Market: Practices and Policies Tsun Se Cheong,Xunpeng (Roc) Shi,Yongping Sun,Jian Yu,Xin Yao,2023-11-03 China's national carbon market the world's largest emissions trading scheme ETS kicked off its first online trade recently This can be called a milestone for the country towards the nation's goals of having CO2 emissions peak before 2030 and achieving carbon neutrality by 2060 China's national ETS initially covers the power sector before being expanded to a much broader set of energy intensive industries On one hand the electricity sector the largest carbon emitting industry is responsible for about 40% of China's emissions and it has great significance to response to global climate change On the other hand the effectiveness of China's ETS will rest on how well it is coordinated with power market regulations and policies In this regard the deepening of reform as well as the advanced technology and its applications in the electricity market will add new challenges and opportunities to electricity trade which in turn influences national ETS Therefore this brings urgency to accurately capture the dynamic interactions between national ETS and electricity market to transform carbon trading into a practical and effective way to decarbonize the power sector      Electrical Record and Buyer's Reference ,1914      **Fuel**

**Prices** Great Britain: Parliament: House of Commons: Trade and Industry Committee,2005-06 The Committee's report examines the recent price increases in gas supply and the resulting rises in electricity prices as about 40 per cent of electricity generation in England and Wales is gas fired focusing on the effects of the price increases on all types of energy customers The report seeks to assess whether the rises are a temporary response to short term supply problems or the start of a long term increase in UK energy prices and to consider possible responses by Ofgem the regulator of the gas and electricity markets and the DTI to the problem Topics discussed include Ofgem's report into wholesale gas prices and reactions to it the decline in production from the UK Continental Shelf UKCS gas storage and supply issues the behaviour and transparency of the gas market and regulation issues oil indexation in gas contracts competition within European markets vertical integration the electricity market new infrastructure projects and the future of gas prices
