Ready for What? M. Elizabeth Graue, 1993-01-01 This book looks at readiness from a different perspective arguing that we must move away from the readiness as child characteristic so prevalent in education and the popular press Instead readiness is explained as an idea constructed by parents teachers and children as they interact in their neighborhoods and communities Graue describes three communities in the same school district a middle class suburban town of professionals a rural working class community and a group of Hispanic working class families making their way through their children s kindergarten experiences In each setting the local meaning of readiness is the underlying theme in the actions taken by parents and their attitudes about their children s first public school experience Understanding Research in Early Childhood Education Jennifer J. Mueller, Nancy File, Andrew J. Stremmel, Iheoma U. Iruka, Kristin L. Whyte, 2024-02-26 This second edition invites readers to be informed consumers of both quantitative and qualitative methods in early childhood research It offers side by side coverage and comparison about the assumptions questions purposes and methods for each presenting unique perspectives for understanding young children and early care and education programs The new edition includes updated examples and references as well as a new chapter on equity issues in research By using this book students will be able to read evaluate and use empirical literature more knowledgeably These skills are becoming more important as early childhood educators are increasingly expected to use evidence based research in practice and to participate in collecting and analyzing data to inform their teaching Resources in Education , 1993 **Reimagining Diversity, Equity, and Justice in Early Childhood** Haeny Yoon, A.
