Quarterly Bulletin of the Providence Public Library Providence Public Library (R.I.),1903 *Cori Spezzati: Volume 1, The Development of Sacred Polychoral Music to the Time of Schutz* Anthony F. Carver,1988-10-27 Cori Spezzati deals with polychoral church music from its beginnings in the first few decades of the sixteenth century to its climax in the work of Giovanni Gabrieli and Heinrich Schutz In polychoral music the singers sometimes with instrumentalists also were split into two or more groups that often engaged in lively dialogue and joined in majestic tutti climaxes The book draws on contemporary descriptions of the idiom especially from the writings of Vicentino and Zarlino but concentrates in the main on musical analysis showing how antiphonal chanting such as that of the psalms dialogue and canon influenced the phenomenon Polychoral music has often been considered synonymous not only with Venetian music but with impressive pomp Anthony Carver s study shows that it was cultivated by many composers outside Venice in Rome all over northern Italy in Catholic and Protestant areas of Germany in Spain and the New World and that it was as capable of quiet devotion or mannerist expressionism as of outgoing pomp Perhaps most important music by several major composers about which there is still surprisingly little in the literature is treated in depth the Gabrielis Lasso Palestrina Victoria and several German masters The book is illustrated with many musical examples A companion volume offers an anthology of seventeen complete pieces most of which are analysed in the text of Volume I **Braille Scores Catalog** Library of Congress. teleological bigotry Going against current thinking Henry Burnett and Roy Nitzberg claim that the teleological approach to observing stylistic change is still valid when considered from the purely compositional perspective The authors challenge the traditional understanding of development and advance a new theory of eleven pitch tonality as it relates to the corpus of Western composition The book plots the evolution of tonality and its bearing on style and the compositional process itself The theory is not based on the diatonic aspect of the various tonal systems exploited by composers rather the theory is chromatically based the chromatically inflected octave being the source not only of a highly ingenious developmental dialectic but also encompassing the moment to moment progression of the musical narrative itself Even the most profound teachings of Schenker and the often startlingly original and worthwhile speculations of Riemann Tovey Dahlhaus and others still provide no theory of development and so are ultimately unable to unite the various tendrils of the compositional organism into a unified whole Burnett and Nitzberg move beyond existing theory and analysis to base their theory from the standpoint of chromatic pitch fields These fields are the specific chromatic pitch choices that a composer uses to inform and design a complete composition utilizing
