Redesigning Collegiate Leadership:

Redesigning Collegiate Leadership Estela Mara Bensimon, Anna Neumann, 1994-08-01 Most organizational theorists use the athletic team as a metaphor for the effective work group specific players motivated to give their best performance in pursuit of a common goal This book offers a different model focusing instead on the complex ways that members of a leadership team interact wield power use language and create meaning The authors describe the team as a culture and argue that effective team leadership depends on expecting understanding and appreciating the differences among individuals

Redesigning Collegiate Leadership Estela Mara Bensimon, Anna Neumann, 1993 Reading this work becomes a personal as well as intellectual journey of reflecting on who we are and what we might wish to become as collaborative leaders and team builders An important journey for any administrator in American higher education today NASPA Journal

A Blueprint for Equity-Driven Community College Leadership Pamela L. Eddy, Kim E. VanDerLinden, 2024-08-14 Expert advice and effective strategies for community college leaders who endeavor to embed equity and social justice in institutional policies practices and structures

Redesigning America's Community Colleges Thomas R. Bailey, Shanna Smith Jaggars, Davis Jenkins, 2015-04-09 In the United States 1 200 community colleges enroll over ten million students each year nearly half of the nation's undergraduates Yet fewer than 40 percent of entrants complete an undergraduate degree within six years This fact has put pressure on community colleges to improve academic outcomes for their students Redesigning America's Community Colleges is a concise evidence based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions It makes a compelling case that two year colleges can substantially increase their rates of student success if they are willing to rethink the ways in which they organize programs of study support services and instruction Community colleges were originally designed to expand college enrollments at low cost not to maximize completion of high quality programs of study The result was a cafeteria style model in which students pick courses from a bewildering array of choices with little guidance The authors urge administrators and faculty to reject this traditional model in favor of guided pathways clearer more educationally coherent programs of study that simplify students choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost Distilling a wealth of data amassed from the Community College Research Center Teachers College Columbia University Redesigning America's Community Colleges offers a fundamental redesign of the way two year colleges operate stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals

Making the Case for Leadership Jon Derek Croteau, Zachary A. Smith, 2011-11-30 The advancement industry has experienced tremendous growth in breadth and depth over the last few decades Driving this growth is the chief advancement officer however as a relatively new position on most college and university campuses little is formally known about the role and the people who fill it In Making the Case for

Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d'être of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others

Curriculum Lisa R. Lattuca,Joan S. Stark,2011-01-11 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process

guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University

Connecting Learning Across the Institution Pamela L. Eddy, 2014-03-25 Most research on learning tends to occur in silos based on stakeholder perspective This volume seeks to break down these silos and draw together scholars who research learning from different perspectives to highlight commonalities in learning for students faculty and institutions When we understand how learning is experienced across the institution we can develop strategies that help support enhance and reinforce learning for all Exploring what it means to bridge learning across the institution this volume provides a roadmap to improve learning for all Both scholarly and practical it advances the knowledge about the ways we investigate and study learning across and for various groups of learners It also Collects thinking about learning in its various formats in one location Provides a platform for synthesis Outlines key questions for thinking more deeply about learning on campus Instead of thinking of learning as discrete depending on the stakeholder group this volume highlights the commonalities across all types of learners
