Paul D. Taillon,2002-06-30 Terrorism and its

manifestations continue to evolve becoming deadlier and more menacing This study considers the evolution of terrorism since 1968 and how airlines and governments have attempted to deal with this form of violence through a series of nonforce strategies Using historical examples we see how governments particularly the United States attempted to counter politically motivated aerial hijacking with metal detectors legal means and finally in frustration counterviolence operations to subdue terrorists As nations witnessed aerial hijacking and sieges the requirement for paramilitary and military counterterrorist forces became a necessity Through use of examples from Israel Entebbe 1976 West Germany Mogadishu 1977 and Egypt Malta 1985 Taillon concludes that cooperation ranging from shared intelligence to forward base access and observers can provide significant advantages in dealing with low intensity operations He hopes to highlight those key aspects of cooperation at an international level which have at least in part been vital to successful counterterrorist operations in the

past and as we witnessed again in the campaign in Afghanistan are destined to remain so in the future *Casting Light on the Shadows* Bernd Horn, Tony Balasevicius, 2007-02-28 Special Operations Forces SOF have never been an integral element of Canada's military capability. Although units have existed periodically throughout the country's history they have always been in the shadows. However the terrorist attack in the United States on September 11 2001 changed that. In the aftermath of 9/11 SOF became the force of choice. *Casting Light on the Shadows* consists of a series of essays on SOF related issues written by individuals with specialized knowledge and expertise in the field. As well as providing a solid foundation for SOF theory historical background and evolution the book also highlights ongoing developments in SOF Special Operations and Strategy James D. Kiras, 2006-07-29 James D. Kiras shows how a number of different special operations in conjunction with more conventional military actions achieve and sustain strategic effects over time. In particular he argues that the root of effective special operations lies in understanding the relationship existing between moral and material attrition at the strategic level. He also presents a theoretical framework for understanding how special operations achieve strategic effects using a unique synthesis of strategic theory and case studies. This study shows how the key to understanding how special operations reside in the concept of strategic attrition and in the moral and material nature of strategy. It also highlights major figures such as Carl von Clausewitz, Hans Delbrück and Mao Zedong who understood these complexities and were experts in eroding an enemy's will to fight. These and other examples provide a superb explanation of the complexities of modern strategy and the place of special operations in a war of attrition. This book will be of great interest to all students and scholars with an interest in special forces and of strategic and military studies in general *The Intelligence War against the IRA* Thomas Leahy, 2020-03-26 Thomas Leahy investigates whether informers, Special Forces and other British intelligence operations forced the IRA into peace in the 1990s **Times of Troubles** Andrew Sanders, 2012-05-02 How The Troubles in Ulster defined the Scottish and British military experience post WW2 Demons, Hamlets and Femmes Fatales Jayne Steel, 2007 The book provides a lively discussion of the ways in which popular fiction appropriates the figure of the Provisional IRA activist and the political conflict within the north of Ireland. It looks at how authors' recreations or transformations of Irish republicanism might reveal self-referential images that are ultimately a product of national identity and/or gender identity. An important focus of the book interrogates British fascination and fixation with the Provisional IRA and its terrors. The many novels discussed in this study include *Gerald Seymour's Harry's Game*, *Campbell Armstrong's Jig*, *Bernard MacLaverty's Cal*, *Mary Costello's Titanic Town*, *Jennifer Johnston's Shadows on our Skin*, *Deidre Madden's One by One* through the Darkness Democracies at War against Terrorism S. Cohen, 2016-03-28 Numerous democratic nations have been singled out by NGOs for brutality in their modus operandi for paying inadequate attention to civilian protection or for torture of prisoners. This book deals with the difficulties faced when conducting asymmetric warfare in populated areas without violating humanitarian law **Human Factors in Effective Counter-Terrorism** Richard

Warnes,2024-02-29 This book seeks to provide a comparative assessment of the significance of human factors in effective counter terrorism The phrase human factors is used to describe personal relationships individual capabilities effective leadership technical interface organisational culture and the community engagement necessary to effectively minimise counter and control the threat of terrorism Unlike many works in the field this book is constructed around the input of experienced knowledge from over 170 semi structured interviews of specialist military policing intelligence and security practitioners those actors actually involved in countering terrorism These practitioners come from seven countries the United Kingdom Ireland France Spain Israel Turkey and the United States all of which have suffered over the years from different types of terrorist threat and responded with a mixture of counter terrorist measures Where military practitioners also discussed overseas counter insurgency measures that material has been included since terrorism forms a key aspect of such wider insurgencies The resulting interview data was analysed through a variant of Grounded Theory to identify key emerging themes and issues both positive and negative relevant to human factors in the individual countries and more generically This book incorporates the informed operational experiences and insights of the interviewees while seeking to provide examples of successful counter terrorist measures at the strategic operational and tactical levels This book will be of much interest to students of counter terrorism defence studies and security studies in general Extending Broadband Connectivity in

The Browning High-Power Pistol Leroy Thompson, 2020-04-30 Making its debut in 1935 the Browning High Power was the world's most widely used military pistol for much of the 20th century Military and law enforcement agencies in more than 90 countries have issued the High Power and it has seen combat in conflicts from World War II through to the War on Terror After conquering Belgium Nazi Germany produced more than 300 000 High Powers for use by the Waffen SS Fallschirmjäger and others and after 1945 the High Power became standard for most NATO armed forces as well as scores of others Chambered for the 9.19mm Luger cartridge John Browning's High Power improved on the classic Colt M1911 design especially in its use of a far simpler takedown system The pistol's innovative 13 round magazine designed by Dieudonné Saive staggered the cartridges for higher capacity without unduly increasing the grip size During its 82 year production run at Fabrique Nationale FN in Belgium the design evolved slightly but a 2017 High Power was still easily recognizable as a descendant of the original model Packed with gripping material including detailed technical specifications contemporary photographs and highly accurate artist's renditions this title is a comprehensive and informative guide to the world's most iconic semi automatic pistol

Northern Ireland: The Troubles Kenneth Lesley-Dixon, 2020-01-31 It is of course no secret that undercover Special Forces and intelligence agencies operated in Northern Ireland and the Republic throughout the troubles from 1969 to 2001 and beyond What is less well known is how these units were recruited how they operated what their mandate was and what they actually did This is the first account to reveal much of this hitherto unpublished information providing a truly unique record of surveillance reconnaissance intelligence gathering collusion and undercover combat An astonishing number of agencies were active to combat the IRA murder squads the Provos among others the Military Reaction Force MRF and the Special Reconnaissance Unit also known as the 14 Field Security and Intelligence Company The Det as well as MI5 Special Branch the RUC the UDR and the Force Research Unit FRU later the Joint Support Group JSG It deals with still contentious and challenging issues as shoot to kill murder squads the Disappeared and collusion with loyalists It examines the findings of the Stevens Cassel and De Silva reports and looks at operations Loughgall Andersonstown Gibraltar and others

Pax Britannica: British Counterinsurgency In Northern Ireland, 1969-1982 Montgomery McFate, 2014-12-22 British forces conducted operations short of war in Northern Ireland for twenty five years yet they were unable to defeat the Provisional Irish Republican Army PIRA In this heretofore unpublished dissertation from 1994 McFate identifies how certain cultural legal and political factors contributed to the longevity of violence in Northern Ireland Viewing counterinsurgency as a self

reproducing cultural system with its own complex logic McFate argues that limitations on violence prescribed by the counterinsurgency principle of minimum force paradoxically resulted in a very high degree of sustainability of conflict Certain other factors such as emergency security legislation reverence of military competence and geo strategic compression of violence within a cordon sanitaire enabled normalization and reproduction of the conflict In opposition to this order the 1981 Republican hungerstrikes used the silence of the body to incriminate the state embodying a resistance to the war system of counterinsurgency

Concrete Hell Louis A. DiMarco, 2012-11-20 Written by the US Army's Urban Warfare Specialist this book is the definitive look at how urban warfare tactics have evolved providing invaluable lessons for the US and British Armies of the future Throughout history cities have been at the center of warfare from sieges to street fighting from peace keeping to coups de mains Sun Tzu admonished his readers of The Art of War that the lowest realization of warfare was to attack a fortified city Indeed although strategists have advised against it across the millennia armies and generals have been forced nonetheless to attack and defend cities and victory has required that they do it well In Concrete Hell Louis DiMarco has provided a masterful study of the brutal realities of urban warfare of what it means to seize and hold a city literally block by block Such a study could not be more timely We live in an increasingly urbanizing world a military unprepared for urban operations is unprepared for tomorrow Di Marco masterfully studies the successes and failures of past battles in order to provide lessons for today's tacticians
