Politische Schriften Kommentierte Werkausgabe:

The Politics of Crowds Christian Borch, 2012-04-12 When sociology emerged as a discipline in the late nineteenth century the problem of crowds constituted one of its key concerns. It was argued that crowds shook the foundations of society and led individuals into all sorts of irrational behaviour. Yet crowds were not just something to be fought in the street; they also formed a battleground over how sociology should be demarcated from related disciplines, most notably psychology. In *The Politics of Crowds*, Christian Borch traces sociological debates on crowds and masses from the birth of sociology until today, with a particular focus on the developments in France, Germany and the USA. The book is a refreshing alternative history of sociology and modern society observed through society's other: the crowd. Borch shows that the problem of crowds is not just of historical interest; even today the politics of sociology is intertwined with the politics of crowds. *Denkbilder*-- Hermann Rasche, Christiane Schönfeld, 2004

The Marrano Way Agata Bielik-Robson, 2022-05-09 The Marrano phenomenon is a still unexplored element of Western culture: the presence of the borderline Jewish identity which avoids clear-cut cultural and religious attribution and precisely as such prefigures the advent of the typically modern free oscillating subjectivity. Yet the aim of the book is not a historical study of the Marranos or conversos who were forced to convert to Christianity but were suspected of retaining their Judaism undercover. The book rather applies the Marrano metaphor to explore the fruitful area of mixture and cross-over which allowed modern thinkers, writers and artists of the Jewish origin to enter the realm of universal communication without at the same time making them relinquish their Jewishness which they subsequently developed as a hidden tradition. The book poses and then attempts to prove the Marrano hypothesis according to which modern subjectivity derives to paraphrase Cohen out of the sources of the hidden Judaism: modernity begins not with the Cartesian abstract ego but with the rich self-reflexive self of Michel de Montaigne who wrestled with his own marranismo in a manner that soon became paradigmatic to other Jewish thinkers entering the scene of Western modernity from Spinoza to Derrida. The essays in the volume offer thus a new view of a Marrano modernity which aims to radically transform our approach to the genesis of the modern subject and shed a new light on its secret religious life as surviving the process of secularization although merely in the form of secret traces.

Possessed Stefan Andriopoulos, 2008-09-15 Silent cinema and contemporaneous literature explored themes of mesmerism, possession and the ominous agency of corporate bodies that subsumed individual identities. At the same time critics accused film itself of exerting a hypnotic influence over spellbound audiences. Stefan Andriopoulos shows that all this anxiety over being governed by an outside force was no marginal oddity but rather a pervasive concern in the late nineteenth and early twentieth centuries. Tracing this preoccupation through the period's films as well as its legal, medical and literary texts, Andriopoulos pays particular attention to the terrifying notion of murder committed against one's will. He returns us to a time when medical researchers described the hypnotized subject as a medium who could be compelled to carry out violent crimes and when films like *The Cabinet of Dr. Caligari* and *Dr. Mabuse the Gambler* famously portrayed

the hypnotist's seemingly unlimited power on the movie screen Juxtaposing these medicolegal and cinematic scenarios with modernist fiction Andriopoulos also develops an innovative reading of Kafka's novels which center on the merging of human and corporate bodies Blending theoretical sophistication with scrupulous archival research and insightful film analysis Possessed adds a new dimension to our understanding of today's anxieties about the onslaught of visual media and the expanding reach of vast corporations that seem to absorb our own identities

The Invention of Politics in the European Avant-Garde (1906-1940), 2016-08-01 In 1906 for the first time in his life F T Marinetti connected the term avant garde with the idea of the future thus paving the way for what is now commonly called the modernist or historical avant garde Since 1906 the ties between the early twentieth century European aesthetic vanguard and politics have been a matter of debate With a century gone by *The Invention of Politics in the European Avant Garde* takes stock of this debate Opening with a critical introduction to the vast research archive on the subject this book proposes to view the avant garde as a political force in its own right that may have produced solutions to problems irresolvable within its democratic political constellation In a series of essays that combine close readings of texts and plastic works with a thorough knowledge of their political context the book looks at avant garde works as media producing political thought and experience Covering the canonised avant garde movements of Futurism Expressionism Dadaism and Surrealism but also focussing on the avant garde in Europe's geographical outskirts this book will appeal to all those interested in the modernist avant garde

Crowds and Democracy Stefan Jonsson, 2013-10-08 Between 1918 and 1933 the masses became a decisive preoccupation of European culture fueling modernist movements in art literature architecture theater and cinema as well as the rise of communism fascism and experiments in radical democracy Spanning aesthetics cultural studies intellectual history and political theory this volume unpacks the significance of the shadow agent known as the mass during a critical period in European history It follows its evolution into the preferred conceptual tool for social scientists the ideal slogan for politicians and the chosen image for artists and writers trying to capture a society in flux and a people in upheaval This volume is the second installment in Stefan Jonsson's epic study of the crowd and the mass in modern Europe building on his work in *A Brief History of the Masses* which focused on monumental artworks produced in 1789 1889 and 1989
