## **Redefining The State:**

School, Society, and State Tracy L. Steffes, 2011-04-01 Democracy has to be born anew every generation and education is its midwife wrote John Dewey in his classic work *The School and Society* In *School Society and State* Tracy Steffes places that idea at the center of her exploration of the connections between public school reform in the early twentieth century and American political development from 1890 to 1940 American public schooling Steffes shows was not merely another reform project of the Progressive Era but a central one She addresses why Americans invested in public education and explains how an array of reformers subtly transformed schooling into a tool of social governance to address the consequences of industrialization and urbanization By extending the reach of schools broadening their mandate and expanding their authority over the well being of children the state assumed a defining role in the education and in the lives of American families In *School Society and State* Steffes returns the state to the study of the history of education and brings the schools back into our discussion of state power during a pivotal moment in American political development

**Bodies of Violence** Lauren B. Wilcox, 2015 According to conventional international relations theory states or groups make war and in doing so kill and injure people that other states are charged with protecting While it sees the perpetrators of violence as rational actors it views those who are either protected or killed by this violence as mere bodies ahistorical humans who breathe suffer and die but have no particular political agency In its rationalist variants IR theory only sees bodies as inert objects Constructivist theory argues that subjects are formed through social relations but leaves the bodies of subjects outside of politics as brute facts According to Wilcox such limited thinking about bodies and violence is not just wrong but also limits the capacity of IR to theorize the meaning of political violence By contrast to rationalist and constructivist theory feminist theory sees subjectivity and the body as inextricably linked This book argues that IR needs to rethink its approach to bodies as having particular political meaning in their own right For example bodies both direct violent acts violence in drone warfare for example and are constituted by practices that manage violence for example scrutiny of persons as bodies through biometric technologies and body scanners The book also argues that violence is more than a strategic action of rational actors as in rationalist theories or a destructive violation of community laws and norms as in liberal and constructivist theories Because IR theorizes bodies as outside of politics it cannot see how violence can be understood as a creative force for shaping the limits of how we understand ourselves as political subjects as well as forming the boundaries of our political communities By engaging with feminist theories of embodiment and violence *Bodies of Violence* provides a more nuanced treatment of the nexus of bodies subjects and violence than currently exists in the field of international relations

**Foreign Aid and the Future of Africa** Kenneth Kalu, 2018-05-22 During the past five decades sub Saharan Africa has received more foreign aid than has any other region of the world and yet poverty remains endemic throughout the region As Kenneth Kalu argues this does not mean that foreign aid has failed rather it means that foreign aid in its current form does not have the capacity to

procure development or eradicate poverty This is because since colonialism the average African state has remained an instrument of exploitation and economic and political institutions continue to block a majority of citizens from meaningful participation in the economy Drawing upon case studies of Angola Cameroon Chad Equatorial Guinea Democratic Republic of the Congo and Nigeria this book makes the case for redesigning development assistance in order to strike at the root of poverty and transform the African state and its institutions into agents of development

**Making Sense of the Arab State** Steven Heydemann, Marc Lynch, 2024-07-30 No region in the world has been more hostile to democracy more dominated by military and security institutions or weaker on economic development and inclusive governance than the Middle East Why have Arab states been so oppressively strong in some areas but so devastatingly weak in others How do those patterns affect politics economics and society across the region The state stands at the center of the analysis of politics in the Middle East but has rarely been the primary focus of systematic theoretical analysis Making Sense of the Arab State brings together top scholars from diverse theoretical orientations to address some of the most critically important questions facing the region today The authors grapple with enduring questions such as the uneven development of state capacity the failures of developmentalism and governance the centrality of regime security and survival concerns the excesses of surveillance and control and the increasing personalization of power Making Sense of the Arab State will be a must read for scholars of the Middle East and of comparative politics more broadly

**Remaking the Chinese State** Chao Chien-min, Bruce Dickson, 2003-09-02 After more than twenty years of economic and political reform China is a vastly different country to that left by Mao Almost all the characteristic policies and practices of the Maoist era have been abandoned with the goals of revolution in foreign and domestic policy being replaced by an emphasis on economic modernization accompanied by radical social transformation and an increasingly significant international role Yet despite these dramatic changes other fundamental features of China's policy remain unchanged This book explores the strategies of reform in China and their implications for its domestic and foreign policies It challenges the misconceptions that no political reforms are taking place and that China is eagerly embracing capitalism It also challenges the view that China does not abide by international norms and practices on military and security matters Its contributors all highly respected scholars avoid simple generalisations about the nature of China's politics or future path instead offering comparisons and contrasts between policy areas and regions to create a more complete picture of this complex country

**Migrant Children in State/Quasi-state Schools in Urban China** Hui Yu, 2021-11-18

Highlighting the changing landscape of Chinese urban state schools under the pressure of recruiting a tremendous number of migrant children this book examines the quality of state educational provisions from demographic institutional familial and cultural angles Rooted in rich qualitative data from five Chinese metropolitan cities it identifies the demographic changes in many state schools of becoming migrant majority and the institutional reformation of interim quasi state schools under a low cost and inferior schooling approach This book also digs into the black box of cultural reproduction in school and family processes revealing both a gloomy side of many migrant children's academic underachievement as a result of troubled home school relations and a bright side that social inclusion of migrant children in state school promotes their adaptation to urban life The author concludes that migrant children's experiences in state and quasi state schools turn them into a generation of new urban working class The monograph will be of interest to scholars students practitioners and policymakers who want to better understand educational equality for migrants and other marginalised groups

**The State and Security in Mexico**

Brian J. Bow, Arturo Santa Cruz, 2013 At the turn of the millennium Mexico seemed to have finally found its path to political and economic modernization a state which had been deeply embedded in society was being pulled out with new political leaders allowing market forces to play a greater role in guiding the nation's economic development and allowing old patron client networks to crumble At the same time many hoped that political and legal reforms would increase the state's capacity to provide prosperity security and equity for its citizens In the midst of this historic transformation however Mexico was

confronted with an urgent new policy challenge Internationally recognized experts from the academic and think tank communities in the United States Mexico and Canada consider the origins of the current crisis in Mexico and the nature and effectiveness of the Calderón government's response Simply not another book on North American regional security this volume uses Joel Migdal's concept of the state in society to provide a refreshingly clear and accessible exploration of political change in the developing world The engagement with the US and Canada gives the reader a chance to observe the dynamics of persuasion across the developmental divide Four key questions structure the study What does the ongoing security crisis in Mexico tell us about the changing role of the state in society there What does the changing role of the state tell us about the nature and intractability of the crisis How has the transition to democracy affected the links between the state and organized crime in Mexico and the state's capacity to contain non state challengers What kinds of political and legal reforms are called for and what effects can we expect them to have on the extent and intensity of violence in Mexico No other study comprehensively uncovers new conceptual and theoretical insights in each of these areas whilst offering some practical guidance for policy makers and publics seeking to understand these urgent and complex challenges **Beyond**
