Rare Breed:

A Rare Breeds Album of American Livestock Carolyn Christman, Dan Phillip Sponenberg, Donald E. Bixby, 1997
Seventy breeds of livestock in America are rare. What would happen if these breeds of asses, cattle, goats, horses, pigs, and sheep were to become extinct? Agriculture will have lost the genetic resources necessary to adapt to changes in the environment and human needs. A link in the Earth's biodiversity will have been broken. And people in the future will be deprived of the flash of a Spanish Mustang in the misty morning, the rich palette of colors in a flock of Navajo Churro sheep, and the gentle lowing of a Cracker cow to her newborn calf. If rare breeds are lost, the animal kingdom and the human experience will be diminished forever. This book shows what is at stake: the breed diversity that is our natural heritage and cultural inheritance. Learn how rare breeds are being protected and how you can become a part of this unique conservation effort.

Cattle Breeds of the World Marleen Felius, 2024-12-02
The origin and evolution of cattle breeds was long explained only by historical sources with questionable reliability. In recent years, genetic and molecular data have become available that shed new light on this, revealing how from Neolithic times breeds emerged by migratory movements and mutual influencing of gene pools. But while molecular breed characterization is now rapidly advancing, phenotypic characterization remains underexplored. This publication presents a classification of around 1,000 cattle breeds based on geographical and historical data and morphology. Males and females of every breed are portrayed by the author in water colour and to scale. The illustrations are positioned next to each breed's description, completing the overall image.

An Introduction to Heritage Breeds D. Phillip Sponenberg, Jeannette Beranger, Alison Martin, 2014-01-01
This interesting visual resource, written by three experts from the Livestock Conservancy, explains why conserving heritage breeds is important and shows readers how they can successfully raise and benefit from these breeds.

Bourbon Justice Brian F. Haara, 2021-07
Brian Haara recounts the development of commercial laws that guided the United States from an often reckless laissez-faire mentality through the growing pains of industrialization, past the overcorrection of Prohibition, and into its final state as a nation of laws.

Breeding Better Dogs Julie T. Cecere, D. Phillip Sponenberg, 2023-11-07
Breeding Better Dogs: Genetics and Reproduction delves into the biology of managing reproduction in dogs, from mating to whelping and the first few weeks of life. It also delves into the genetic management of dog breeds and selection procedures to aid breeders in producing sound, useful dogs. The book includes details of managing the genetic structure of breeds and genetic management of individual breeding programs, details of managing dogs that are used for breeding, details of mating dogs, managing pregnancies, and whelping. This book is an excellent resource for dog breeders, providing an accessible approach to a complex subject. Breeding Better Dogs breaks down into digestible chunks, the essential information for understanding the subject at a broad level.

International Encyclopedia of Horse Breeds Bonnie L. Hendricks, 2007
A standard reference on horse breeds, illustrated and updated. Celebrating the animal that has been a stalwart servant to humankind for countless generations.

Bonnie Hendricks's International Encyclopedia of Horse Breeds is the most thorough compilation of horse breeds ever attempted. The nearly four hundred entries arranged alphabetically include foundation breeds now extinct as well as extant breeds from across the globe. Each entry details the breed's origin and background, size, appearance, chief use, and status: rare versus common. A list of breed associations and government departments that supplied data and photographs for the encyclopedia has been fully updated for this edition. With its breadth and depth of coverage as well as 530 black and white and 32 color illustrations, the encyclopedia continues to be a standard international reference. *Motion Picture Herald*, 1966

Mason's World Encyclopedia of Livestock Breeds and Breeding, 2 Volume Pack Valerie Porter, Lawrence Alderson, Stephen J.G. Hall, D. Phillip Sponenberg, 2016-03-09. Mason's World Encyclopedia of Livestock Breeds and Breeding describes breeds of livestock worldwide as well as a range of breed-related subjects such as husbandry, health, and behaviour. This definitive and prestigious reference work presents easily accessible information on domestication, including wild ancestors and related species, genetics, and breeding; livestock produce and markets; as well as breed conservation and the cultural and social aspects of livestock farming. Written by renowned livestock authorities, these volumes draw on the authors' lifelong interest and involvement in livestock breeds of the world, presenting a unique, comprehensive and fully cross-referenced guide to cattle, buffalo, horses, pigs, sheep, asses, goats, camelids, yak, and other domesticants.

The Perfect Match Chris Walkowicz, 2008-05-05. This book is a must for anyone considering a canine addition to the family. Nearly 150 breeds are presented with a full photo for each and a complete checklist including personality and physical characteristics as well as both positive and negative attributes. Never before has there been such depth of truth and authority collected in one comprehensive volume.

Jeannie's Gems Jeannie Bishop Bergland, 2003-07-21. Gems are something most people consider to be precious. In each poem, there can be found certain gems that I consider very precious and I want to share a few of them with many others. I hope as you read these poems, you will discover the hidden treasures in each one. And if you hadn't already discovered the most precious Treasure, it's God's Son. I hope you will do so before the day is done.

Climate change and primary industries, 2014-08-14. Climate change is expected to have a profound impact on natural resources and thus on the primary industries: agriculture, forestry, and fisheries in the Nordic countries. Climate change induces risks but also creates possibilities for new production systems on land and in the ocean. Climatic changes also represent great challenges for policy making and management regimes. The current knowledge base on natural resources in the Nordic region needs to be expanded to fully address the impacts of climate change. In particular, it is important to address the need for improved policies and new policy instruments. The research programme Climate Change Impacts: Adaptation and Mitigation in Nordic Primary Industries is a coordinated set of thematic research networks with the objective to create a Nordic knowledge base on climate change interactions with primary industries in the Nordic region.

South Australian Ornithologist, 1927. The Murrelet Frank Stevens Hall, 1924.

You Aren't What You Eat Steven Poole, 2012-10-18. We have become obsessed by

food where it comes from where to buy it how to cook it and most absurdly of all how to eat it Our televisions and newspapers are filled with celebrity chefs latter day priests whose authority and ambition range from the small scale what we should have for supper to large scale public schemes designed to improve our communal eating habits When did the basic human imperative to feed ourselves mutate into such a multitude of anxieties about provenance ethics health lifestyle and class status And since when did the likes of Jamie Oliver and Nigella Lawson gain the power to transform our kitchens and dining tables into places where we expect to be spiritually sustained In this subtle and erudite polemic Steven Poole argues that we re trying to fill more than just our bellies when we pick up our knives and forks and that we might be a lot happier if we realised that sometimes we should throw away the colour supplements and open a tin of beans
