The Politics of Property Rights Stephen Haber, Noel Maurer, Armando Razo, 2003-05-26 This book addresses a puzzle in political economy why is it that political instability does not necessarily translate into economic stagnation or collapse In order to address this puzzle it advances a theory about property rights

systems in many less developed countries In this theory governments do not have to enforce property rights as a public good Instead they may enforce property rights selectively as a private good and share the resulting rents with the group of asset holders who are integrated into the government Focusing on Mexico this book explains how the property rights system was constructed during the Porfirio Diaz dictatorship 1876 1911 and then explores how this property rights system either survived or was reconstructed The result is an analytic economic history of Mexico under both stability and instability and a generalizable framework about the interaction of political and economic institutions

Foreign Direct Investment, Democracy and Development Indra de Soysa, 2003-05-01 The effects of globalization on economy and society are highly contested subjects in academic and political arenas This study brings an empirical perspective to the crucially important arguments that encapsulate the major debates in this area Using quantitative data this book addresses the shape and degree of internationalisation by focussing on *The Political Economy of Economic Growth in Africa, 1960-2000: Volume 1* Benno J. Ndulu, Stephen A. O'Connell, Robert H. Bates, Paul Collier, Chukwuma C. Soludo, 2009-04-30 The period from 1960 to 2000 was one of remarkable growth and transformation in the world economy Why did most of Sub Saharan Africa fail to develop over this period Why did a few small African economies succeed spectacularly The Political Economy of Economic Growth in Africa 1960 2000 is by far the most ambitious and comprehensive assessment of Africa's post independence economic performance to date Volume 1 examines the impact of resource wealth and geographical remoteness on Africa's growth and develops a new dataset of governance regimes covering all of Sub Saharan Africa Separate chapters analyze the dominant patterns of governance observed over the period and their impact on growth the ideological formation of the political elite the roots of political violence and reform and the lessons of the 1960 2000 period for contemporary growth strategy

Sustaining Development and Growth in East Asia Timo Henckel, 2012-11-12 For several decades fast growing East Asia has been the envy of the developing world Not only has East Asia outperformed all other regions of the world but it also recovered surprisingly swiftly from the 1997 98 Asian financial crisis and the 2008 09 global financial crisis Nevertheless investment in the region remains subdued relative to pre Asian crisis levels Are current investment rates too low and given greater investment could the region grow even more rapidly This book brings together a rich array of papers analyzing the determinants of and impediments to investment and growth It discusses a range of issues bearing on investment and development The chapters cover domestic and international economic institutional and political factors including the role of foreign direct investment and the importance of public infrastructure fiscal policy and export oriented growth strategies Trade and trade policy in particular are emphasized with contributions ranging from an analysis of global production networks in electronics manufacturing to the effects and implications of economic integration in the Mekong states The chapters provide a healthy blend of theoretical and empirical analysis and offer a range of useful policy proposals This book will be of interest to policy makers students and scholars of Asian economics and development economics alike

Perspectives on Construction in Developing Countries George Ofori,2012-06-26 Developing countries face the challenge of maintaining economic growth and socio economic development at the core of which sits the construction industry Considerable research on construction in developing countries took place in the 1970 s and 1980 s but little since a gap which this book fills Including contributions from prominent academics and practitioners in Australia China the Netherlands Portugal Singapore South Africa Switzerland and the UK this is a truly international analysis of a subject of global interest The most insightful and relevant of recent research on topics such as Millennium Development Goals the informal construction sector human resource development technology finance and social change are all addressed in the context of the construction industry in the developing world Also considered are other key aspects of construction industry development such as institution building nurturing of contractors and consultants and championing of industry development programmes While the challenge has grown and the needs have become even more pressing the research to date has rarely presented effective solutions Focussing on those aspects of the construction industry most crucial to development this is a much needed up to date study that sheds new light on a variety of concepts and issues This is essential reading for researchers professionals and students interested in the construction industry in developing countries Readers of this book will be interested in its companion volume Contemporary Issues of Construction in Developing Countries *Institutional Efficiency and Its Determinants* Silvio Borner, Frank Bodmer, Markus Kobler, 2004 This publication discusses the impact of institutions on economic development and the determinants that shape institutional quality using a new institutional economics NIE model based on a multidisciplinary approach to understanding issues including growth efficiency and income distribution Using the experience of Argentina under the Menem government as a case study a methodology is developed and applied to test theoretical hypotheses regarding the concept of institutional quality and how delineation between economic and political institutions work in practice It also considers systems of democracy and autocracy and the impact of traditional legal and cultural frameworks on institutional efficiency *Perspectives on Economic Growth* L. A. Finley, 2006 Considering the new possibilities offered by endogenous growth models and the improvement of data information new variables have been

introduced in the analysis of economic growth But in spite of this important effort to develop a wider and more complete perspective of economic growth process other kinds of relations and factors must be included And this is the main goal of this book In the next chapters authors analyse a set of variables or factors that the new perspective of the economic growth must include and the canonical models don t consider The goal is to show that there are not only quantitative but also qualitative variables and factors that are growth enhancing Traditionally for instance literature has studied the effects of income distribution on growth but it does not consider environmental constraints in the process Or it is important to consider the effects of social capital not just physical capital or human capital on the economic growth process The role of the institutions is very important in this area Therefore the authors determine the effects of these variables on economic growth process and show new possibilities to the policy makers in the design of their economic policies

M. Smits,2005 The aim of this book is to discuss the need for a uniform contract law in Europe At present it is debated to what extent uniformity of law is required from the economic perspective The view of the European Commission seems to be that diversity of law stands in the way of a proper functioning of the internal market but this view does not seem to be shared by business in the reactions to the Communication on European Contract Law 2001 it was striking to see that most companies do not consider the present diversity to be a true barrier to trade This book offers five different perspectives on the need for a uniform contract law These perspectives include economics behavioral law and economics psychology and law

Perspectives on the Performance of the Continental Economies Edmund S. Phelps,Hans-Werner Sinn,2011-05-27 Leading economists consider the apparent underperformance of the European economy testing various explanations against data Economists disagree on what ails the economies of continental western Europe which are widely perceived to be underperforming in terms of productivity and other metrics Is it some deficiency in their economic system in economic institutions or cultural attitudes Is it some effect of their welfare systems of social insurance and assistance Or are these systems healthy enough but weighed down by adverse market conditions In this volume leading economists test the various explanations for Europe s economic underperformance against real world data

The chapters written from widely varying perspectives demonstrate the shortcomings and strengths of some methods of economics as much as they do the shortcomings and strengths of some economies of western continental Europe. Some contributors address only income per head or per worker; others look at efficiency and distortions of national choices such as that between labor and leisure; still others look at job satisfaction, fulfillment, and rates of indigenous innovation. Many offer policy recommendations which range from developing institutions that promote entrepreneurship to using early education to increase human capital.
