successes in Sub Saharan African countries and addresses how these countries have overcome major developmental challenges **Healthy Partnerships**, 2011 Since the private health sector is an important and often dominant provider of health services in Sub Saharan Africa it is the job of governments as the stewards of the health system to engage with it Increasing the contributions that the existing private health sector is making to public health is an important but often neglected element of meeting the daunting health related challenges facing African nations This Report presents newly collected data on how and how effectively each country in the Africa region is engaging the respective private health sectors and how the engagement compares across the region While the approach taken by governments varies greatly between countries there is much room for improvement in the Africa region overall to engage more effectively and room for exchange of ideas and good practices on how to do so Improved solutions on the policy regulatory side should be supported by effective organization of the private sector itself and by adjustments in donor programs that take the dynamics of the private health sector better into account
