## **Opening Financial Markets Banking Politics On The Pacific Rim:**

*Opening Financial Markets* Louis W. Pauly, 1988      **Opening Japan's Financial Markets** J. Robert Brown Jr., 2002-09-11 This book is topical and controversial One of the few books to accept that foreign companies are partly to blame for their failure to break into the Japanese market      **The Politics of Financial Markets and Regulation S.** Konoe, 2014-01-28 Sara Konoe looks into the politics of financial regulatory developments in the United States Japan and Germany These case studies highlight systemic interaction between institutions and political contexts and provide broader implications for global financial governance      Politics and Markets in the Wake of the Asian Crisis Mark Beeson, Kanishka Jayasuriya, Hyuk-Rae Kim, Richard Robison, 2003-09-02 This book is a challenging volume by distinguished leading scholars of East Asian political economy it provides a distinct alternative to simplistic accounts of the Asian crisis which generally swing between an emphasis on convergence imposed by global economic forces and the resurrection of the special patterns of East Asian economic governance The authors argue that global forces and domestic structures are engendering new forms of economic and political regulation in East Asia While these signal the death knell of the developmental state this in itself does not presuppose a convergence towards a standard model of global capitalism The arguments in this book will contribute significantly to the construction of a new research agenda for comparative political economy at the dawn of a new century *Politics and Markets in the Wake of the Asian Crisis* covers a range of East Asian countries including the People's Republic of China South Korea Indonesia Thailand and Malaysia All the studies are linked together by a common endeavour to explore the dynamic interaction between global economic forces and domestic structures The book is at the cutting edge of the study of East Asian political economy and is distinguished by the attention it pays to the regional and international context of the crisis It also contains theoretically sophisticated analyses of organisations such as APEC and the IMF      **The Politics of American Economic Policy Making** Paul Peretz, 2016-09-16 A reader on American government and the economy It contains wide ranging articles by people such as Richard Musgrave Milton Friedman James Buchanan and Alan Greenspan      **Issues and Agents in International Political Economy** Benjamin J. Cohen, Charles Lipson, 1999 This is the second of two anthologies on international political economy drawn from articles published in the journal *International Organization* The book is organized into four sections Trade Multinational Firms and Globalization Money and Finance and Emerging Issues      **Fighting for Partnership** Lowell Turner, 2018-05-31 West Germany from 1949 to 1990 was a story of virtually unparalleled political and economic success This economic miracle incorporated a well functioning political democracy expanded to include a social partnership system of economic representation Then the Wall came down Economic crisis in the East industrial collapse massive layoffs a demoralized workforce triggered gloomy predictions Was this the beginning of the end for the widely admired German model Lowell Turner has extensively researched the German transformation in the 1990s Indeed in 1993 he was at the factory gates at Siemens in Rostock for the first major strike in post Cold War eastern Germany

In that strike and in a series of other incisively analyzed workplace and job developments in eastern Germany he shows the remarkable resilience and flexibility of the German social partnership and the contribution of its institutions to unification His controversial and to some radical findings will stimulate debate at home and abroad **Ideas and Foreign Policy** Judith Goldstein, Robert O. Keohane, 2019-06-30 Do people's beliefs help to explain foreign policy decisions or is political activity better understood as the self-interested behavior of key actors The collaborative effort of a group of distinguished scholars this volume breaks new ground in demonstrating how ideas can shape policy even when actors are motivated by rational self-interest After an introduction outlining a new framework for approaching the role of ideas in foreign policy making well-crafted case studies test the approach The function of ideas as road maps that reduce uncertainty is examined in chapters on human rights decolonization the creation of socialist economies in China and Eastern Europe and the postwar Anglo-American economic settlement Discussions of parliamentary ideas in seventeenth-century England and of the Single European Act illustrate the role of ideas in resolving problems of coordination The process by which ideas are institutionalized is further explored in chapters on the Peace of Westphalia and on German and Japanese efforts to cope with contemporary terrorism **Mercantile States and the World Oil Cartel, 1900-1939** Gregory Patrick Nowell, 1994

**Governing Ideas** J. Nicholas Ziegler, 2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J. Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer-controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge-bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge-based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany's strengths stem directly from what Ziegler calls an ethos of competence whereas France's strengths stem from an order of state-created elites More generally Ziegler contends neo-institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups **Why Syria Goes to War** Fred H. Lawson, 2018-09-05 Rejecting conventional explanations for Syrian foreign policy which emphasize the personalities and attitudes of leaders cultural factors peculiar to Arab societies or the machinations of the great powers Fred H. Lawson describes key shifts in Damascus's response to regional adversaries in terms of changes in the intensity of political struggles at home Periodic eruptions of domestic conflict have inspired Syria's ruling coalition to adopt a wide range of programs designed to buy off domestic rivals

and perpetuate the predominance of individual coalition members These programs have undermined the unity of the Ba thi regime increasing the chances that opponents will overturn the established order Challenges to the Ba thi regime become most threatening whenever crises of accumulation shake the domestic political economy Lawson contends Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more accommodating postures Lawson traces this dynamic through five major episodes the 1967 war with Israel limited intervention in Jordan in 1970 the widening conflict in Lebanon in 1976 the defusing of conflict with Iraq in 1982 and the rapprochement with Turkey over Kurdish separatism in 1994 These patterns Lawson suggests may be characteristic of nations changing from one domestic economic system to a radically different one as Syria has in the transition from state socialism to a privatized political economy *National Diversity and Global Capitalism* Suzanne Berger, Ronald Dore, 1996 The contributions to the volume present a challenge to conventional views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state s leverage over the economy Foreign Multinationals in the United States Lina Gálvez-Muñoz, Geoffrey G Jones, 2005-07-26 In this volume leading scholars in international business and business history in the United States Europe and Japan examine the experiences of a range of firms in the United States They survey British Canadian French German Spanish and Japanese firms and span a range of sectors including automobiles banking electricals petroleum and steel Together their contributions present a unique evolutionary and comparative perspective on the management and performance of foreign companies in the United States since 1945 This book is essential reading for all those with a professional or academic interest in international business management business history or business in the United States Remaking the Italian Economy Richard M. Locke, 2018-09-05 **Rival Capitalists** Jeffrey A. Hart, 2018-08-06 Great Britain France Germany and Japan Surveying the development of the steel automobile and semiconductor industries in each of these countries Jeffrey A Hart illuminates the role of national policy in a changing world Hart describes the global structure of production and consumption in the five major capitalist countries and offers a rich comparative history of their industrial policymaking He concludes that variations in statesocietal arrangements and the impact these differences have on the creation and diffusion of new technologies provide the best explanation for divergences in international competitiveness In Japan state and business are allied but labor is marginalized whereas in Germany labor and business are allied and the state is decentralized Yet both countries have become increasingly competitive because they have developed institutional mechanisms for technology diffusion France s state led system in contrast is linked with only moderate competitiveness The decline of competitiveness in the United States and Britain Hart concludes may be attributed to state societal arrangements that have allowed one actor labor in Britain business in the United States to dominate policymaking *Rival Capitalists* will be an invaluable source for policymakers and

business analysts as well as scholars and students of political economy international relations industrial organization industrial sociology and comparative politics

**The Choice for Europe** Andrew Moravcsik, 2013-10-11 The creation of the European Union arguably ranks among the most extraordinary achievements in modern world politics Observers disagree however about the reasons why European governments have chosen to co ordinate core economic policies and surrender sovereign prerogatives This text analyzes the history of the region s movement toward economic and political union Do these unifying steps demonstrate the pre eminence of national security concerns the power of federalist ideals the skill of political entrepreneurs like Jean Monnet and Jacques Delors or the triumph of technocratic planning Moravcsik rejects such views Economic interdependence has been he maintains the primary force compelling these democracies to move in this surprising direction Politicians rationally pursued national economic advantage through the exploitation of asymmetrical interdependence and the manipulation of institutional commitments

**Ideas, Interests, and American Trade Policy** Judith Goldstein, 2019-05-15 To citizens and political analysts alike United States trade law is an incoherent conglomeration of policies both liberal and protectionist Seeking to understand the contradictions in American policy Judith Goldstein offers the first book to demonstrate the impact of the political past on today s trade decisions As she traces the history of trade agreements from the antebellum era through the 1980s she addresses a fundamental question What effects do shared ideas about economics as opposed to national power or individual self interest have on the institutions that make and enforce trade law Goldstein argues that successful ideas become embedded in institutions and typically outlive the time during which they served social interests She sets the stage with a discussion of the shifting commercial policy of the first half of the nineteenth century After examining the consequences of the Republican party s decision to promote high tariffs between 1870 and 1930 she then considers in detail the political aftermath of the Great Depression when the Democratic party settled on a reciprocal trade platform Because the Democrats did not completely dismantle the existing system however the combined legacies of protection and openness help explain the intricacies in the forms of protectionism that political leaders have advocated since World War II Readers in such fields as political science political economy policy studies and law international relations and American history will welcome Ideas Interests and American Trade Policy

**Governing the Global Economy** Dag Harald Claes, Carl Henrik Knutsen, 2011-04-29 Governing the Global Economy explores the dynamic interaction between politics and economics between states and markets and between international and domestic politics The contributors study how the governance of the global economy is shaped by interaction between international institutions domestic politics and multinational enterprises from a wide range of theoretical perspectives and methods Presenting a fresh approach to the study of international political economy this volume covers the systemic characteristics of the liberal world order the role of international institutions domestic economic politics and policies the strategies and behaviour of multinational enterprises The volume also includes topical discussion of the challenges to the global economy from the recent financial crisis and

analysis of economic politics in particular the regions of Africa and Europe as well as the countries of Japan and South Korea With contributions from prominent scholars in political science economics and business studies who have all contributed greatly to advancing the study of political economy over the last decade *Governing the Global Economy* aims to bridge the gap between undergraduate textbooks and advanced theory It is essential reading for all students and scholars of international political economy and globalization

*The Nordic States and European Unity* Christine Ingebritsen, 1998 The idea of European unity which the Nordic states have historically resisted has recently become the foremost concern of Sweden Denmark Norway Iceland and Finland Christine Ingebritsen provides a timely analysis of Nordic economic and security policies in the wake of the vast transformation of regional politics between 1985 and 1995 *The Nordic States and European Unity* addresses two central questions Why did all five Nordic states trade autonomy for integration after 1985 And why do some follow the British pattern resisting supranationalism while others prefer the German strategy of embedding their policies in a common European project Through extensive interviews with representatives of trade unions government ministries parliamentary committees social movements and military and industrial organizations Ingebritsen charts adjustments to the idea of a regional system of governance She highlights crucial differences among these nations as they seek to protect their borders against new security threats In particular Ingebritsen shows how the political influence of leading sectors affects each state's capacity to pursue an integrationist policy Economic sectors are not uniformly affected by European policy coordination and the experience of the Nordic states demonstrates this difference Her work shifts the focus of political economics away from enduring domestic institutions toward an understanding of institutions as sectoral and transnational

**US-Asia Economic Relations** Justin Robertson, 2008-09-02 In a world of continuing financial volatility this book critically evaluates the oft cited claim that US firms and the US government attempt to open emerging markets in economic distress and acquire valuable industrial and financial assets Focusing particularly on Korea and Thailand the author examines the degree of market opening the roles US actors played in this process and the level of foreign firm activity in the years after the Asian crisis Justin Robertson finds surprisingly little coherence between the strategies of US firms and US policy makers At the same time the book downplays European investments concluding instead that the decade since the Asian crisis has reaffirmed strengths of US capital particularly in some of the most important sectors of the global economy Investment banking private equity and subcontracting are significant new features of US Asia economic relations Providing a sophisticated understanding of US interests in Asia especially in terms of the politics of finance capital and including a wealth of empirical data on the US and Asian political economies this book will be invaluable for students and scholars of international political economy and Asian economics and politics
