## Opera At The Movies:

**Opera as Soundtrack** Jeongwon Joe, 2016-05-13 Filmmakers fascination with opera dates back to the silent era but it was not until the late 1980s that critical enquiries into the intersection of opera and cinema began to emerge Jeongwon Joe focusses primarily on the role of opera as soundtrack by exploring the distinct effects opera produces in film effects which differ from other types of soundtrack music such as jazz or symphony These effects are examined from three perspectives peculiar qualities of the operatic voice various properties commonly associated with opera such as excess otherness or death and multifaceted tensions between opera and cinema for instance opera as live embodied high art and cinema as technologically mediated popular entertainment Joe argues that when opera excerpts are employed on soundtracks they tend to appear at critical moments of the film usually associated with the protagonists and the author explores why it is opera not symphony or jazz that accompanies poignant scenes like these Joe s film analysis focuses on the time period of the post 1970s which is distinguished by an increase of opera excerpts on soundtracks to blockbuster titles the commercial recognition of which promoted the production of numerous opera soundtrack CDs in the following years Joe incorporates an empirical methodology by examining primary sources such as production files cue sheets and unpublished interviews with film directors and composers to enhance the traditional hermeneutic approach The films analysed in her book include Woody Allen s Match Point David Cronenberg s M Butterfly and Wong Kar wai s 2046

**Opera Cinema** Joseph Attard, 2022-06-16 Since 2006 leading opera companies have beamed their shows to thousands of cinema screens all over the world live Opera cinema is the most successful marriage of this elaborate esoteric art form and the silver screen In the twenty first century more people watch opera on cinema screens than the stage But what is different about watching Massenet at the multiplex compared to a traditional stage performance Is opera cinema a new hybrid art form in its own right or merely a new way of engaging with an old one Is it bringing new opera fans into the fold Is there a danger it could one day eclipse the stage altogether This book deals with these questions by charting the history of opera transmissions exploring how digital media changes our relationship with culture and inviting a group of opera virgins to give their impressions on this developing cultural experience

*Opera Cinema* Joseph Attard, 2022 Based partly on the impressions of 100 opera virgins this book investigates the nature of opera cinema and the implications it poses for opera and culture more generally in the digital age In 2006 the Metropolitan Opera in New York launched its Live From the Met in HD series with Julie Taymor s abridged English language production of Mozart s Die Zauberflöte This novel hybrid of live performance and a night at the movies wowed audiences and sparked a minor boom in the streaming of live content to a network of cinemas While event cinema is now a major industry and a unique media experience with its own aesthetic technical and experiential characteristics opera cinema has developed beyond an alternative mode of engaging with opera into a new art form which blends live performance with television cinema and digital communication But what are the implications for opera Is simulcasting bringing new

audiences into the fold Is it changing stage opera And what does it mean for the ontology of opera that it now has a bigger audience on the screen than the stage In any case opera cinema is significant to debates about the ontology of live performance the boundaries of different media forms the tension between so called elite and popular culture and democratisation of the arts

**Cinema's Illusions, Opera's Allure** David Schroeder, 2016-10-06 The invention of cinema was ingenious so much so that virtually no one quite knew what to do with it In its earliest stages especially with the advent of the feature film it needed models and opera proved to be especially useful in that regard The allure of opera to cinema early in the twentieth century held up through the silent era into sound films through the golden age of movies and beyond This book explores the numerous ways some predictable some unexpected and some bizarre in which this has happened The influence of Richard Wagner on filmmakers has been especially striking and some have even devised visual images that seem to emerge from a kind of non verbal Wagnerian essence a formative musical urge that can underlie a cinematic idea defying explanation and remaining purely sensory Directors like Griffith DeMille Eisenstein Chaplin Bunuel or Hitchcock have intuited this possibility Schroeder provides a fascinating well researched and always entertaining account of the influence of one medium on another and shows that opera can often be found lurking in the background or booming in the foreground of an impressive range of films

**Hollywood Opera** Joseph D. Calver, 2014 While the phenomenon of operatic singing in classical Hollywood cinema is well known the topic has been marginalized in opera film studies of the past twenty five years Indeed the very fact that between 1926 and 1938 all of the Hollywood studios announced plans for full and feature length movie operas has escaped historical notice During the same period various studios experimented with introducing operatic performances in the context of conventional narrative pictures as a means of preparing cinema audiences for fully sung opera on screen Drawing on hundreds of previously unexamined sources this study reveals the full extent of Hollywood's operatic ambitions during the early sound era illuminating a phase of cultural development during which opera in various Hollywood forms reached a wider audience than ever before The dissertation consists of five chapters and an epilogue which proceed in more or less chronological order Chapter 1 traces the early history of American cinema's relationship with opera from the visionary projections of Thomas Edison in the late 1880s through the early years of sound Here I examine the conceptual origins of Hollywood opera and the various technological and aesthetic barriers to the production of full length operas on film Chapter 2 focuses on *The Rogue Song* 1930 and considers how MGM and various other studios believing American cinema audiences to be unready for fully sung opera on film set about cultivating appreciation for the operatic voice in movies Chapter 3 treats *Columbia Pictures One Night of Love* 1934 and the ensuing opera boom of 1935-1938 during which Hollywood filmmakers employed opera as a dramatic element in conventional narrative pictures Chapter 4 explores the emergence of imaginary opera custom made opera sequences commissioned by the studios to fulfill specific dramatic needs and as a supplement to the repertoire of well known and popular genuine operatic arias many of which by 1936 had

already been filmed Chapter 5 discusses the revival of Hollywood's plans to produce full length movie operas in 1935 and the subsequent abandonment of those plans with the end of the opera boom in February 1938 In an epilogue I briefly survey the continued presence of operatic performances in Hollywood movies 1939 1962 highlighting two films *Serenade* 1956 and *My Geisha* 1962 which respectively anticipate the techniques of New Hollywood and art films post 1970 The Film Daily ...
