Australia's Fossil Heritage, The Australian Heritage Council, 2012-07-18 The National Heritage List was created in January 2004 to recognise celebrate and protect places of outstanding heritage value to the nation National heritage encompasses those places that reveal the richness of Australia's extraordinarily diverse natural historic and Indigenous heritage One aspect of natural heritage that has been little explored is Australia's wealth of exceptional fossil sites While a small number of fossil sites have risen to public prominence there are many lesser known sites that have important heritage values The Australian Heritage Council engaged palaeontologists from state museums and the Northern Territory Museum and Art Gallery to compile lists of outstanding fossil sites and to document their characteristics and relative importance against a range of categories with a view to further our understanding about Australia's important fossil heritage Sites that were listed for National or World Heritage values were not included in the places for consideration with the focus being on lesser known but still important sites This book is an account of the palaeontologists findings Some of the sites that were included in the initial lists have since been recognised through listing on the National Heritage List or the World Heritage List Australia's Fossil Heritage provides a useful reference to the outstanding fossil sites it catalogues and gives a clearer understanding of the heritage values of such sites More generally it contributes to a greater appreciation of Australia's geological and fossil diversity and enables readers to learn more about Australia's prehistory ... Australia's response to climate change must truly baffle outsiders Why do our leaders pretend that they are leading the world in the battle against global warming When do environmental risks outweigh economic benefits Why dig deeper when the rest of the world is looking for alternatives to coal This is an essay about quarry vision the belief that Australia's greatest asset is its mineral and energy resources coal above all How has this distorted our national politics and stymied action on climate change In this powerful essay about the national interest Guy Pearse dissects the Rudd government's climate change

response from the Garnaut report to the silver bullet of clean coal and beyond He exposes the shadowy world of the carbon lobbyists how they think operate and advance their agenda He discusses the future of the coal industry and challenges the economic orthodoxy Quarry vision he argues is a trap and a blind faith we can no longer afford A generation ago our leaders showed courage and vision in pushing for unilateral trade liberalisation they knew it was good for Australia no matter how fast others acted They were right to turn Australia s economy outward and the establishment they challenged was wrong Today the generation that was right on trade liberalisation has much of it wrong on climate change They now wear the establishment mantle and it is their turn to be challenged Guy Pearse Quarry Vision *Bulletin - Geological Survey of South Australia* Geological Survey of South Australia,1919 A Review of Mining Operations in the State of South Australia During the Half Year Ended ... ,1915 **Australian Master Tax Guide 2012** CCH Australia Staff,2012 *Proceedings of the Parliament of South Australia* South Australia.
