**Storming the World Stage** Stephen Tinkel, 2014-01-16 Lashkar e Taiba is among the most powerful militants groups in South Asia and increasingly viewed as a global terrorist threat on par with al Qaeda Considered Pakistan s most powerful proxy against India the group gained public prominence after its deadly ten person suicide assault on Mumbai in November 2008 By the time the last Lashkar terrorist was dead after nearly 60 hours it appeared the world was facing a new menace Boasting transnational networks stretching across several continents there has been serious debate since 9 11 of whether Lashkar is an al Qaeda affiliate The deliberate targeting of Westerners and Jews during the Mumbai attacks raised questions about whether Lashkar was moving deeper into al Qaeda s orbit and perhaps on a trajectory to displace Osama bin Laden s network as the next major global jihadi threat Lashkar s expansion has serious security implications for India Pakistan Europe and the United States and its activities threaten to damage US Pakistan relations Despite growing calls for action Pakistan is yet to take any serious steps toward dismantling Lashkar for fear of drawing it further into the insurgency raging there and because of its continued utility against India More than a militant outfit Lashkar also controls a vast infrastructure that delivers necessary social services to the Pakistani populace making it all the more difficult to dismantle Storming the World Stage traces the evolution of Lashkar e Taiba over more than two decades to illustrate how the group grew so powerful and to assess the threat it poses to India the West and to Pakistan itself The first English language book ever written about Lashkar it draws on in depth field research including interviews with senior Lashkar leaders rank and file members and officials of the Pakistani security services some of who have helped nurture the group over the years

**Complex Rivalry** Surinder Mohan, 2022-10-06 While a substantial body of research explains how the conflict between India and Pakistan originated and developed over time a systematic and multivariate inquiry cutting across different IR paradigms to understand this rivalry is rare or limited Surinder Mohan contributes to the understanding of India and Pakistan s rivalry by presenting a new type of framework also known as complex rivalry model

This comprehensive model by not limiting its theoretical tool kit to any single paradigm is unique in its approach and better positioned to debate and answer baffling questions that the single paradigm based studies address rather inadequately and in isolation This book through an examination of fifty seven militarized disputes between 1947 and 2021 explains the life cycle of India Pakistan rivalry in four phases initiation development maintenance and a possible transformation termination Mohan delineates five specific conditions that evolved the subcontinental conflict into a complex rivalry first its survival in spite of the Bangladesh War and the end of the Cold War second its linkage with other rivalries third the inclusion of nuclear factor fourth the dyadic stability in the militarized disputes and hostility level despite changes in the regime type and fifth the dyad s involvement in a multilayered conflict pattern To break this deadlock and mitigate their longstanding differences Mohan proposes that India and Pakistan must reframe their national priorities and political goals so that the new situation or combinations of conditions would assist their peace strategists to downgrade the dyadic hostility and implement risky policies to make headway to a promising transformation

Inside Nuclear South Asia Scott D. Sagan, 2009-08-17 Nuclear armed adversaries India and Pakistan have fought three wars since their creation as sovereign states in 1947 They went to the brink of a fourth in 2001 following an attack on the Indian parliament which the Indian government blamed on the Pakistan backed Lashkar e Taiba and Jaish e Mohammed terrorist organizations Despite some attempts at rapprochement in the intervening years a new standoff between the two countries was precipitated when India accused Lashkar e Taiba of being behind the Mumbai attacks late last year The relentlessness of the confrontations between these two nations makes Inside Nuclear South Asia a must read for anyone wishing to gain a thorough understanding of the spread of nuclear weapons in South Asia and the potential consequences of nuclear proliferation on the subcontinent The book begins with an analysis of the factors that led to India s decision to cross the nuclear threshold in 1998 with Pakistan close behind factors such as the broad political support for a nuclear weapons program within India s ruling Bharatiya Janata Party BJP the intense rivalry between the two countries the normative and prestige factors that influenced their behaviors and ultimately the perceived threat to their respective national security The second half of the book analyzes the consequences of nuclear proliferation on the subcontinent These chapters show that the presence of nuclear weapons in South Asia has increased the frequency and propensity of low level violence further destabilizing the region Additionally nuclear weapons in India and Pakistan have led to serious political changes that also challenge the ability of the two states to produce stable nuclear d tente Thus this book provides both new insights into the domestic politics behind specific nuclear policy choices in South Asia a critique of narrow realist views of nuclear proliferation and the dangers of nuclear proliferation in South Asia

**The Nuclear Shadow over South Asia, 1947 to the Present** Kaushik Roy, 2017-03-02 This collection of seminal articles illustrates the reasons for the spiraling nuclear race in the Asian subcontinent and introduces the principal debates in the field Authors discuss whether the acquisition of nuclear weapons by the South Asian powers has raised the likelihood of a

nuclear war in the subcontinent or reduced the chance of a conventional war breaking out They examine whether a small nuclear arsenal or a nuclear triad as declared by India is suitable for bringing stability to the region as well as the risk of an accidental nuclear conflagration The first section charts the evolution of nuclear programmes on the basis of realpolitik and the second section analyses nuclear policies on the basis of religious and cultural ethos A few essays turn the spotlight on the role of external powers in accelerating decelerating and mediating the ongoing nuclear tension between India and Pakistan
