Surviving the Unipolar Era A.B. Abrams,2025-01-01 On June 29 1950 the U S launched its first ever air strikes on the North Korean capital Pyongyang marking the start of what would become the longest conflict in history between two industrial powers Four decades later the end of the Cold War in 1989 and the disintegration of the Soviet Union in 1991 marked the beginning of a new phase of the conflict with a new unipolar world order centered on the power of the U S and Western world leaving North Korea in unprecedented isolation Now unsupported in its fight against a Western superpower intent on its destruction the small but technologically adept and heavily militarized East Asian state would need to adopt more radical measures to ensure its security Over the next 35 years the conflict would transform from a period of North Korean decline in the face of tremendous economic and military pressure to one of an ascent in its power and decline in the West as international order evolved past the unipolar era Surviving the Unipolar Era elucidates the conflict s transformation beginning with unprecedented U S led efforts to achieve North Korea s total collapse and elimination through maximum pressure and ending three decades later with a subsiding of Pyongyang s international isolation and the modernization of its economy armed forces and nuclear deterrent A B Abrams highlights how the small state has been able to

hold its own in multiple standoffs with the world's superpower successfully weather economic sanctions and prevent penetration of its information space and the implications that this has had for the country the region and the wider world He details the strong consistency in American objectives and the evolution of consensus across five separate administrations on how these should be pursued as the circumstances of the conflict transformed In the context of prevailing geopolitical economic and security trends Abrams projects the future course of the conflict including aspects such as Western difficulties coming to terms with North Korea's ascent U S policy priorities going forward and the growing opportunities that an emerging new global cold war is likely to provide Pyongyang

Outsourcing Security Bruce E. Stanley,2015-07-15 Faced with a decreasing supply of national troops dwindling defense budgets and the ever rising demand for boots on the ground in global conflicts and humanitarian emergencies decision makers are left with little choice but to legalize and legitimize the use of private military contractors PMCs Outsourcing Security examines the impact that bureaucratic controls and the increasing permissiveness of security environments have had on the U S military's growing use of PMCs during the late twentieth and early twenty first centuries Bruce E Stanley examines the relationship between the rise of the private security industry and five potential explanatory variables tied to supply and demand theory in six historical cases including Operation Desert Storm in 1991 the U S intervention in Bosnia in 1995 and Operation Iraqi Freedom in 2003 Outsourcing Security is the only work that moves beyond a descriptive account of the rise of PMCs to lay out a precise theory explaining the phenomenon and providing a framework for those considering PMCs in future global interaction
