Ranking Wishes:

Ranking the Wishes Carl Dennis, 1997-06-01 In his seventh book Carl Dennis explores the ways in which our wishes those in our power to fulfill at any moment and those that have no chance of ever being realized define who we are While some of the poems view wishing as a failure to do justice to the world we have others regard it as a recognition that no present however rich can satisfy the imagination and suggest that one of the functions of poetry is to keep significant wishes alive In showing with moving clarity how wishes are essential to giving shape and direction to the moment these poems make use of a rich variety of genres elegy advice meditation warning consolation and prophecy

Philosophy of Happiness Martin Janello, 2014-10-23 Happiness We spend our life and all our efforts in its pursuit Yet do we really know what it is and how it occurs Are we secure in how to achieve and maintain it Are we certain that we are maximizing our potential to obtain it Our answers to these questions may not be as firm as we would like them to be The principles and strategies we produce or receive from others may not provide the happiness they promise or we desire We may be able to blame interference or seemingly unchangeable circumstances as causes for this shortfall But we may also sense that our lack of insight arrests our happiness at levels short of its potential We are searching often not even knowing what we are looking for This book investigates in a thorough manner what happiness is and how we might achieve happiness It is written as a theoretical and practical guide that does not require prior philosophical training Striving to cover all facets of human pursuits of happiness its philosophical considerations include topics of law economics political science sociology history anthropology psychology biology and physics Its inclusive examination reveals happiness as an intensely individual phenomenon as well as a systematic force that shapes human destiny and matters beyond up to a cosmic scale The book illuminates these subjective and objective functions of happiness Its insights about the nature of happiness may help us to understand the general subject matters of our search as well as the general terrain and rules by which we must abide in our pursuit of happiness However it does not presume to know what specific objectives and pursuits will make us happy Rather it develops describes and encourages us to discover tools to find understand and define our personal happiness and to pursue the implementation of this vision with optimized preparedness Its objective is not to indoctrinate but to empower us The book proposes that humans are generally endowed with all internal constituents and mechanisms to develop their happiness to its fullest possible extent Unless our faculties are pathologically impeded we might only have to become aware of these inherent forces to actuate them Improving our happiness seems to be a function of comprehensively revealing our concept of happiness and permitting it to take its natural place The mission of the book is to assist in this process Finding what makes us happy requires that we achieve knowledge of who we are and of what we want It requires us to be mindful of our wishes our needs our personality Once we understand our motivations we must arrange and implement them to their best effect in relation to one another our capacities other humans and our nonhuman environment The book supports us in gaining these insights and in the resulting

tasks The book further examines how much happiness we can expect to obtain even under the best circumstances It describes external and internal constraints that threaten our achievements But it also shows perspectives that may enable us to conquer limitations Thus we may not only gain clarity about our happiness but also confidence in its pursuit Visit the book website with the same name to learn more

Ethics for Rational Animals brings to light a novel account of akrasia practical wisdom and character virtue through an original and comprehensive study of the moral psychology at the basis of Aristotle's ethics It argues that practical wisdom is a persuasive rational excellence that virtue is a listening excellence and that the ignorance involved in akrasia is in fact a failure of persuasion Aristotle's moral psychology emerges from this reconstruction as a qualified intellectualism The view is intellectualistic because it describes practical wisdom as the sort of knowledge that can govern desire and action and akrasia as involving a form of ignorance However Aristotle's intellectualism is qualified because practical wisdom goes beyond grasping the truth about the human good for it must also be able to convey the truth persuasively to non rational cognition and desires Through a study of Aristotle's works on ethics psychology and biology Elena Cagnoli Fieconi shows that there are unexplored ways in which rational and non rational cognition and desire cooperate and influence one another These include attention the capacity of the rational part of the soul to manipulate the non rational part of the soul and the capacity to exercise phantasia for speculation creativity and research She argues that despite being integrated with non rational cognition and desire rational cognition of value struggles to control human behaviour and motivation More specifically she defends the key thesis that grasping the truth about the human good is not sufficient for humans to regulate action and desire Therefore practical wisdom does not merely grasp the truth about the human good but it controls action and desire because it conveys the truth effectively to the non rational part of the soul Conversely akrasia does not merely involve a lack of epistemic access to the truth about the human good but a failure to persuade the non rational part of the soul about it This study of practical wisdom and akrasia also sheds light on character virtue which emerges as a practical excellence whose
