Applying Cognitive Behavioural Therapeutic Approaches in Sport Martin Turner, Marc Jones, Andrew Wood, 2023-04-21 Cognitive behavioural therapies (CBTs) are foundational to sport psychology. The majority of the psychological techniques employed by sport psychologists in their work with athletes stem from CBTs. However, there is a knowledge gap concerning what CBTs are and how the different types of CBTs can be applied in sport. This knowledge gap is important to fill because CBTs are highly effective and are easily integrated into the sport setting and thus practitioners should be aware of if not trained in such approaches. **Applying Cognitive Behavioural Therapeutic Approaches in Sport** is the first dedicated volume to bring together the dominant cognitive behavioural approaches to sport psychology. This book includes state-of-the-art evidence regarding the theory and practice of CBTs in sport produced by academic and applied leaders in the area. Chapters include key historical and theoretical information about the CBTs and intricate details as to how a range of CBTs are applied in the real world of sport. Also in each chapter, authors will cover historical and contemporary literature and offer a hypothetical applied case study that details how the approach is applied in sport. Practitioners, sport psychologists, psychotherapists, trainees and students, undergraduate and post graduate, will for the first time receive an in-depth and sport-specific resource that includes a range of CBTs, making this book one of a kind.

Working with the Bereaved Simon Shimshon Rubin, Ruth Malkinson, Eliezer Witztum, 2012 **Working With the Bereaved** summarizes the major themes in bereavement research and clinical work and uses the author's own cutting-edge research to show mental health practitioners how to integrate these themes into their practice. It provides clinicians with a framework for exploring their own emotional and intellectual assumptions about loss and bereavement and it goes on to summarize state-of-the-art thinking in the field. The heart of the book focuses on the theoretical and clinical implications of the empirically validated Two Track Model of Bereavement as well as a variety of therapeutic techniques designed to help the bereaved both reapproach life and manage their continuing bonds with the deceased. The later chapters examine methods for integrating systems and family perspectives in therapy for attending to the implications of culture and religion and for meeting crises and emergencies in bereavement care. The concluding chapter addresses self-care, well-being and resilience, offering practical

guidelines for both the bereaved and those who treat them
