Reconceptualizing Sovereignty in the Post-National State: Statehood Attributes in the International Order Flavio G. I. Inocencio, 2014 This book offers a multidisciplinary approach to the study of the concept of sovereignty This book outlines the origins context and evolution of the concept of sovereignty as an essential attribute of the modern territorial State since the Peace of Westphalia in 1648 The book identifies two competing traditions of the concept of sovereignty the tradition inaugurated by Jean Bodin in 1576 in his work *The Six Books of the Commonwealth* and another that started with Johannes Althusius in 1603 considered the father of federal theory in his less known work *Politica* In order to understand the concept of sovereignty it is necessary to understand the constitutional rules of each international system and the fact that the States are the primary polities in the international arena The rise of International Organizations and the increasing institutionalization of the international system challenges this state centric world considering their exercise of sovereign powers Following authors such as Daniel Elazar the book discusses the importance of federalism as political theory which offers a different understanding of the concept of sovereignty The book discusses the European Union as a paradigmatic case of a postmodern confederation which challenges the notion of sovereignty as an absolute and exclusive statehood attribute Furthermore the reconceptualization of sovereignty in International Law should consider the rise of regional and functional legal orders the different understandings of sovereignty offered by the federalist tradition and the processes of deterritorialization and disaggregation of authority The book concludes with the idea that concept of sovereignty in International Law should be seen as a flexible concept which is not an exclusive attribute of the modern

territorial state This book is required reading for all interested in the history and the evolution of the concept of sovereignty

International Studies Scott Straus, Barry Driscoll, 2018-09-10 The challenge of teaching international studies is to help you think coherently about the multiple causes and effects of global problems In *International Studies Global Forces Interactions and Tensions* award winning scholars Scott Straus and Barry Driscoll give you a clear framework that pinpoints how key factors forces interactions and tensions contribute to world events with both global and local consequences The authors first show you how to look for common patterns in global issues by introducing four world shaping forces global markets shifting centers of power information and communications technologies and global governance They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges The framework enables you to ask and answer for yourself Who is interacting Where did such interactions develop What policies or institutions govern them Why are they getting certain global and local reactions You are then apply the framework to the global problems that matter most to you human rights abuses economic inequality terrorism forced migration pandemics and global health responses climate change food security and more *International Studies* raises the bar for the Introduction to IS course moving beyond interdisciplinary and into the realm of critical analysis to increase student relevancy and motivation **The U.S. Army War College Guide to National Security Issues**, 2010 Postcolonial

International Economic Law in the 21st Century Ernst-Ulrich Petersmann, 2012-07-24 The state centred Westphalian model of international law has failed to protect human rights and other international public goods effectively Most international trade financial and environmental agreements do not even refer to human rights consumer welfare democratic citizen participation and transnational rule of law for the benefit of citizens This book argues that these multilevel governance failures are largely due to inadequate regulation of the collective action problems in the supply of international public goods such as inadequate legal judicial and democratic accountability of governments vis a vis citizens Rather than treating citizens as mere objects of intergovernmental economic and environmental regulation and leaving multilevel governance of international public goods to discretionary foreign policy human rights and constitutional democracy call for civilizing and constitutionalizing international economic and environmental cooperation by stronger legal and judicial protection of citizens and their constitutional rights in international economic law Moreover intergovernmental regulation of

transnational cooperation among citizens must be justified by principles of justice and multilevel constitutional restraints protecting rights of citizens and their public reason The reality of constitutional pluralism requires respecting legitimately diverse conceptions of human rights and democratic constitutionalism The obvious failures in the governance of interrelated trading financial and environmental systems must be restrained by cosmopolitan constitutional conceptions of international law protecting the transnational rule of law and participatory democracy for the benefit of citizens Contingent States

William A. Callahan, 2004 In the 1990s Greater China became the subject of debate as the site of either the danger of the China threat or the promise of Confucian capitalism William A Callahan argues that Greater China presents challenges not only to economic and political order but also to international relations theory In fact Greater China though absent from geopolitical maps and international law is very much present in economic and cultural exchange and exemplifies the contingent state of international politics Callahan deconstructs the mainstream geopolitical and political economic understandings of Greater China tracing its emergence through an ethnographic analysis of four political problems in East Asia the South China Sea disputes Sino Korean relations the return of Hong Kong and cross straits relations Callahan shows how bureaucrats outlaws tycoons academics workers politicians and hooligans alike produce Greater China through networks of relations in local national regional global and transnational space Finally *Contingent States* reveals how each of the problems provoked theoretical innovations that depart from standard conceptions of sovereignty democracy and the nation state William A Callahan is senior lecturer of international politics and deputy director of the Center for Contemporary Chinese Studies at the University of Durham England and the author of *Imagining Democracy Reading The Events of May in Thailand and Pollwatching Elections and Civil Society in Southeast Asia* *Security Studies* Paul D.
