Protecting Biodiversity National Laws Regulating Access To Genetic Resources In The Americas:

Protecting Biodiversity International Development Research Centre (Canada),2000 Within the countries of South and North America are found some of the most diverse collections of flora and fauna in the world Colombia alone carries over 50 thousand different plant species This precious resource however is quickly dwindling Pharmaceutical and biotechnology companies are tapping America s genetic resources at an ever increasing rate and habitat destruction has pushed many species to extinction or to the brink of extinction Protecting Biodiversity addresses one of the most fundamental aspects of this important issue the lack of adequate national laws regulating access to and compensation for the use of local genetic resources This book is the first to compare such laws and policies across a range of countries in both the industrialized and developing worlds including Argentina Canada Colombia Costa Rica Paraguay Peru and the United States It also presents legal viewpoints conclusions and solid recommendations for future action Protecting Biodiversity is the newest reference book in the rapidly emerging legal field that combines environmental intellectual property contract and administrative law

Accessing Biodiversity and Sharing the Benefits Santiago Carrizosa,2004 The book aims to address the lack of information on the experiences of others by providing a comparative analysis of national access and benefit sharing laws and policies in the 41 Pacific Rim countries that signed the CBD It provides key insights on the main characteristics of selected access and benefit sharing ABS policies and laws their development and implementation process It contains a detailed comparative analysis of existing laws and policies It presents four case studies of countries with regulations in place and contrasts them with four case studies of countries that are struggling to develop their regulations It ends by discussing options of an international regime on ABS and a summary analysis of the main lessons and recommendations from the study

African Perspectives on Genetic Resources Kent Nnadozie,2003 **Latin America and the Caribbean Regional Synthesis for The State of the World's Biodiversity for Food and Agriculture** Food and Agriculture Organization of the United Nations,2019-12-04 The Latin America and the Caribbean Regional Synthesis for The State of the World s Biodiversity for Food and Agriculture summarizes the state of biodiversity for food and agriculture in the region based largely on information provided in fourteen country reports submitted to FAO as part of the reporting process for the report on The State of the World s Biodiversity for Food and Agriculture Biodiversity for food and agriculture is the diversity of plants animals and micro organisms at genetic species and ecosystem levels present in and around crop livestock forest and aquatic production systems It is essential to the structure functions and processes of these systems to livelihoods and food security and to the supply of a wide range of ecosystem services It has been managed or influenced by farmers livestock keepers forest dwellers fish farmers and fisherfolk for hundreds of generations The report was originally prepared as supporting documentation for an informal regional consultation on the state of Latin America and the Caribbean s biodiversity for food

and agriculture held in Panama City Panama 8 to 10 March 2016 It was later revised based on feedback received from the participants of the informal consultation and on an additional country report It also discusses the state of efforts to promote the sustainable use and conservation of biodiversity for food and agriculture in the region including through the development of supporting policies legal frameworks institutions and capacities The Custodians of Biodiversity Manuel Ruiz,Ronnie Vernooy,2012-03-15 Globally local and indigenous approaches to conserving biodiversity crop improvement and managing precious natural resources are under threat Many communities have to deal with biopiracy for example As well existing laws are usually unsuitable for protecting indigenous and traditional knowledge and for recognizing collective rights such as in cases of participatory plant breeding where farmers researchers and others join forces to improve existing crop varieties or develop new ones based on shared knowledge and resources This book addresses these issues It outlines the national and international policy processes that are currently underway to protect local genetic resources and related traditional knowledge and the challenges these initiatives have faced In particular these themes are addressed within the context of the Convention of Biological Diversity and the International Treaty on Plant Genetic Resources for Food and Agriculture The authors broaden the policy and legal debates beyond the sphere of policy experts to include the knowledge holders themselves These are the custodians of biodiversity farmers herders and fishers in local communities Their experience in sharing access and benefits to genetic resources is shown to be crucial for the development of effective national and international agreements The book presents and analyzes this experience including case studies from China Cuba Honduras Jordan Nepal Peru and Syria Copublished with the International Development Research Centre IDRC **IUCN**

Environmental Policy and Law Paper ,1972 *Biological Diversity* L. N. Petrov,2003 One of the cornerstones of life s wonders is the vast array of species filling the planet From plants to animals to humans there is no shortage of beings to provide spice of life variety is said to be Periodically scientists announce the discovery of a new form of life so it seems as if Earth is capable of producing new species just to keep us on our toes At times the immense breadth of living things can even feel overwhelming as one pauses to ponder how numerically insignificant humans are when compared to the insect population Given the biological diversity of the planet it is incumbent upon humans to safeguard the natural beauty of the environment To that end conservation takes on special importance necessitating the balancing of industrial expansion with preserving the flora and fauna surrounding us This book is an important tool in understanding and researching the many different life forms spanning the globe Collected here is a substantial and carefully selected listing of relevant literature on biological diversity and its conservation Following this bibliography are author title and subject indexes to allow for further access to this information The sheer bulk of the works about biological diversity can be so intimidating that a book such as this one becomes useful in sorting through the resources about the importance of life s variety Protecting the Biodiversity of the Americas Karen L. on International Environmental Law ,2006 It is widely recognized that most environmental problems challenges and solutions are transboundary regional or global in scope The environment is an area where states and stakeholders are cooperating extensively and progressively This manual seeks to provide a comprehensive overview of the current body of environmental law Publisher s description *Protecting and Promoting Traditional Knowledge* Sophia Twarog,Promila Kapoor,2004 Consists of papers presented at a conference on traditional knowledge in 2000 *Case Studies on Access and Benefit-sharing* , **CAFTA-DR, European Free Trade Agreements and the Industrial Property System in Central America** Fabian Böttger,2025-06-19 This book analyses the impact of CAFTA DR and European Free Trade Agreements on the industrial property system in Central America While there is ample literature on bilateral and regional FTAs it is often limited to the contractual obligations assumed by the participating countries This book goes a step further and analyses how these obligations are implemented through national legislation institutional changes and legal practice To provide a deeper understanding of the effects of FTAs on national IP systems the book addresses research questions that go beyond general publications on the topic Research questions include Is the combination of market access and IP rules in a bilateral FTA an effective and appropriate trade deal How are the IP requirements under the FTAs implemented into the national statutory framework Do the IP rules of FTAs sufficiently address institutional factors necessary for an effective IP system Do they provide for an appropriate balance between minimum protection and flexibilities and support relevant IP policy objectives The book covers the CAFTA DR member states Costa Rica the Dominican Republic El Salvador Guatemala Honduras and Nicaragua reviewing the implementation of FTA obligations regarding patents plant varieties test data trademarks geographical indications designs genetic resources and traditional knowledge enforcement and other areas By looking at several countries a broad range of IP rights and the practical implementation of FTA obligations this book provides a broad range of information and insights *Impact study of the adoption and implementation of the Nagoya protocol on the brazilian industry* Confederação Nacional da Indústria,2014-08-06 Este estudo identifica e analisa os potenciais impactos positivos e negativos da implementa o do Protocolo de Nagoya com foco na competitividade das ind strias brasileiras que utilizam a gen tica patrim nio de biodiversidade encontrada no Brasil e em outros pa ses **The Environmental Divide** R. C. Das,1998 **Intellectual Property, Public Policy and International Trade** Inge Govaere,Hanns Ullrich,2007 The rising importance and continuous expansion of intellectual property protection quite naturally goes together with increasing concern about the legal and political foundations of such enhanced protection Nowhere does the basic equation which underlies intellectual property namely that the pursuit of short term private interest by the holders of such property will satisfy the public interest in the long term become both more visible but also questionable than at the crossroads between the grant and enforcement of exclusive rights with international trade Catchphrases such as patent protection and access to essential medicines or access to genetic resources benefit sharing and economic development stand for fundamental tensions

and conflicts between private property and the public interest This book presents the contributions that have been made on these and related topics by a group of internationally renowned experts at a workshop held at the College of Europe Bruges
