Raising A Ladder To The Moon The Complexities Of Corporate Social And Environmental Responsibility:

Raising a Ladder to the Moon M. McIntosh, 2003-06-03 Raising a ladder to the moon is a metaphor that was used to describe the immensity of the task of laying the first trans Atlantic telegraph cable at the end of the nineteenth century It is used in this book to illuminate the challenges and opportunities that are inherent in the development of corporations as socially and environmentally responsible citizens at the beginning of the twenty first century With reference to companies such as Macdonald s Deutsche Bank Coca Cola Royal Dutch Shell BP Wal Mart and Unilever Raising a Ladder to the Moon argues that in order to re engage with the world and solve some of the problems created by globalisation we must re see it We must now see it in the light of its complexities We have succeeded in creating social systems that create and destroy that bind us together in common purpose and that set us against each other Our corporations stand as monuments to our success at building social structures but they are neither people nor machines They are alive They are complex adaptive systems that can take on a life of their own We need to embrace that complexity *Strategic Corporate Social Responsibility* William B. Werther, David Chandler, 2006 Strategic Corporate Social Responsibility Stakeholders in a Global Environment provides faculty and students with a comprehensive stand alone text to support traditional and innovative courses in corporate social responsibility CSR Integral to the book s unique format is the real life mini case study approach across the spectrum of CSR topics backed by Internet accessible references Adopting a stakeholder approach to CSR the content and format of this sourcebook defines CSR within the global communications environment in which multi national corporations operate today

Learning To Talk Malcolm McIntosh, Sandra

Waddock, Georg Kell, 2017-09-29 The UN Global Compact complements other corporate citizenship initiatives by promoting dialogue on the relationship between business and society At the same time it is the only truly global corporate citizenship initiative It is not an auditable standard indeed it is not a standard or a code in the way that these are normally viewed It is a set of principles through which business and the United Nations can work in partnership for global social development For some businesses it is a simplified codification of their existing policies and management practices but for many engagement represents a challenge and an opportunity to raise their game by aligning profitability with the common good As the only genuinely global corporate citizenship initiative the Global Compact draws its moral authority from the UN Secretary General and its moral and political legitimacy from the UN as the only global political body It can be viewed as a series of nested networks involving the Secretary General's Office the ILO UNEP UNHCHR UNDP and UNIDO business NGOs and labour It can variously be described as an international learning network as a social network of people and organizations engaged in a global conversation as a global public policy network and as a multi stakeholder dialogue It is all of these things but more than anything its greatest success has been in providing a convening platform for a growing global conversation about social development among a variety of actors However the Global Compact is viewed it is time to reflect on the first tentative steps of an initiative born in the aftermath of the Cold War in the triumph of global economic liberalism and mass demonstrations against globalisation In its first few years the world has experienced 9 11 and the Iraq War not forgetting the forty or so civil wars that are ongoing at this time Whatever is written about the UN Global Compact or its success will be tentative But there can be some serious reflection on its aims and origins some telling of stories of engagement and discussion on how this initiative has quickly become an important reference point in the dialogue on global and corporate governance

Sustainable Development in Africa Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non formal education Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries Due to their complexity the interrelations between social economic and political factors related to sustainable development especially at universities need to be better understood There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges It is against this background that this book has been produced It is a truly interdisciplinary publication useful to scholars social movements practitioners and members of governmental agencies and private companies undertaking research and or executing projects focusing on sustainability from across Africa As African nations strive to pursue the UN Sustainable Development Goals it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on going and future efforts The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion administration environment languages and media studies

Thinking the Twenty-First Century Malcolm McIntosh, 2017-09-08 In a sophisticated and far reaching blend of theory and reflection Thinking the Twenty First Century takes a provocative look at the changes required to build a new global political economy McIntosh charts five system changes essential to this transition globality and Earth awareness the rebalancing of science and awe peacefulness and the feminization of decision making the re organization of our institutions and evolution adaptation and learning That they are all connected should be obvious but that they are written about together is less common McIntosh argues that these five changes are already under way and need to be accelerated Combining science philosophy politics and economics Thinking the Twenty First Century questions our current model of capitalism and calls for a much needed new order This forceful call to action advocates a balanced political economy with transdisciplinarity connectivity accountability and transparency at its centre as an alternative to a world built on the failing system of neoliberal economics From one of the pioneers of the global corporate sustainability and social responsibility movement this unique book combines analysis diary and reflection to present a radical way forward for the twenty first century

Transparency in a New Global Order Christina Garsten, Monica Lindh De Montoya, 2008-01-01 This book argues that transparency is a concept that has gained increasing currency and favour as an organizing principle and administrative goal in recent years Calls for transparency have been directed towards states markets corporations and national political processes as well as towards large institutions such as the European Union Focusing on empirically rich case studies the contributors explore the ideas and practices of transparency in different contexts encouraging a discussion of the many facets of the term and its strengths ambiguities and

limitations They aim to shed light on the powerful global discourse and practices contained in the concept and to fill a gap in the literature since few attempts have until now been made to examine the actual content and practice of transparency Also discussed are the complex negotiations through which it is determined what should be displayed and what should remain hidden the uses of power and control and the processes through which transparency is or is not achieved This analysis of the concepts models and metaphors that guide and shape organizational social and aesthetical practices today will provide a much needed contribution to the literature for academics researchers and students focusing on these areas
