The International Organization of Credit Randall D. Germain, 1997-10-13 In this book Randall Germain explores the international organization of credit in a changing world economy At the centre of his analysis is the construction of successive international organisations of credit built around principal financial centres PFCs and constituted by overlapping networks of credit institutions mainly investment commercial and central banks A critical historical approach to international political economy IPE allows Germain to stress both the multiple roles of finance within the world economy and the centrality of financial practices and networks for the construction of monetary order He argues that the private global credit system which replaced Bretton Woods is anchored unevenly across the world s three principal financial centres New York London and Tokyo This balance of power is irrevocably fragmented with respect to relations between states and highly ambiguous in terms of how power is exercised between public authorities and private financial institutions
