Redesigning Schools Joseph P. McDonald, 1996-11-22 For five years McDonald charted the progress of ten schools in the Coalition of Essential Schools as they immersed themselves in the hard work of school reform He also visited many other schools both elementary and secondary in an attempt to understand serious school reform and its prospects He concludes that school reform requires redesign in three critical areas The first is a shift in the ordinary and often tacit beliefs of the people who work in schools the communities that support them and even the children who attend them The second area which McDonald dubs the wiring arena involves internal communication and power arrangements The third area called tuning involves connecting the school to the needs interests and values of the communities it serves

Redesigning Teacher Education Alan R. Tom, 1997-01-01 Explores the shortcomings of teacher education and proposes design principles for rethinking teacher preparation Establishes a reform agenda for teacher education faculties Alan Tom is among the best at relating important issues in teacher education and a critical reading of the literature with his own professional experience This book is ambitious It lives up to the claim of examining political and institutional problems along with conceptual and intellectual ones This is something few teacher educators attempt and is a critical area to open up for sustained analysis Drawing upon events from his career as a teacher educator Alan R Tom candidly analyzes the predominant criticisms of teacher education and rejects the common tendency to infer the teacher education curriculum from such ideas as metaphors for teaching or knowledge He proposes eleven design principles to serve as a reform agenda including creating programs capable of self renewal having faculty model the desired image and skills of teaching and rethinking the sequence of practice and theory Each principle identifies a differing dimension for the conceptual and structural redesign of teacher preparation Four specific change strategies are evaluated as well task force top down piloting and family style The low status of teacher educators and the excessive regulation of teacher education are also examined as is the failure to give adequate attention to the administrative organization for teacher education

Rethinking US Education Policy Daniel Araya, 2016-02-11 Drawing on discussions of the Creative Economy the Network Economy and the Green Economy *Rethinking US Education Policy* critiques educational policies authored by the Obama administration and considers the need for a new educational policy framework that is better adapted to an era of accelerating innovation

Handbook of the Sociology of Education Maureen T. Hallinan, 2006-11-24 The aim of the *Handbook of Sociology of Education* is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the *Handbook* offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the *Handbook* is built on three fundamental tenets of sociology

First the authors adopt the perspective that schools are a central institution in society. An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions. The study of how the context of schooling influences education processes is critical to an understanding of school outcomes. Rather than being determined solely by ascribed and achieved characteristics, an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded. Communities, families, schools, and social groups are critical elements in the educative process. By viewing the school as a societal institution and highlighting the interaction between context and individual behavior, the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society. The second sociological insight that guides the research in the Handbook is that the school is a social system.

Brookings Papers on Education Policy: 2003 Diane Ravitch, 2010-12-01. In 1983 the seminal report issued by the National Commission on Excellence in Education, *A Nation at Risk*, charged that most American high schoolers were following a general course of instruction choosing neither the college preparatory track nor the vocational option. This pattern, the report complained, had fostered low expectations and a curricular hodgepodge of classes that failed to prepare students for college or work. The commission called on states to implement academic requirements for all students regardless of background, including four years of English and three years each of science, mathematics, and social studies. Students should not be sorted by their presumed future destinations; the commission reasoned, but should be offered an equal opportunity to get a high quality education to fit them either for postsecondary education or the modern workplace. Two decades after the commission called on states to reform the high school environment and raise graduation requirements, the Brown Center on Education Policy at the Brookings Institution convened a group of prominent scholars to explore the current state of America's high schools, focusing on new research about reforming these institutions that are so important in the lives of the nation's adolescents. The questions considered reflected the diversity of the participants and covered a variety of areas: historical, international, sociological, and practical. Data gathered by the U.S. Department of Education show students today are taking many more advanced courses in mathematics and the sciences while at the same time test scores do not reflect the increases in enrollments in academic courses. In addition, large score gaps remain among students from different social groups. Reform of the high schools must take into account the elementary and middle schools that prepare students and the postsecondary institutions to which students aspire. Adolescent culture and students' views about school and academic work play important roles in student achievement, as do the family and contemporary society in shaping of adolescent behavior. No matter their background, all participants agreed that the key to a successful high school rests with the extent to which it recognizes and strengthens its commitment to the intellectual growth of its students.

A Profile of the American High School Sophomore in 2002, 2005. *Encyclopedia of Educational Reform and Dissent* Thomas C. Hunt, 2010-01-20. The history of American education is replete with educational reform and to a lesser extent educational

dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily Hearing on the Proper Federal Role in Education Policy United States. Powers,2009-06-08 This book begins with the claims of policymakers and explores charter schools at each stage of the policymaking process from

legislation to implementation Powers carefully and thoroughly examines how features of schools policy contexts shape the ways that charter school reform unfolds at schools providing a nuanced portrait of the schools participating in this much discussed and little understood reform movement While policymakers are often prone to making sweeping claims about the efficacy of charter schools in practice charter school reform is much more complex By drawing on an extensive and compelling range of data Powers assesses the validity of policymakers claims

School Choice Tradeoffs R. Kenneth Godwin, Frank R. Kemerer, 2010-01-01 Educational policy in a democracy goes beyond teaching literacy and numeracy It also supports teaching moral reasoning political tolerance respect for diversity and citizenship Education policy should encourage liberty and equality of opportunity hold educational institutions accountable and be efficient School Choice Tradeoffs examines the tradeoffs among these goals when government affords parents the means to select the schools their children attend Godwin and Kemerer compare current policy that uses family residence to assign students to schools with alternative policies that range from expanding public choice options to school vouchers They identify the benefits and costs of each policy approach through a review of past empirical literature the presentation of new empirical work and legal and philosophic analysis The authors offer a balanced perspective that goes beyond rhetoric and ideology to offer policymakers and the public insight into the complex tradeoffs that are inherent in the design and implementation of school choice policies While all policies create winners and losers the key questions concern who these individuals are and how much they gain or lose By placing school choice within a broader context this book will stimulate reflective thought in all readers
