Hiera Christopher A. Faraone,Dirk Obbink,1997-02-13 This collection challenges the tendency among scholars of ancient Greece to see magical and religious ritual as mutually exclusive and to ignore magical practices in Greek religion The contributors survey specific bodies of archaeological epigraphical and papyrological evidence for magical practices in the Greek world and in each case determine whether the traditional dichotomy between magic and religion helps in any way to conceptualize the objective features of the evidence examined Contributors include Christopher A Faraone J H M Strubbe H S Versnel Roy Kotansky John Scarborough Samuel Eitrem Fritz Graf John J Winkler Hans Dieter Betz and C R Phillips

Homer's Iliad Claude Brügger,2017-01-11 Research into traditional areas of Homeric scholarship e g language the structure of the text etc has come a long way since the last comprehensive commentaries on the Iliad were carried out that is the commentary by Ameis Hentze in German language in the late nineteenth and early twentieth century as well as the Cambridge commentary by Kirk et al in English language in the 1980 90s Much of this kind of research is now set upon a much surer methodological and theoretical foundation Developments in the field of Mycenology and in the study of Linear B oral poetry and the history of ancient Troy in particular have made possible a number of new insights and interpretive possibilities in Homer's epic Moreover modern secondary literature of all major languages has been systematically covered The Basel Commentary to the Iliad is a new up to date standard work that addresses these issues directly and will be of

interest to scholars teachers and students alike Central to the commentary on Iliad 24 is the interpretation of one of the most exciting and most moving scenes of the Iliad how Priam the king of Troy makes his way to his mortal enemy Achilles by whose hand his son Hector had fallen how the god Hermes leads the old man almost magically into the army camp of the Greeks how Achilles at the end of an emotional encounter with Priam leaves the body of Hector for burial **Tod und**

Ritual in den christlichen Gemeinden der Antike Ulrich Volp, 2015-12-22 The development of Early Christian rituals in connection with death and burial has so far not sufficiently been explored Volp's study focuses on the surviving literary sources both pagan and Christian together with inscriptions and other archaeological remains while taking into account recent results from science and humanities A summary of death and ritual in the ancient Mediterranean religions is followed by detailed analyses of the Christian sources from the 2nd to the 5th century Thus basic developments are being discovered which led to and accompanied the forming of Christian rituals such as ritual purity or the social structure of family and society Being the first such interdisciplinary approach it also represents the first monographic work on the topic since 1941

Death and the Maiden Ken Dowden, 2014-03-18 A remarkable number of Greek myths concern the plight of virgins slaughtered sacrificed hanged transformed into birds cows deer bears trees and punished in Hades Death and the Maiden first published in 1989 contextualises this mythology in terms of geography history and culture and offers a comprehensive theory firmly grounded in an ubiquitous ritual pubescent girls rites of passage By means of comparative anthropology it is argued that many local ceremonies are echoed throughout the whole range of myths both famous and obscure Further Professor Dowden examines boys rites as well as the renewal of entire communities at regular intervals The first full length work in English devoted to passage rites in Greek myth Death and the Maiden is an important contribution to the exciting developments in the study of the interrelation between myth and ritual from it an innovative view on the origination of many Greek myths emerges

Religion of the Gods Kimberley Christine Patton, 2009 In many of the world's religions both polytheistic and monotheistic a seemingly enigmatic and paradoxical image is found that of the god who worships Various interpretations of this seeming paradox have been advanced Some suggest that it represents sacrifice to a higher deity Proponents of anthropomorphic projection say that the gods are just big people and that images of human religious action are simply projected onto the deities However such explanations do not do justice to the complexity and diversity of this phenomenon In Religion of the Gods Kimberley C Patton uses a comparative approach to take up anew a longstanding challenge in ancient Greek religious iconography why are the Olympian gods depicted on classical pottery making libations The sacrificing gods in ancient Greece are compared to gods who perform rituals in six other religious traditions the Vedic gods the heterodox god Zurvan of early Zoroastrianism the Old Norse god Odin the Christian God and Christ the God of Judaism and Islam's Allah Patton examines the comparative evidence from a cultural and historical perspective uncovering deep structural resonances while also revealing crucial differences Instead of looking for invisible recipients or lost myths

Patton proposes the new category of divine reflexivity Divinely performed ritual is a self reflexive self expressive action that signals the origin of ritual in the divine and not the human realm Above all divine ritual is generative both instigating and inspiring human religious activity The religion practiced by the gods is both like and unlike human religious action Seen from within the religious tradition gods are not big people but other than human Human ritual is directed outward to a divine being but the gods practice ritual on their own behalf Cultic time the symbiotic performance of ritual both in heaven and on earth collapses the distinction between cult and theology each time ritual is performed Offering the first comprehensive study and a new theory of this fascinating phenomenon Religion of the Gods is a significant contribution to the fields of classics and comparative religion Patton shows that the god who performs religious action is not an anomaly but holds a meaningful place in the category of ritual and points to a phenomenologically universal structure within religion itself
