Politics Of Storytelling:

The Politics of Storytelling Michael Jackson, 2002 Hannah Arendt argued that the political is best understood as a power relation between private and public realms and that storytelling is a vital bridge between these realms a site where individualised passions and shared views are contested and recombined In his new book Michael Jackson explores and expands Arendt's ideas through a cross cultural analysis of storytelling that includes Kuranko stories from Sierra Leone Aboriginal stories of the stolen generation stories recounted before the South African Truth and Reconciliation Commission and stories of refugees renegades and war veterans Focusing on the violent and volatile conditions under which stories are and are not told and exploring the various ways in which narrative reworkings of reality enable people to symbolically alter subject object relations Jackson shows how storytelling may restore to the intersubjective fields of self and other self and state self and cosmos the conditions of viable sociality The book concludes in a reflexive vein exploring the interface between public discourse and private experience

The Politics of Storytelling Timothy Edwin Cook, 1982 [The Art of Political Storytelling](#) Philip Seargeant, 2020-05-14 In our post truth world tapping into people's emotions has proved far more effective than rational argument and as Philip Seargeant argues in this illuminating and entertaining book the most powerful tool for manipulating emotions is a gripping narrative From Trump's America to Brexit Britain weaving a good story featuring fearless protagonists challenging quests against seemingly insurmountable odds and soundbite after soundbite of memorable dialogue has been at the heart of political success So does an understanding of the art of storytelling help explain today's successful political movements Can it translate into a blueprint for victory at the ballot box The Art of Political Storytelling looks at how stories are created shared and contested illuminating the pivotal role that persuasive storytelling plays in shaping our understanding of the political world we live in By mastering the tools and tricks of narrative and evaluating the language and rhetorical strategies used to craft and enact them Seargeant explains how and why today's combination of new media populism and partisanship makes storytelling an ever more important part of the persuasive and political process In doing so the book offers an original and compelling way of understanding the chaotic world of today's politics

The Politics of Storytelling Michael Jackson, 2000 **Identity, Narrative and Politics** Maureen Whitebrook, 2014-04-04 Identity Narrative and Politics argues that political theory has barely begun to develop a notion of narrative identity instead the book explores the sophisticated ideas which emerge from novels as alternative expressions of political understanding This title uses a broad international selection of Twentieth Century English language works by writers such as Nadine Gordimer and Thomas Pynchon The book considers each novel as a source of political ideas in terms of content structure form and technique The book assumes no prior knowledge of the literature discussed and will be fascinating reading for students of literature politics and cultural studies

Narrative Politics Frederick W. Mayer, 2014 Narrative Politics explores two puzzles The first has long preoccupied social scientists How do individuals come together to act collectively in their common interest The second is one that has long been ignored by social scientists Why is it that those who promote collective action so often turn to stories Why is it that when activists call for action candidates solicit votes organizers seek new members generals rally their troops or coaches motivate their players there is so much story telling Frederick W Mayer argues that answering these questions requires recognizing the power of story to overcome the main obstacles to collective action to surmount the temptation to free ride to coordinate

group behavior and to arrive at a common understanding of the collective interest In this book Mayer shows that humans are if nothing else a story telling story consuming animal We use stories to make sense of our experience and to imbue it with meaning our self narratives define our sense of identity and script our actions Because we are constituted by narrative we can be moved by the stories told to us by others That is why leaders who call a community to action seek to frame their invocations in a story in which tragedy and triumph hang in the balance in which taking part in the collective action becomes a moral imperative rather than a matter of calculated self interest Drawing on insights from neuroscience and behavioral economics political science and sociology history and cultural studies literature and narrative theory Narrative Politics sheds light on a wide range of political phenomena from social movements to electoral politics to offer lessons for how the power of story fosters collective action

It Was Like a Fever Francesca Polletta, 2009-01-14 Activists and politicians have long recognized the power of a good story to move people to action In early 1960 four black college students sat down at a whites only lunch counter in Greensboro North Carolina and refused to leave Within a month sit ins spread to thirty cities in seven states Student participants told stories of impulsive spontaneous action this despite all the planning that had gone into the sit ins It was like a fever they said Francesca Polletta's It Was Like a Fever sets out to account for the power of storytelling in mobilizing political and social movements Drawing on cases ranging from sixteenth century tax revolts to contemporary debates about the future of the World Trade Center site Polletta argues that stories are politically effective not when they have clear moral messages but when they have complex often ambiguous ones The openness of stories to interpretation has allowed disadvantaged groups in particular to gain a hearing for new needs and to forge surprising political alliances But

disciplines these are seldom deployed seriously and pursued systematically to discover the actual nature of the relationship between performance as a set of behavioural practices and the forms and the transactions of these other disciplines This book investigates the structural similarities and features of politics and performance which are referred to here as grammar a concept which also emphasizes the common communicational base or language of these fields In each of the chapters included in this collection key processes of both politics and performance are identified and analyzed demonstrating the critical and indivisible links between the fields The book also underlines that neither politics nor performance can take place without actors who perform and spectators who receive evaluate and react to these actions At the heart of the project is the ambition to bring about a paradigm change such that politics cannot be analyzed seriously without a sophisticated understanding of its performance All the chapters here display a concrete set of events practices and contexts within which politics and performance are inseparable elements This work will be of great interest to students and scholars in both International Relations and Performance Studies
