Politics Of Precaution Genetically Modified Crops In Developing Countries:

The Politics of Precaution Robert L. Paarlberg, 2001-09-06 Genetically modified GM food crops have inspired increasing controversy over the past decade. By the mid 1990s they were widely grown in the U S, Canada and Argentina but precautionary regulations continue to limit their use elsewhere. The restrictive policies of Europe and Japan toward GM crops have been much discussed. Less attention has been paid to the policies affecting the adoption of GM crops in the developing world where their potential impact on the availability and quality of food is even greater. In this book Robert Paarlberg looks at the policy choices regarding GM food made by four important developing countries: Kenya, Brazil, India and China. Of these so far only China has approved the planting of GM crops. Paarlberg identifies five policy areas in which governments of developing countries can either support or discourage GM crops: intellectual property rights, biosafety, trade, food safety and public research and investment. He notes that highly cautious biosafety policies have so far been the key reason that Kenya, Brazil and India have hesitated to plant GM crops. These cautious policies have been strongly reinforced by international market forces and international diplomatic and NGO pressures. China has been less cautious toward GM crops in part because there is less opportunity in China for international organizations or independent critics of GM crops to challenge official policy.

Policies for Genetically Modified Crops in Developing Countries Mara Nielle Bird, 2006 **Food Policy for the Poor** Joachim Von Braun, Rajul Pandya-Lorch, 2005-01-01 *Risk Regulation in Europe* Jale

Tosun, 2012-11-05 The publication aims to familiarize students of public policy with the precautionary principle which plays a vital role in the European Union's approach toward regulating risks. The precautionary principle contends that policy makers should refrain from actions having a suspected risk of causing harm to the public and/or the environment. However, the

precautionary principle only provides guidance to policy makers but does not prescribe specific policy responses Therefore there should be variation in the way the principle is applied Furthermore precautionary measures are in principle of a provisional nature suggesting that they are likely to be subject to changes over time This book is thus interested in shedding light on how the precautionary principle is put into practice and to what extent precautionary measures become modified Empirically it focuses on how the EU has regulated the use of growth hormones in meat production the cultivation of genetically modified corn and the use of Stevia based sweeteners in foods and beverages The main theoretical argument advanced by this study is that the way in which the original regulatory standards were formulated affects whether and how they are changed By placing particular emphasis on the relevance of scientific evidence for the re definition of precautionary measures the book is expected to appeal to both academics and practitioners **GM agricultural technologies for Africa**

Chambers, Judith A.,Zambrano, Patricia,Falck-Zepeda, José Benjamin,Gruère, Guillaume P.,Sengupta, Debdatta,Hokanson, Karen,2014-09-29 The African Development Bank AfDB in commissioning this report to be prepared by the International Food Policy Research Institute IFPRI highlighted the need for a comprehensive evidenced based review of agricultural biotechnology in order to better understand its current status issues constraints and opportunities for Africa Agricultural biotechnology comprises several scientific techniques genetic engineering molecular marker assisted breeding the use of molecular diagnostics and vaccines and tissue cul ture that are used to improve plants animals and microorganisms However in prepar ing this desktop analysis IFPRI has focused on genetic modification GM technologies in particular and on the agricultural context in which they are being applied because GM technologies are at the center of the controversy about biotechnology s role in Africa In addition because we have attempted to focus our review on peer reviewed evidence and documented examples the preponderance of data presented in the report is focused on genetically modified also abbreviated GM crops in use and under development although we recognize the potential of the technology for livestock fisheries and forestry Politics of Intellectual Property European Consortium for Political Research. Governing Agricultural Sustainability Phil Macnaghten, Susana Carro-Ripalda, 2015-06-26 Although GM crops are seen by their advocates as a key component of the future of world agriculture and as part of the solution for world poverty and hunger their uptake has not been smooth nor universal they have been marred by controversy and all too commonly their regulation has been challenged as inadequate even biased This book aims to understand these dynamics examining the impacts of GM crops in diverse contexts and their potentials to contribute to sustainable agricultural futures Part 1 draws on research from three global rising powers Brazil India and Mexico exploring the views of scientists farmers and publics Using a diverse array of ethnographic and qualitative methodologies the book examines the dynamics that have underpinned the controversy in three diverse geo political contexts the manner in which dominant institutional framings have been closely aligned with the interests of powerful elites and the multiple ways in which these have been resisted through local symbolic and material practices Part 2 comprises a series of short comment pieces from 11 leading social and natural scientists responding to the question of how to develop a policy framework for the responsible innovation of sustainable culturally appropriate and socially just agricultural GM technologies This innovative book offers new insights for researchers and postgraduates in Science and technology studies Agro ecology and Environmental Studies Development studies Anthropology Human Geography Sociology Political Science Public Administration Latin American studies and Asian studies

Transatlantic Environment and Energy Politics Stacy D VanDeveer, Mr Henrik Selin, Professor Miranda A Schreurs, 2013-03-28 Environmental and energy policies have become increasingly significant in European and North American politics This fascinating book uses a wide range of case studies that embrace climate change product standards chemical regulations renewable energy policies food safety and genetically modified organisms to examine areas of conflict and cooperation in the transatlantic relationship While there are many areas where the European Union and the United States are following divergent policy paths there are also many signs that a more cooperative transatlantic relationship could emerge in the future Transatlantic Environment and Energy Politics is highly relevant to understanding how the European Union and North America can cooperate more effectively in meeting today's many global environmental and energy policy challenges It is essential reading for all advanced students and scholars

Whatever Happened to Class? Rina Agarwala, Ronald J. Herring, 2018-10-24 Class explains much in the differentiation of life chances and political dynamics in South Asia scholarship from the region contributed much to class analysis Yet class

has lost its previous centrality as a way of understanding the world and how it changes This outcome is puzzling new configurations of global economic forces and policy have widened gaps between classes and across sectors and regions altered people s relations to production and produced new state citizen relations Does market triumphalism or increased salience of identity politics render class irrelevant Has rapid growth in aggregate wealth obviated long standing questions of inequality and poverty Explanations for what happened to class vary from intellectual fads to global transformations of interests The authors ask what is lost in the move away from class and what South Asian experiences tell us about the limits of class analysis Empirical chapters examine formal and informal sector labor social movements against genetic engineering and politics of the new middle class A unifying analytical concern is specifying conditions under which interests of those disadvantaged by class systems are immobilized diffused coopted or autonomously recognized and acted upon politically the problematic transition of classes in themselves to classes for themselves

Handbook on Agriculture, Biotechnology and Development Stuart J. Smyth, Peter W.B. Phillips, David Castle, 2014-03-28 This book is a compendium of knowledge experience and insight on agriculture biotechnology and development Beginning with an account of GM crop adoptions and attitudes towards them the book assesses numerous crucial processes concluding with detail

Genes, Trade, and Regulation Thomas Bernauer, 2016-06-28 Agricultural or green biotechnology is a source of growing tensions in the global trading system particularly between the United States and the European Union Genetically modified food faces an uncertain future The technology behind it might revolutionize food production around the world Or it might follow the example of nuclear energy which declined from a symbol of socioeconomic progress to become one of the most unpopular and uneconomical innovations in history This book provides novel and thought provoking insights into the fundamental policy issues involved in agricultural biotechnology Thomas Bernauer explains global regulatory polarization and trade conflict in this area He then evaluates cooperative and unilateral policy tools for coping with trade tensions Arguing that the tools used thus far have been and will continue to be ineffective he concludes that the risk of a full blown trade conflict is high and may lead to reduced investment and the decline of the technology Bernauer concludes with suggestions for policy reforms to halt this trajectory recommendations that strike a sensible balance between public safety concerns and private economic freedom so that food biotechnology is given a fair chance to prove its environmental health humanitarian and economic benefits This book will equip companies farmers regulators NGOs academics students and the interested public including both advocates and critics of green biotechnology with a deeper understanding of the political economic and societal factors shaping the future of one of the most revolutionary technologies of our times

Aniket Aga, 2021-01-01 How the debate over genetically modified crops in India is transforming science and politics Genetically modified or transgenic crops are controversial across the world Advocates see such crops as crucial to feeding the world s growing population critics oppose them for pushing farmers deeper into ecological and economic distress and for shoring up the power of agribusinesses India leads the world in terms of the intensity of democratic engagement with transgenic crops Anthropologist Aniket Aga excavates the genealogy of conflicts of interest and disputes over truth that

animate the ongoing debate in India around the commercial release of transgenic food crops The debate may well transform agriculture and food irreversibly in a country already witness to widespread agrarian distress and over 300 000 suicides by farmers in the last two decades Aga illustrates how state science and agrarian capitalism interact in novel ways to transform how democracy is lived and understood and sheds light on the dynamics of technological change in populous unequal polities

Posthuman Dialogues in International Relations Erika Cudworth, Stephen Hobden, Emilian Kavalski, 2017-08-10

Posthumanism represents a significant new research direction both for International Relations and the social sciences It emerges from questions about inter species relations which challenge dominant perceptions of what it means to be human Rather than seeing the human species as in nature posthumanist thinking considers the species as of nature The work of posthumanist thinkers has sought to dispute accepted notions of what it means to be human raising profound questions about our relations with the rest of nature The volume commences with an overview of the influence thinkers have had on the development of posthumanist thinking Key ideas in International Relations are interrogated and reconceptualised and specific case studies are presented with a focus on inter species relations The work allows for a consideration of the limits of the posthumanist move and provides space for critics to argue that such an approach opens the discipline up to a biological determinism and that a focus on inter human relations should mark the boundaries of the discipline The essays collected in this volume provide an overview of contributions from posthumanist thinkers with the particular intention of providing a succinct introduction to the area and should appeal to scholars and students in Politics IR and philosophy
