Ophiuchi Hotline:

The Ophiuchi Hotline John Varley, 1977 Gollancz's Science Fiction Collector's series which offers the finest classics of the genre now presents a thought provoking and multiple award nominated novel by acclaimed author John Varley After the effortless capture of Earth by vastly superior aliens humanity is forced to fight for existence on the Moon and other lumps of airless rock The invention of the Hotline a constant stream of data from a star in the constellation Ophiuchus facilitates survival and enables the development of amazing new technologies Then after 400 years humanity's unknown helpers send a bill for their services and suddenly everything is threatened once again **The Ophiuchi Hotline** John Varley, 2003

Following the effortless capture of Earth by vastly superior aliens humanity was left to fight for existence on the Moon and other lumps of airless rock Survival was greatly facilitated by the interception of the Hotline a constant stream of data from the direction of a star in the constellation Ophiuchus which enabled the development of amazing new technologies Four hundred years on and everything is about to change again because humanity's unknown helpers have just sent what appears to be a bill It shouldn't matter to Lilo since she's been caught experimenting with human DNA and sentenced to permanent death for crimes against humanity But she is rescued by the maverick ex president of Luna and finds herself and several illegal clones of herself caught up in a crazy attempt to liberate Earth from the vast inscrutable entities who have conquered it and in the sudden emergency that the enigmatic bill presents to all of human civilization *The Ophiuchi Hotline* John Varley, 1994 YA Science fiction Experiments with human DNA Investigation of the source of data called the Ophiuchi Hotline It is largely from this mysterious information source that mankind has made so much technological progress **Ophiuchi**

Persistence Of Vision John Varley, 1988-11-29 A collection of short stories from the wildest and most original science fictional mind George R R Martin of Hugo and Nebula award winning author John Varley The Persistence of Vision collects nine amazing fiction stories including the Hugo and Nebula award winning title novella that could only come from the mesmerizing imagination of one of science fiction's most renowned and respected writers *All the Wonder that Would Be* Stephen Webb, 2017-05-03 It has been argued that science fiction SF gives a kind of weather forecast not the telling of a

fortune but rather the rough feeling of what the future might be like The intention in this book is to consider some of these bygone forecasts made by SF and to use this as a prism through which to view current developments in science and technology In each of the ten main chapters dealing in turn with antigravity space travel aliens time travel the nature of reality invisibility robots means of transportation augmentation of the human body and last but not least mad scientists common assumptions once made by the SF community about how the future would turn out are compared with our modern understanding of various scientific phenomena and in some cases with the industrial scaling of computational and technological breakthroughs A further intention is to explain how the predictions and expectations of SF were rooted in the scientific orthodoxy of their day and use this to explore how our scientific understanding of various topics has developed over time as well as to demonstrate how the ideas popularized in SF subsequently influenced working scientists Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester Stephen Webb has worked in a variety of universities in the UK He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as well as several popular science books

Technophobia! Daniel Dinello, 2013-08-26 Techno heaven or techno hell If you believe many scientists working in the emerging fields of twenty first century technology the future is blissfully bright Initially human bodies will be perfected through genetic manipulation and the fusion of human and machine later human beings will completely shed the shackles of pain disease and even death as human minds are downloaded into death free robots whereby they can live forever in a heavenly posthuman existence In this techno utopian future humanity will be saved by the godlike power of technology If you believe the authors of science fiction however posthuman evolution marks the beginning of the end of human freedom values and identity Our dark future will be dominated by mad scientists rampaging robots killer clones and uncontrollable viruses In this timely new book Daniel Dinello examines the dramatic conflict between the techno utopia promised by real world scientists and the techno dystopia predicted by science fiction Organized into chapters devoted to robotics bionics artificial intelligence virtual reality biotechnology nanotechnology and other significant scientific advancements this book summarizes the current state of each technology while presenting corresponding reactions

in science fiction Dinello draws on a rich range of material including films television books and computer games and argues that science fiction functions as a valuable corrective to technological domination countering techno hype and reflecting the weaponized religiously rationalized profit fueled motives of such science By imaging a disastrous future of posthuman techno totalitarianism science fiction encourages us to construct ways to contain new technology and asks its audience perhaps the most important question of the twenty first century is technology out of control Irontown Blues John Varley,2018-08-28 From a master of science fiction comes a brand new noir novel set in the Eight Worlds universe where a detective hunts for the biohackers who have created a dangerous new disease Christopher Bach was a policeman in one of the largest Lunar cities when the A I Lunar Central Computer had a breakdown Known as the Big Glitch the problem turned out to be a larger war than anyone expected When order was restored Chris s life could never be the same Now he s a private detective assisted by his genetically altered dog Sherlock and emulates the tough guys in the noir books and movies that he loves When Bach takes the case of a woman involuntarily infected with an engineered virus he is on the hunt to track down the biohackers in the infamous district of Irontown But if he wants to save humanity he ll have to confront his own demons

writings by SF novelists and theorists including Isaac Asimov Arthur C Clarke Brian Aldiss Patrick Parrinder Kim Stanley Robinson John Varley Roger Zelazny William Gibson Fredric Jameson and Samuel R Delaney How to Live Forever Stephen R L Clark, 2008-01-28 Immortality is a subject which has long been explored and imagined by science fiction writers In his intriguing new study Stephen R L Clark argues that the genre of science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy He reveals how fantasy accounts of issues such as resurrection disembodied survival reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth How to Live Forever is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work It includes extensive suggestions for further reading both fictional and philosophical and examines the work of such major science fiction authors as Arthur C Clarke Frank Herbert Larry Niven William Gibson and Colin Wilson **The John Varley Reader** John Varley, 2020-09-22 A landmark collection from the master of science fiction whose short stories are quite literally unforgettable William Gibson These eighteen stories from the acclaimed author of the Gaea Trilogy *The Ophiuchi Hotline* and many other important works span thirty years of his distinguished career In these pages are Hugo Nebula Prix Tour Apollo and James Tiptree Jr Award winners including *The Persistence of Vision* *PRESS ENTER* *The Pusher* and *The Barbie Murders* among other outstanding works of speculative short fiction As a valuable bonus each story includes an autobiographical introduction by the author Praise for John Varley John Varley is the best writer in America Tom Clancy There are few writers whose work I love more than John Varley's purely love Cory Doctorow One of science fiction's most important writers *The Washington Post* Inventive *The New York Times* One of the genre's most accomplished storytellers *Publishers Weekly* **The Politics and Ethics of Identity** Richard Ned Lebow, 2012-08-30 We are multiple fragmented and changing selves who nevertheless believe we have unique and consistent identities What accounts for this illusion Why has the problem of identity become so central in post war scholarship fiction and the media Following Hegel Richard Ned Lebow contends that the defining psychological feature of modernity is the tension between our reflexive and social selves To address this problem Westerners have developed four generic strategies of identity construction that are associated with four distinct political orientations Lebow develops his arguments through comparative analysis of ancient and modern literary philosophical religious and musical texts He asks how we might come to terms with the fragmented and illusionary nature of our identities and explores some political and ethical implications of doing so **Imagining Apocalypse** NA NA, 2016-04-30 This volume brings together essays by specialists in different disciplines on the cultural expression of apocalypse in particular in anglophone science fiction of the nineteenth and twentieth centuries Approaching these works from historical philosophical linguistic and literary perspectives the contributors examine the relationship between secular and spiritual apocalypse connecting the fiction and films to their

historical moment Not surprisingly war recurs throughout this material as a critical turning point fulfilment of prophecy or prelude to a new age In particular the essays explore the issue of whether modern apocalypse is seen as an ending or a beginning considered under its political ethnic and gendered aspects Among the writers covered are H G Wells Olaf Stapledon and such contemporary figures as Michael Moorcock J G Ballard and Storm Constantine **Millennium** John Varley, 1999-10-01 In the skies over Oakland California a DC 10 and a 747 are about to collide But in the far distant future a time travel team is preparing to snatch the passengers leaving prefabricated smoking bodies behind for the rescue teams to find And in Washington D C an air disaster investigator named Smith is about to get a phone call that will change his life and end the world as we know it
