Opening Of The Pacific Image Reality

Harold Burnell Carter

Opening Of The Pacific Image Reality:

California, Oregon, and Washington Archaeological Resource Study ,1990 Navigating by the Southern Cross Kenneth Morgan,2021-01-28 In this comprehensive study Kenneth Morgan provides an authoritative account of European exploration and discovery in Australia The book presents a detailed chronological overview of European interests in the Australian continent from initial speculations about the Great Southern Land to the major hydrographic expeditions of the 19th century In particular he analyses the early crossings of the Dutch in the 17th century the exploits of English buccaneer adventurer William Dampier the famous voyages of James Cook and Matthew Flinders and the little known French annexation of Australia in 1772 Introducing new findings and drawing on the latest in historiographical research this book situates developments in navigation nautical astronomy and cartography within the broader contexts of imperial colonial and maritime history **California, Oregon, and Washington Archaeological Resource Study: Appendices** ,1990

Science, Empire and the European Exploration of the Pacific Tony Ballantyne,2018-10-24 This collection of essays assesses the interrelationship between exploration empire building and science in the opening up of the Pacific Ocean by Europeans between the early 16th and mid 19th century It explores both the role of various sciences in enabling European imperial projects in the region and how the exploration of the Pacific in turn shaped emergent scientific disciplines and their claims to authority within Europe Drawing on a range of disciplines from the history of science to geography imperial history to literary criticism this volume examines the place of science in cross cultural encounters the history of cartography in Oceania shifting understandings of race and cultural difference in the Pacific and the place of ships books and instruments in the culture of science It reveals the exchanges and networks that connected British French Spanish and Russian scientific traditions even in the midst of imperial competition and the ways in which findings in diverse fields from cartography to zoology botany to anthropology were disseminated and crafted into an increasingly coherent image of the Pacific its resources peoples and histories This is a significant body of scholarship that offers many important insights for anthropologists and geographers as well as for historians of science and European imperialism Maritime Exploration in the Age of Discovery, 1415-1800 Ronald S. Love,2006-09-30 Despite earlier naval expeditions undertaken for reasons of diplomacy or trade it wasn't until the early 1400s that European maritime explorers established sea routes through most of the globe's inhabited regions uniting a divided earth into a single system of navigation From the early Portuguese and Spanish quests for gold and glory to later scientific explorations of land and culture this new understanding of the world's geography created global trade built empires defined taste and alliances of power and began the journey toward the cultural political and economic globalization in which we live today Ronald Love's engaging narrative chapters guide the reader from Marco Polo's exploration of the Mongol empire to Ferdinand Magellan's circumnavigation of the globe the search for a Northern Passage Henry Hudson's voyage to Greenland the discovery of Tahiti the perils of scurvy mutiny and warring

empires and the eventual extension of Western influence into almost every corner of the globe Biographies and primary documents round out the work

Background to Discovery Derek Howse, 2023-11-10 Background to Discovery recounts the great voyages of discovery from Dampier to Cook that excited such fervent political and popular interest in eighteenth century Europe Perhaps this book's greatest strength lies in its remarkable synthesis of both the achievements of European maritime exploration and the political economic and scientific motives behind it Writing essays on the literary and artistic response to the voyages as well the contributors collectively provide a rich source for historians geographers and anyone interested in the history of voyage and travel This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 Sir Joseph Banks (1743-1820) Harold Burnell Carter, 1987
