Automation: The Future of Weed Control in Cropping Systems Stephen L. Young,Francis J. Pierce,2013-11-21 Technology is rapidly advancing in all areas of society including agriculture In both conventional and organic systems there is a need to apply technology beyond our current approach to improve the efficiency and economics of management Weeds in particular have been part of cropping systems for centuries often being ranked as the number one production cost Now public demand for a sustainably grown product has created economic incentives for producers to improve their practices yet the development of advanced weed control tools beyond biotech has lagged behind An opportunity has been created for

engineers and weed scientists to pool their knowledge and work together to fill the gap in managing weeds in crops Never before has there been such pressure to produce more with less in order to sustain our economies and environments This book is the first to provide a radically new approach to weed management that could change cropping systems both now and in the future **CONTROL SYSTEMS, ROBOTICS AND AUTOMATION – Volume IV** Heinz Unbehauen,2009-10-11 This Encyclopedia of Control Systems Robotics and Automation is a component of the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias This 22 volume set contains 240 chapters each of size 5000 30000 words with perspectives applications and extensive illustrations It is the only publication of its kind carrying state of the art knowledge in the fields of Control Systems Robotics and Automation and is aimed by virtue of the several applications at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs *Proceedings of International Conference on Intelligent Manufacturing and Automation* Hari Vasudevan,Vijaya Kumar N.
