to help each other effectively This book is an important step in the direction of a fuller understanding of the OSS phenomenon It collects the proceedings of the Second International Conference on Open Software held in Como Italy from June 8th to June 10th 2006 OSS 2006 was the foundation conference of the IFIP TC 2 WG 2 13 on Open Source Software and attracted many researchers from all over the world interested in how OSS is produced in its huge innovation potential in many different application fields and in OSS innovative business models The 20 full papers of this volume were selected via a rigorous refereeing process among more than 100 submissions 12 additional submissions in view of their interest were selected for publication in a more concise form
