Promoting Inclusion in Education Abroad Nick J. Gozik, Heather Barclay Hamir, 2023-07-03 Co published with While education abroad including studying volunteering researching and interning abroad is increasingly emphasized as a critical factor in preparing undergraduates for a globally interconnected world diversifying the pool of participants in such activities has proven challenging Framed within the concept of inclusive excellence with the objective of promoting diversity inclusion and equity in higher education as foundational to educational excellence the contributors present research and practices that have been proven successful in improving participation among groups of students traditionally underrepresented in education abroad Broader participation in education abroad programming has been a perennial concern at numerous higher education institutions in the U S having prompted countless discussions in professional organizations and across campuses among faculty staff and students Many have come to recognize that overseas opportunities are no longer a luxury and instead are a necessity for job seekers entering a more diverse globally interconnected workplace The volume offers a combination of research based chapters and case studies from leading experts on the barriers that disproportionately impact specific groups of students including students with disabilities first generation college students undocumented students racial and ethnic minorities science technology engineering and mathematics STEM majors and males The authors illuminate the issues which may inhibit education abroad participation from individual to institutional and present strategies reflecting a broad range of institutional contexts resources and needs While there has been significant discussion and action to promote broader inclusion in education abroad this is the first volume focusing on research and practice to achieve these ends and is intended as a critical resource for practitioners and scholars alike Points of Viewing Children's Thinking Ricki Goldman-Segall, Ricki Goldman, 2014-04-08 This book is about learning and ethnography in the context of technologies Simultaneously it portrays young people s thinking attitudes in computer based learning environments and it describes how the practice of ethnography is changing in a digital world The author likens this form of interaction to the double helix where learning and ethnography are intertwined to tell an emergent story about partnerships with technology Two school computer cultures were videotaped for this study Separated not only by geography one school is on the east coast of New England and the other on the west coast of British Columbia on Vancouver Island they are also separated in other ways ethnic make up and inner city vs rural settings to name only two Yet these two schools are joined by a strong thread a change in their respective cultures with the advent of intensive computer use on the part of the students Both school communities have watched their young people gain literacy and competence and their tools have changed from pen to computer video camera multimedia and the Internet Perhaps most striking is that the way they think of themselves as learners has also changed they see themselves as an active participant in the pilot s seat or director s chair as they chart new connections between diverse and often unpredictable worlds of knowledge Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1996: Justification of the budget estimates, Arms Control and Disarmament Agency United

States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies, 1995 *International Educator*, 2008
