**Education** Moncrieff Cochran, Rebecca S. New, 2007-01-30 Early childhood education has reached a level of unprecedented national and international focus. Parents, policy makers and politicians have opinions as well as new questions about what, how, when and where young children should learn. Teachers and program administrators now find curriculum discussions linked to dramatic new understandings about children's early learning and brain development. Early childhood education is also a major topic of concern internationally as social policy analysts point to its role in a nation's future economic outlook. As a groundbreaking contribution to its field, this four volume handbook discusses key historical and contemporary issues, research, theoretical perspectives, national policies and practices. Lindley, Uvanney Maylor, James Shea, 2024-04-12 Exploring Social Justice in Practice in Education focuses on the tensions and challenges to issues of fairness and social and cognitive justice in the sphere of education. The terms fairness and social and cognitive justice are often used to justify particular policies and practices in the sphere of education. In providing a clear definition of what they should mean in practice, this book includes a discussion of and in some cases potential resolutions to tensions and challenges in relation to notions of fairness and social and cognitive justice that are implicit within individuals' lived experiences across all phases of education. Through their personal narratives, the authors illustrate how such tensions and challenges have played out in their own lives. They go on to explore differences in interpretations and consequent challenges in putting concepts of social justice into practice. Chapters consider important implications across different sectors and phases of education, including special educational needs, leadership and higher education. This insightful volume will enable educators at all levels to hear from students, family members, significant adults, carers and professionals their experiences of fairness and social justice in education and about what could be done in the future to redress injustices.
