Operative Oral Surgery:

Operative Oral and Maxillofacial Surgery Second edition John Langdon, Mohan Patel, Peter Brennan, 2010-11-26

Operative Maxillofacial Surgery was first published in 1998 and within a very short period it became the standard text for trainees in oral and maxillofacial surgery preparing for their exit examinations. For this second edition the contents have been extensively revised not only to include all aspects of oral surgery but also to reflect the changes in maxillofacial practice that have occurred since 1998. In particular the role of osseointegrated implants, the management of craniofacial trauma and facial aesthetic surgery including cosmetic surgery and bone distraction have all moved on since the first edition was written. The editors have made a careful selection of contributors representing current practice from throughout the world including continental Europe, the United States, Asia and Australia. Operative Oral and Maxillofacial Surgery represents international best practice in the specialty. Each chapter has been written by an internationally recognised expert and represents a how I do it master class. It is illustrated with clear line diagrams supplemented where appropriate with clinical photographs showing the essential steps in all the surgical procedures in current clinical practice. Authors have kept to a standard template ensuring a minimum of discussion and an emphasis on surgical technique. The definitive surgical manual in the field. Operative Oral and Maxillofacial Surgery will appeal to trainees, young specialists and established experts not only in oral and maxillofacial surgery but also the related specialties of otorhinolaryngology and plastic surgery.

A Manual of Oral and Maxillofacial Surgery for Nurses Colin Yates, 2008-04-30

This handbook details the nursing care of patients undergoing oral and maxillofacial surgery. It deals with diseases, disorders and injuries of the mouth, jaw and face and provides information on the full spectrum of patient care from pre-admission to discharge planning. It is jointly written by nurses and consultants in the area of maxillofacial surgery and combines elements of nursing care with medical and surgical information. It provides an attractive alternative to the heavier medical tomes that nurses have come to rely upon.
