Prentice,2015-08-05 Excerpt from *Ophthalmic Lenses Dioptric Formulae for Combined Cylindrical Lenses The Prism Dioptry and Other Optical Papers With One Hundred and Ten Original Diagrams* In the Treatise on Ophthalmic Lenses an endeavor is made by means of graphic and analytic methods to guide the novice upon a path by which he may easily acquire a knowledge of lenticular refraction without recourse to mathematics The text is therefore confined to the description of a series of diagrams by aid of which the principles involved are presented in their natural order of succession Shortly after publication of the above treatise Dr Burnett of Washington D C kindly suggested the production of plastic models of combined cylindrical lenses by placing an incomplete set of models of his own conception with the author for further elaboration With it came the request if possible also to produce two combinations in which the cylinders were to be united at angles other than right angles As a result of the authors research during the time devoted to the construction of the latter more especially and with a view to establish confidence in the precision of these models a complete mathematical demonstration of the refraction by combined cylindrical lenses was first presented in 1888 The purpose of republishing the Dioptric Formulae in Section II is to present the important results then obtained with as much abridgment of the calculations as permissible While the diagrams have been prepared with great care yet they are somewhat at variance with the laws of true perspective owing to the authors desire to strictly preserve therein all important circles and right angles referred to in the text About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
