Anatomy of Spirituality: Portrait of the Soul Chander Behl,2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain s biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul

Qualitative Research and Social Intervention Vera Lucia Trevisan de Souza,Guilherme Siqueira Arinelli,2021-07-01 This book presents procedures and research techniques that are based on critical perspectives of Psychology and Education The content is characterized by innovations on the relationship between the researcher and the investigated context and it problematizes different perspectives and approaches to the psychological phenomenon proposing new understandings of the subject the world the social and the field of investigation itself as a permanent dialectical movement The book reports to Marxist based perspectives especially to Vygotsky s ideas and concepts Therefore it assumes the comprehension that in order to understand the phenomenon in its historical dimension it is necessary to put it into motion seeking to access the genesis of the manifestations evidenced at the moment of the investigation That is the

historicity that characterizes the process of constitution of the human psyche can only be apprehended in its movement thus what matters is the process and not the product of its development Nevertheless apprehending phenomena in movement is a challenge for researchers interested in human processes within the scope of relationships or practices of professionals and or subjects of various scenarios which leads to the need to problematize the different moments of research and their dimension in the theoretical and practical fields Which methodological techniques or procedures allow the apprehension of the meaning movement produced by the subjects in the investigated scenarios To what extent does dialectical materialism derived from Marxism support the apprehension and analysis of research information of this nature What other theoretical methodological perspectives related to Cultural Historical Psychology offer subsidies to these investigations The theoretical perspectives based on the Social and Cultural analysis focus on the understandings of collective contexts precisely because of the subject view constituted in the inter subjective relations that it undertakes which adds even more complexity to the investigative processes From this perspective both the subject and other participants transform themselves during the investigation such transformation needs to be permanently reflected and included in the research objectives and purposes in order to follow the movement of the meanings in the expressed phenomenon
