**Changes of Regime And Social Dynamics in West Java** Atsushi Ōta, 2006 This volume deals with the sultanate of Banten from the outbreak of the rebellion of 1750 to the launching of the Cultivation System in 1830 After the suppression of the rebellion by the Dutch East India Company VOC local society showed considerable vitality The introduction by the VOC of forced exploitation of the pepper cultivation did not lead to a significant increase in production but enabled the local elites to augment their power In the late 18th century Asian traders many Bugis and Chinese and English country traders integrated Banten and its Sumatran territory Lampung into a vibrant inter regional trading network This trade pattern which involved the exchange of pepper and the maritime and forest products demanded by the China market for opium contributed to the emergence of a new economic order in insular South East Asia This study shows how the society of Banten was in a state of constant transformation in reaction to the Western presence and the shifts of the world economy during the period from 1750 to 1830

Smoke and Ashes Amitav Ghosh, 2024-02-13 Named a Most Anticipated Book of 2024 by Foreign Policy Literary Hub and The Millions Ghosh unravels the impact of the opium trade on global history and in his own family the climax of a yearslong project When Amitav Ghosh began the research for his monumental cycle of novels the Ibis Trilogy he was startled to learn how the lives of the nineteenth century sailors and soldiers he wrote about were dictated not only by the currents of the Indian Ocean but also by the precious commodity carried in enormous quantities on those currents opium Most surprising of all however was the discovery that his own identity and family history were swept up in the story Smoke and Ashes is at once a travelogue a memoir and an essay in history drawing on decades of archival research In it Ghosh traces the transformative effect the opium trade had on Britain India and China as well as the world at large The trade was engineered by the British Empire which exported Indian opium to sell to China to redress their great trade imbalance and its revenues were essential to the empire's financial survival Following the profits further Ghosh finds opium central to the origins of some of the world's biggest corporations of America's most powerful families and prestigious institutions from the Astors and Coolidges to the Ivy League and of contemporary globalism itself Moving deftly between horticultural history the mythologies of capitalism and the social and cultural repercussions of colonialism in Smoke and Ashes Ghosh reveals the role that one small plant has had in making our world now teetering on the edge of catastrophe

*Political Philosophy from an Intercultural Perspective* Bianca Boteva-Richter,Sarhan Dhouib,James Garrison,2021-06-27 The objective of the following collected volume is to encourage a critical reflection on the relationship between power and non power in our contemporary world and proceeding from various philosophical traditions to investigate the multifaceted aspects of this relationship The authors respective investigations proceed from an intercultural perspective and fall predominantly in the domain of political theory and philosophy This volume takes an intercultural political perspective which means on the one hand involving non European philosophies in a global debate about power relations and their effects in the world and on the other hand confronting local traditions of thought with a global inquiry in order to enter into a philosophical political dialogue with these traditions An intercultural approach of this type to political philosophy seeks

not only to join others in reflecting upon global problems but also to decenter of our understanding of the world drawing attention to new ways of thinking Insofar as the authors of the planned volume deal with concrete philosophical political problems unfolding in various regions of the world they seek to shed light on burning issues like migration human rights violations dictatorship and language global poverty power asymmetries experiences of injustice with the further goal of offering a particularly intercultural analysis of these problems along with approaches to resolving them To date there is no book that collects various essays from different countries and perspectives and poses political philosophical problems from an intercultural point of view

**The Political Economy of Narcotics** Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition
