*Embedding IBM Informix* Whei-Jen Chen, Oluwatosin Ajayi, Mirav Kapadia, Alexander Koerner, Jacques Roy, Dick Snoke, IBM Redbooks, 2011-02-17 In this IBM Redbooks publication we discuss and describe the capabilities for embedding Informix into applications and software We introduce the technological architecture and describe several of the functions and features that support Informix as a robust and powerful embeddable DBMS Many of these features are unique in the industry today enabling clients to create a business advantage The Informix database server can support the requirements of an embeddable DBMS and is doing so for many companies today The low administration requirements of the Informix database server enable clients to deploy thousands of Informix instances embedded in applications in locations where there are no technical resources to support the database The real requirement is for applications with embedded databases that require little or no administration take minimum storage resources have excellent performance and are highly reliable As a mature and reliable DBMS the Informix database server works well with small growing and large databases and meets the key requirements for embedded databases which include the ability to execute without needing any configuration or other DBA administrative activities and the flexibility to work on all of the platforms commonly used in the marketplace today

*Solving Business Problems with Informix TimeSeries* Vaibhav S Dantale, Tony Hays, Anup Nair, Jacques Roy, IBM Redbooks, 2012-09-21 The world is becoming more and more instrumented interconnected and intelligent in what IBM terms a smarter planet with more and more data being collected for analysis In trade magazines this trend is called big data As part of this trend the following types of time based information are collected Large data centers support a corporation or provide cloud services These data centers need to collect temperature humidity and other types of information over time to optimize energy usage Utility meters referred to as smart meters allow utility companies to collect information over a wireless network and to collect more data than ever before IBM Informix TimeSeries is optimized for the processing of time based data and can provide the following benefits Storage savings Storage can be optimized when you know the characteristics of your time based data Informix TimeSeries often uses one third of the storage space that is required by a standard relational database Query performance Informix TimeSeries takes into consideration the type of data to optimize its organization on disk and eliminates the need for some large indexes and additional sorting For these reasons and more some queries can easily have an order of magnitude performance improvement compared to standard relational Simpler queries Informix TimeSeries includes a large set of specialized functions that allow you to better express the processing that you want to execute It even provides a toolkit so that you can add proprietary algorithms to the library This IBM Redbooks publication is for people who want to implement a solution that revolves around time based data It gives you the information that you need to get started and be productive with Informix TimeSeries
