Volume 4 THE ECONOMY of the American Cities series This collection brings together more than 200 scholarly articles pertaining to the history and development of urban life in the United States during the past two centuries The selections in Volume 4 of the series concern the development of the urban economy since the early nineteenth century Three groups of articles each arranged chronologically deal with three basic sectors of the economy trade and commerce especially retailing manufacturing and industrialization and finance Individual articles address subjects as diverse as merchants and shopping malls flour milling and scientific management and the Chicago Board of Trade and redlining **Housing America** Randall G. Holcombe,2017-07-05 Housing policy not only affects all Americans quality of life but has a direct impact on their financial well being About 70 percent of American households own their own homes and for most their homes represent the majority of their net worth Renters are affected by housing policy Even the small minority of Americans who are homeless are affected by housing policies specifically targeted to low income individuals The government's increasing involvement in housing markets fed by popular demand that government do something to address real problems of mortgage defaults and loans provides good reason to take a new look at the public sector in housing markets Crises in prime mortgage lending may lower the cost of housing but the poor and homeless cannot benefit because of increases in unemployment Even the private market is heavily regulated Government policies dictate whether people can build new housing on their land what type of housing they can build the terms allowed in rental contracts and much more This volume considers the effects of government housing policies and what can be done to make them work better It shows that many problems are the result of government rules and regulations Even in a time of foreclosures the market can still do a crucial job of allocating resources just as it does in other markets Consequently the appropriate policy response may well be to significantly reduce not increase government presence in housing markets Housing America is a courageous and comprehensive effort to examine housing policies in the United States and to show how such policies affect the housing market *Remaking American Communities* David C. Soule,2007-11-01 Urban sprawl has gained much national attention in recent years Sprawl involves not only land use issues but also legal political and social concerns It affects our schools the environment and race relations Comprehensive enough for high school students and also appropriate for college undergraduates Remaking American Communities delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem including Robert Yaro president of the Regional Plan Association Other cutting edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce views about race and class by former mayor of

Albuquerque David Rusk and a discussion of transportation dynamics by Curtis Johnson president of the Citistates Group The essays in this collection explore the core issues of sprawl and the agenda for dealing with it Complete with a glossary resources and contact information for smart growth alliances this book is extremely user friendly David C Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue

The New Urban Reality Paul E. Peterson, 2001-06-07 America's inner cities particularly those in older industrial metropolitan areas have declined sharply in both population and employment over the past two decades How much of this change is due to technological advances in transportation communication and manufacturing How much of it is due to the changing racial composition of the central cities Can any set of public policies retard or reverse the decline of the industrial cities This book presents an interdisciplinary collection of papers addressing these questions In the introduction editor Paul E Peterson discusses the ways in which adverse economic and racial changes interact and urges more realistic federal policies to counteract these changes In Part 1 The Processes of Urban Growth and Decline sociologist John D Kasarda analyzes the growing mismatch between inner city jobs and residents and geographer Brian J L Berry discusses the economics of inner city gentrification Racial change is the subject of Part II sociologist Elijah Anderson depicts race relations in a gentrifying inner city neighborhood sociologist William J Wilson delineates the social and economic problems of inner city blacks and political scientist Gary Orfield calls for bold efforts to reverse the continuing urban pattern of racial segregation Part III looks at the way cities have responded to economic and racial change Economist Kenneth A Small discusses the impact of transportation policy political scientist Herbert Jacob finds that increasing efforts to control urban crime have not been effective and sociologist Terry Nichols Clark emphasizes the effect of political factors on the fiscal condition of cities Economist Anthony Downs reviewing the issues raised by the other authors sees little hope for racial integration as the central social strategy for solving urban problems but does see hope in the internal resources of America's minority communities

Neighborhoods and Urban Development Anthony Downs, 2010-12-01 American cities are shifting collections of individual neighborhoods Thousands of residents move every year within and among neighborhoods their flows across a city can radically and quickly alter the character of its neighborhoods What is behind all this ferment the decline of one area the revitalization of another Can the process be made more rational Can city neighborhoods be stabilized and older cities thus preserved This book argues that such flows of residents are not random Rather they are closely linked to overall migration into or out of each metropolitan area and to the way U S cities develop Downs contends that both urban development and the social problems it spawns are built upon social arrangements designed to benefit the middle class majority Racial

segregation divides housing in each metropolitan area into two or more markets Socioeconomic segregation subdivides neighborhoods within each market into a class hierarchy The poor live mainly in the oldest neighborhoods close to the urban center The affluent live in the newest neighborhoods mostly at the urban periphery This separation stems not from pure market forces but from exclusionary laws that make the construction of low cost housing illegal in most neighborhoods The resulting pattern determines where housing is built and what housing is left to decay Downs uses data from U S cities to illustrate neighborhood change and to reach conclusions about ways to cope with it he explores the causes and nature of racial segregation and integration and he evaluates neighborhood revitalization programs which in reviving part of a city often displace many poor residents He presents a timely analysis of the effect of higher energy costs upon urban sprawl argues the wisdom of reviving older cities rather than helping their residents move elsewhere and discusses the advantages and disadvantages of public and private policies at the federal state metropolitan area

The Fall and Rise of Freedom of Contract F. H. Buckley, 1999-08-27 Declared dead some twenty five years ago the idea of freedom of contract has enjoyed a remarkable intellectual revival In *The Fall and Rise of Freedom of Contract* leading scholars in the fields of contract law and law and economics analyze the new interest in bargaining freedom The 1970s was a decade of regulatory triumphalism in North America marked by a surge in consumer securities and environmental regulation Legal scholars predicted the death of contract and its replacement by regulation and reliance based theories of liability Instead we have witnessed the reemergence of free bargaining norms This revival can be attributed to the rise of law and economics which laid bare the intellectual failure of anticontractarian theories Scholars in this school note that consumers are not as helpless as they have been made out to be and that intrusive legal rules meant ostensibly to help them often leave them worse off Contract law principles have also been very robust in areas far afield from traditional contract law and the essays in this volume consider how free bargaining rights might reasonably be extended in tort property land use planning bankruptcy and divorce and family law This book will be of particular interest to legal scholars and specialists in contract law Economics and public policy planners will also be challenged by its novel arguments Contributors Gregory S Alexander Margaret F Brinig F H Buckley Robert Cooter Steven J Eagle Robert C Ellickson Richard A Epstein William A Fischel Michael Klausner Bruce H Kobayashi Geoffrey P Miller Timothy J Muris Robert H Nelson Eric A Posner Robert K Rasmussen Larry E Ribstein Roberta Romano Paul H Rubin Alan Schwartz Elizabeth S Scott Robert E Scott Michael J Trebilcock

Transforming Race and Class in Suburbia T. Vicino, 2008-06-09 Just as the nation witnessed the widespread decay of urban centers there is a mounting suburban crisis in first tier suburbs the early suburbs to develop in metropolitan America These places once the bastion of a large middle class have matured and experienced three decades of social and economic decline In the first comprehensive analysis of suburban decline for an entire region Vicino uses Baltimore as an illustrative case to chronicle how first tier suburbs experienced widespread decline while outer suburbs flourished since the 1970s At the brink of the

twenty first century Vicino illustrates how the processes of deindustrialization racial diversity and class segregation have shaped the evolution of suburban decline *Library Book Catalog* United States. Schuck,2003 America is the first society in history to make ethno racial diversity an affirmative social ideal rather than viewing it as a fearful menace as almost all other societies still do Since the 1960s America has pursued this ideal in many forms not only to remedy past discrimination against minorities but also to increase diversity for its own sake It is high time for an accounting How diverse are we now and what can we expect in the future Why do we unlike the rest of the world think that diversity is desirable and that more of it is better What risks does diversity pose What are the roles of law politics and informal social controls in promoting diversity How can we manage diversity better In this magisterial book Peter H Schuck explains how Americans have understood diversity how we came to embrace it how the government regulates it now and how we can do better He mobilizes a wealth of conceptual historical legal political and sociological analysis to argue that diversity is best managed not by the government but by families ethnic groups religious communities employers voluntary organizations and other civil society institutions Analyzing some of the most controversial policy arenas where politics and diversity intersect immigration multiculturalism language affirmative action residential neighborhoods religious practices faith based social services and school choice Schuck reveals the conflicts trade offs and ironies entailed by our commitment to the diversity ideal He concludes with recommendations to help us manage the challenge of diversity in the future

Business Elites and Urban Development Scott Cummings,1988-04-07 Written in a non technical narrative style this book is an invaluable resource for anyone concerned with current trends in urban development During the Reagan era responsibility for urban planning and development was transferred from government to private business This private sector hegemony over urban development differs markedly from the liberal policy initiatives of the 1960s and 1970s Through a series of case studies this book examines these shifting trends and shows that private sector efforts to revitalize America s central cities have not been uniformly successful The contributors who are among America s leading social scientists utilize neo Marxist urban theory to explain the conditions under which private initiative enhances or erodes downtown redevelopment *Toward a More Perfect Union* Ralph Wendell Conant,Daniel J. Myers,2002 **Policy, Planning, and People** Naomi Carmon,Susan S. Fainstein,2013-05-31 The contributors of Policy Planning and People argue for the promotion of social equity and quality of life by designing and evaluating urban policies and plans Edited by Naomi Carmon and Susan S Fainstein the volume features original essays by leading authorities in the field of urban planning and policy mainly from the United States but also from Canada Hungary Italy and Israel The contributors discuss goal setting and ethics in planning illuminate paradigm shifts make policy recommendations and arrive at best practices for future planning Policy

Planning and People includes theoretical as well as practice based essays on a wide range of planning issues housing and neighborhood transportation surveillance and safety the network society regional development and community development Several essays are devoted to disadvantaged and excluded groups such as senior citizens the poor and migrant workers The unifying themes of this volume are the values of equity diversity and democratic participation The contributors discuss and draw conclusions related to the planning process and its outcomes They demonstrate the need to look beyond efficiency to determine who benefits from urban policies and plans Contributors Alberta Andreotti Tridib Banerjee Rachel G Bratt Naomi Carmon Karen Chapple Norman Fainstein Susan Fainstein Eran Feitelson Amnon Frenkel George Galster Penny Gurstein Deborah Howe Norman Krumholz Jonathan Levine Anastasia Loukaitou Sideris Enzo Mingione Kenneth Reardon Izhak Schnell Daniel Shefer Michael Teitz Iv n Tosics Lawrence Vale Martin Wachs
