Operation Torch Anglo American Invasion Of North Africa History Of 2nd World War S:

The War in North Africa, 1940-1943 Colin F. Baxter, 1996-03-30 Few of the major campaigns of World War II aroused as much controversy as the War in North Africa 1940 1943 Figures such as Rommel Montgomery and Eisenhower would become world famous because of the fighting in North Africa This book opens with seven historiographical essays that evaluate and critically assess the major contributions to the literature on the War in North Africa It then includes an alphabetically arranged bibliography of the 504 entries cited in the essays The material is easily accessible with cross references between the text and the bibliography and a full index The volume includes chapters on the Desert War 1940 42 the Axis Powers in North Africa Montgomery Alam Halfa and El Alamein TORCH the Landings in French North Africa and the Tunisian Campaign Full attention is given to questions and issues historians have raised on such controversies as the Auchinleck Montgomery dispute the debate over Operation TORCH and the Darlan affair Emphasis is on English language works but the most significant Italian German and French works are cited and assessed The book has been written for use in public college university and institutional libraries and to serve general readers and military historians British Army Communications in the Second World War Simon Godfrey, 2013-05-09 Command Control Communications and Intelligence form the backbone of the Army s operating system But while much attention has been given in the literature to the other three elements Communications in the British Army during World War II have been widely ignored This book rectifies the omission It shows that failures in front line communications contributed to several of the set backs suffered by the Army but also that ultimate victory was only achieved after a successful communications system was in place It explains how the outcome of the main campaigns in Europe and North Africa depended on communications how the system operated and how it evolved from a relatively primitive and inadequately supplied state at Dunkirk to a generally effective system at the time of the Rhine crossings Problems still occurred however for example at infantry platoon level and famously with paratrooper communications at Arnhem often simply due to the shortcomings of existing technology The book concludes that it is only very recently that advances in technology have allowed those problems to be solved **Naval Eyewitnesses** James Goulty, 2022-11-04 Goulty tells the story from the perspective of the ordinary sailor or officer who was there The Northern Mariner Although many books have been written about naval actions during the Second World War histories and memoirs in particular few books have attempted to encompass the extraordinary variety of the experience of the war at sea That is why James Goulty s vivid survey is of such value Sailors in the Royal Navy and the Merchant Navy experienced a war fought on a massive scale on every ocean of the world in a diverse range of vessels from battleships aircraft carriers and submarines to merchant ships and fishing boats Their recollections are as varied as the ships they served in and they take the reader through the entire maritime war as it was perceived at the time by those who had direct personal knowledge of it Throughout the book the emphasis is on the experience of individuals their recruitment and training their expectations and the reality

they encountered on active service in many different offensive and defensive roles including convoy duty and coastal defence amphibious operations hunting U boats and surface raiders mine sweeping and manning landing and rescue craft A particularly graphic section describes in the words of the sailors themselves what action against the enemy felt like and the impact of casualties seamen who were wounded or killed on board or were lost when their ships sank A fascinating inside view of the maritime warfare emerges which may be less heroic than the image created by some post war accounts but it gives readers today a much more realistic impression of the whole gamut of wartime life at sea **Torch** Vincent

O'Hara, 2015-09-15 World War II had many superlatives but none like Operation Torch a series of simultaneous amphibious landings audacious commando and paratroop assaults and the Atlantic's biggest naval battle fought across a two thousand mile span of coastline in French North Africa The risk was enormous the scale breathtaking the preparations rushed the training inadequate and the ramifications profound Torch was the first combined Allied offensive and key to how the Second World War unfolded politically and militarily Nonetheless historians have treated the subject lightly perhaps because of its many ambiguities As a surprise invasion of a neutral nation it recalled German attacks against countries like Belgium Norway and Yugoslavia The operation's rationale was to aid Russia but did not do this It was supposed to get American troops into the fight against Germany but did so only because it failed to achieve its short term military goals There is still debate whether Torch advanced the fight against the Axis or was a wasteful dispersion of Allied strength and actually prolonged the war Torch North Africa and the Allied Path to Victory is a fresh look at this complex and controversial operation The book covers the fierce Anglo American dispute about the operation and charts how it fits into the evolution of amphibious warfare It recounts the story of the fighting focusing on the five landings Port Lyautey Fes and Safi in Morocco and Oran and Algiers in Algeria and includes air and ground actions from the initial assault to the repulse of Allied forces on the outskirts of Tunis Torch also considers the operation's context within the larger war and it incorporates the French perspective better than any English language work on the subject It shows how Torch brought France as a power back into the Allied camp how it forced the English and the Americans to work together as true coalition partners and forge a coherent amphibious doctrine These skills were then applied to subsequent operations in the Mediterranean in the English Channel and in the Pacific The story of how this was accomplished is the story of how the Allies brought their power to bear on the enemy's continental base and won World War II *Operation 'Torch' North Africa* Jean Paul Pallud, 2019-06-30 When the western Allies decided to launch a second front in North Africa they carefully considered the anti British feeling left in France by the ill advised attack by the Royal Navy on the French Fleet at Mers el Kbir in July 1940 Consequently the operation was given an American rather than a British complexion General Eisenhower was chosen to lead a mostly American force into battle and the major Royal Navy contribution was kept as inconspicuous as possible This operation marked the first time that American troops fought against German forces during the Second World War They had a rough baptism of fire in southern

Tunisia in February 1943 training equipment and leadership failed in many instances to meet the requirements of the battlefield but the US Army was quick to learn and revise army doctrines particularly with respect to the use of armor The successful campaign created thousands of seasoned soldiers of all ranks whose experience would prove decisive in subsequent campaigns The next test was only two months away the invasion of Sicily In addition Operation Torch brought the French army back into the war Most important of all the Allies had seized the initiative in the West

The American Experience in World War II: The atomic bomb in history and memory Walter L. Hixson, 2003 World War II changed the face of the United States catapulting the country out of economic depression political isolation and social conservatism Ultimately the war was a major formative factor in the creation of modern America This unique twelve volume set provides comprehensive coverage of this transformation in its domestic policies diplomatic relations and military strategies as well as the changing cultural and social arenas The collection presents the history of the creation of a super power prior to during and after the war analyzing all major phases of the U S involvement making it a one stop resource that will be essential for all libraries supporting a history curriculum This volume is available on its own or as part of the twelve volume set The American Experience in World War II For a complete list of the volume titles in this set see the listing for The American Experience in World War II ISBN 0 415 94028 1

Operation Torch 1942 Brian Lane Herder, 2017-09-21 Following the raid on Pearl Harbor and the entry of the United States into World War II President Franklin D Roosevelt identified the European theatre as his country's priority Their first joint operation with the British was an amphibious invasion of French North Africa designed to relieve pressure on their new Soviet allies eliminate the threat of the French navy joining the Germans and to shore up the vulnerability of British imperial possessions and trade routes through the Mediterranean Operation Torch was the largest and most complex amphibious invasion of its time In November 1942 three landings took place simultaneously across the French North African coast in an ambitious attempt to trap and annihilate the Axis North African armies between the invading forces under General Eisenhower and British Field Marshall Montgomery's Eighth Army in Egypt Using full colour artwork maps and contemporary photographs this is the thrilling story of this complex operation

A History of the Second World War in 100 Maps Jeremy Black, 2020-11-18 The First World War was marked by an exceptional expansion in the use and production of military cartography But World War II took things even further employing maps charts reconnaissance and the systematic recording and processing of geographical and topographical information on an unprecedented scale As Jeremy Black one of the world's leading military and cartographic historians convincingly shows in this lavish full color book it is impossible to understand the events and outcomes of the Second World War without deep reference to mapping at all levels In World War II maps themselves became the weapons A History of the Second World War in 100 Maps traces how military cartography developed from simply recording and reflecting history to having a decisive impact on events of a global scale Drawing on one hundred key maps from the unparalleled collections of the British Library

and other sources many of which have never been published in book form before Jeremy Black takes us from the prewar mapping programs undertaken by both Germany and the United Kingdom in the mid 1930s through the conflict's end a decade later Black shows how the development of maps led directly to the planning of the complex and fluid maneuvers that defined the European theater in World War II for example aerial reconnaissance photography allowed for the charting of beach gradients and ocean depths in the runup to the D Day landings and the subsequent troop movements at Normandy would have been impossible without the help of situation maps and photos In the course of the conflict both in Europe and the Pacific the realities of climate terrain and logistics recorded on maps overcame the Axis powers Maps also became propaganda tools as the pages of Time outlined the directions of the campaigns and the Allies dropped maps from their aircraft In this thrilling and unique book Jeremy Black blends his singular cartographic and military expertise into a captivating overview of World War II from the air sea and sky making clear how fundamental maps were to every aspect of this unforgettable global conflict

From Tobruk to Tunis Neal Dando, 2016-04-21 This book focuses on the extent to which the physical terrain features across Egypt Libya and Tunisia affected British operations throughout the campaign in North Africa during the Second World War One main theme of the work analyses the terrain from the operational and tactical perspective and argues that the landscape features heavily influenced British operations and should now be considered alongside other standard military factors The work differs from previous studies in that it considers these additional factors for the entire campaign until the Axis surrender in May 1943 Until now it has been widely assumed that much of the Western Desert coastal plateau was a broadly level open region in which mobile armored operations were paramount However this work concentrates on the British operations to show they were driven by the need to capture and hold key features across each successive battlefield At the operational level planning was led by the need to hold key ground across Libya and especially the province of Cyrenaica during the crucial middle period of the campaign A secondary theme of the work argues that British forces began to improvise certain tactical doctrines which altered the early practice of combined arms assaults into one of the Infantry and Armored formations fighting largely separated battles until the autumn of 1942 Other developments in doctrine which were affected by the terrain included the practice of unit dispersal to hold key ground and the use of temporary units such as Jock columns to harass and engage the enemy The two themes are inter linked and contribute fresh insights to the debate on British methods of warfare The author has consulted key primary documents reports war diaries and published memoirs from major UK archives and compared these with the campaign historiography to develop the main themes of the work These include the National Archives the Churchill Archives Center the Liddell Hart Center for Military History the National Army Museum John Rylands Center Imperial War Museum at London and Duxford and London and the Tank Museum Archives at Bovington The sources include unit war diaries after action reports along with many of the key published and some unpublished memoirs His text is supported by 24 pages of specially commissioned color maps
