*Tears of the Cheetah* Stephen J. O'Brien,2015-10-27 The history of life on Earth is dominated by extinction events so numerous that over 99.9% of the species ever to have existed are gone forever If animals could talk we would ask them to recall their own ancestries in particular the secrets as to how they avoided almost inevitable annihilation in the face of daily assaults by predators climactic cataclysms deadly infections and innate diseases In *Tears of the Cheetah* medical geneticist and conservationist Stephen J O'Brien narrates fast moving science adventure stories that explore the mysteries of survival among the earth s most endangered and beloved wildlife Here we uncover the secret histories of exotic species such as Indonesian orangutans humpback whales and the imperiled cheetah the world s fastest animal which nonetheless cannot escape its own genetic weaknesses Among these genetic detective stories we also discover how the Serengeti lions have lived with FIV the feline version of HIV where giant pandas really come from how bold genetic action pulled the Florida panther from the edge of extinction how the survivors of the medieval Black Death passed on a genetic gift to their descendents and how mapping the genome of the domestic cat solved a murder case in Canada With each riveting account of animal resilience and adaptation a remarkable parallel in human medicine is drawn adding yet another rationale for species conservation mining their genomes for cures to our own fatal diseases *Tears of the Cheetah* offers a fascinating glimpse of the insight gained when geneticists venture into the wild

**The Case Against the Sexual Revolution** Louise Perry,2022-05-16 Ditching the stuffy hang ups and benighted sexual traditionalism of the past is an unambiguously positive thing The sexual revolution has liberated us to enjoy a heady mixture of erotic freedom and personal autonomy Right Wrong argues Louise Perry in her provocative new book Although it would be neither possible nor desirable to turn the clock

back to a world of pre 60s sexual mores she argues that the amoral libertinism and callous disenchantment of liberal feminism and our contemporary hypersexualised culture represent more loss than gain The main winners from a world of rough sex hook up culture and ubiquitous porn where anything goes and only consent matters are a tiny minority of high status men not the women forced to accommodate the excesses of male lust While dispensing sage advice to the generations paying the price for these excesses she makes a passionate case for a new sexual culture built around dignity virtue and restraint This counter cultural polemic from one of the most exciting young voices in contemporary feminism should be read by all men and women uneasy about the mindless orthodoxies of our ultra liberal era Also available as an audiobook narrated by the author

**Ever Since Adam and Eve** Malcolm Potts,Roger Short,1999-02-14 A lively and entertaining account of the broad panorama of human sexual behaviour which reveals our actions to be an inextricable mixture of nature and nurture a combination of innate actions evolved over the millenia overlain by more recent cultural constraints imposed by civilization

New Perspectives on Adam Smith's The Theory of Moral Sentiments Geoff Cockfield,Ann Firth,John Laurent,2007-11-27 New Perspectives on Adam Smith s The Theory of Moral Sentiments is a comprehensive study of Smith s ideas It brings together themes and methodologies from a variety of fields including politics sociology intellectual history history of science and evolutionary psychology

**The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology** Lisa L. M. Welling,Todd K. Shackelford,2019-03-19 The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology offers a comprehensive and compelling review of research in behavioral endocrinology from an evolutionary perspective on human psychology Chapters written by renowned experts on human behavior explore a number of subtopics within one of three themes 1 development and survival 2 reproductive behavior and 3 social and affective behavior Such topics include hormonal influences on life history strategy mate choice aggression human hierarchical structure and mood disorders This Handbook is situated at the intersection of evolutionary psychology and behavioral endocrinology Its interdisciplinary approach makes it an important resource for a broad spectrum of researchers graduate students and advanced undergraduates who are interested in studying the motivations and mechanisms that affect behavior

*Facing the Wild* Chilla Bulbeck,2012-06-25 What do wild animals mean to humans Will they survive both rampant habitat loss and extinction caused by human encroachment and as ecotourists our enthusiasm for them With ecotourism now the fastest growing segment of tourism and encounters with wild animals be it swimming with dolphins going on safari or bird watching ever more popular these are critical questions Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry conservation efforts and society at large Facing the Wild is the first serious empirical examination of why people seek out animals in their natural environment what the desire for this experience tells us about the meanings of animals nature authenticity and wilderness in contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks

would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners and ecotourists alike The Metaphysics of Apes Raymond Corbey,2005-03-14 This book traces the discovery and interpretation of the human like great apes and shows how the taboo ridden animal human boundary was challenged *Life Stories* Maureen O'Connor,2011-08-23 Memoirs autobiographies and diaries represent the most personal and most intimate of genres as well as one of the most abundant and popular Gain new understanding and better serve your readers with this detailed genre guide to nearly 700 titles that also includes notes on more than 2 800 read alike and other related titles The popularity of this body of literature has grown in recent years and it has also diversified in terms of the types of stories being told and persons telling them In the past readers advisors have depended on access by names or Dewey classifications and subjects to help readers find autobiographies they will enjoy This guide offers an alternative organizing the literature according to popular genres subgenres and themes that reflect common reading interests Describing titles that range from travel and adventure classics and celebrity autobiographies to foodie memoirs and environmental reads *Life Stories A Guide to Reading Interests in Memoirs Autobiographies and Diaries* presents a unique overview of the genre that specifically addresses the needs of readers advisors and others who work with readers in finding books **War Against Ourselves** Jacklyn Cock,2007-10 For many people nature means wilderness and wild animals It is experienced indirectly through magazines and television programs or through visiting the highly managed environments of national parks Nature however is not external separate from the world of people we live in nature and interact with it daily In this book Jacklyn Cock describes how these intricate and complex interconnections seen and unseen are often ignored Each of the ten chapters examines an aspect of our relationship with nature *The War Against Ourselves* compels us to reexamine our relationship with nature to change our practices and dissolve present binary divisions such as people vs animals economic growth vs environmental protection nature vs culture It demonstrates the need for an inclusive politics which brings together peace social and environmental justice activists who believe that another world is both possible and necessary Book cover **Rough and Tumble** Travis Pickering,2013-04-10 Travis Rayne Pickering argues that the advent of ambush hunting approximately two million years ago marked a milestone in human evolution one that established the social dynamic that allowed our ancestors to expand their range and diet He challenges the traditional link between aggression and human predation however claiming that while aggressive attack is a perfectly efficient way for our chimpanzee cousins to kill prey it was a hopeless tactic for early human hunters who in comparison to their large potentially dangerous prey were small weak and slow footed Technology that evolved from wooden spears to stone tipped spears and ultimately to the bow and arrow increased the distance between predator and prey and facilitated an emotional detachment that allowed hunters to stalk and kill large game Based on studies

of humans and of other primates as well as on fossil and archaeological evidence Rough and Tumble offers a new perspective on human evolution by decoupling ideas of aggression and predation to build a more realistic understanding of what it is to be human

**Delia Akeley and the Monkey** Iain McCalman,2022-02-01 By telling this story Iain McCalman illuminates much about human animal relations and the tyranny of gender inequality He reinstates a twentieth century story of a dedicated amateur primatologist and her adopted Vervet monkey On an East African hunting expedition in 1909 Delia Akeley a forty year old American woman captured a baby female monkey Delia s loneliness in an isolating patriarchal world and her long frustrated desire to adopt a child had motivated her to nurture the animal She named the monkey JT Jr and decided to study her interactions with humans The unique relationship between Delia and JT unlocked Delia s latent talents of research and observation anticipating both Jane Goodall s chimpanzee writings and Margaret Mead s Samoan ethnographies However Delia s love for JT clashed with her husband Carl s obsession to create a temple of African wildlife dioramas at the Museum of Natural History in New York Nursing Carl s broken body and realising their diverging interests pushed Delia into a breakdown in Uganda which led to a savage divorce in Manhattan and the heartbreaking caging of JT in a Washington zoo Carl s death triggered a long battle between Delia and Carl s widow who succeeded in obliterating most of Delia s achievements In *Delia Akeley and the Monkey* Iain McCalman uses official records and personal documents to build a story of passionate love and hate among women men animals and museums that predates our times but speaks to our present It illuminates much about human animal relations and the tyranny of gender inequality through reinstating an obscured story of a dedicated amateur primatologist

*Encyclopedia of Anthropology* H. James Birx,2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories

Wattana Chris Herzfeld,2016-05-02 She likes tea sews draws on papers and is a self taught master of tying and untying knots But she is not a crafty woman of the DIY set she is Wattana an orangutan who lives in the Jardin des Plantes Zoo in Paris And it is in Paris where Chris Herzfeld first encounters and becomes impressed by Wattana and her exceptional abilities with knots In *Wattana An Orangutan in Paris* Herzfeld tells not only Wattana s fascinating story but also the story of orangutans and other primates including bonobos chimpanzees and gorillas in captivity Offering a uniquely intimate look at the daily lives of captive great apes Herzfeld uses Wattana s life to trace the history of orangutans from their first arrival in Europe in 1776 to the inhabitants of the Zoo of Paris and other zoos today She provides a close look at the habits technical know how and skills of Wattana who remarkably uses strings paper rolls rope and even pieces of wood to make things And she thoughtfully explores how apes individually and often with ingenuity come to terms with and adapt to their captive environments and caretakers Through these stories Wattana sympathetically reveals the extraordinary psychology and distinctive personalities of great apes as well as the interconnections between animal and human lives especially in zoos Scientists predict that orangutans will disappear from

the wild by 2030 and captive animals like Wattana may as a result provide our best chance to understand and appreciate their astonishing intelligence and abilities Wattana the accomplished maker of knots is the hero of this poignant book which will enthrall anyone curious about the lives of our primate cousins *21st Century Anthropology: A Reference Handbook* H. James Birx, 2010-06-10 Highlighting the most important topics issues questions and debates these two volumes offer full coverage of major subthemes and subfields within the discipline of anthropology *But What I Really Want to Do Is Direct* Ken Kwapis, 2024-05-01 The veteran film and TV director shares industry secrets and inspiring advice in this hilariously candid Hollywood memoir For over three decades director Ken Kwapis has charted an exceptional career ranging from seminal shows like *The Office* to beloved films like *He's Just Not That Into You* But becoming one of the most respected directors in Hollywood wasn't easy With each triumph came the occasional faceplant Now in this thoroughly entertaining memoir Ken shares his hard earned wisdom and inside knowledge tackling plenty of Hollywood myths along the way It's a rollercoaster ride fueled by brawls with the top brass clashes over budgets and the passion that makes it all worthwhile Combining inspiring instruction with behind the scenes hilarity *But What I Really Want to Do Is Direct* is a celebration of the director's craft and what it takes to succeed on your own terms in show business Ken Kwapis always brought out the best in the actors on *The Office* Every aspiring director should read this book I can think of several professional directors that should read it too Jenna Fischer In the years that I was fortunate to work with Ken on *Malcolm in the Middle* he had an uncanny ability to guide actors right to the heart of a scene and reveal its truths Bryan Cranston *Anthropocentrism* Rob Boddice, 2011-07-14 Anthropocentrism is a charge of human chauvinism and an acknowledgement of human ontological boundaries Anthropocentrism has provided order and structure to humans understanding of the world while unavoidably expressing the limits of that understanding This collection explores the assumptions behind the label anthropocentrism critically enquiring into the meaning of human It addresses the epistemological and ontological problems of charges of anthropocentrism questioning whether all human views are inherently anthropocentric In addition it examines the potential scope for objective empathetic relational or other views that trump anthropocentrism With a principal focus on ethical questions concerning animals the environment and the social the essays ultimately cohere around the question of the non human be it animal ecosystem god or machine *The Mentalities of Gorillas and Orangutans* Sue Taylor Parker, Robert W. Mitchell, H. Lyn Miles, 1999-08-26 Research on the mental abilities of chimpanzees and bonobos has been widely celebrated and used in reconstructions of human evolution In contrast less attention has been paid to the abilities of gorillas and orangutans This 1999 volume aims to help complete the picture of hominoid cognition by bringing together the work on gorillas and orangutans and setting it in comparative perspective The introductory chapters set the evolutionary context for comparing cognition in gorillas and orangutans to that of chimpanzees bonobos and humans The remaining chapters focus primarily on the kinds and levels of intelligence displayed by orangutans and gorillas compared to other great apes including

performances in the classic domains of tool use and tool making imitation self awareness social communication and symbol use All those wanting more information on the mental abilities of these sometimes neglected but important primates will find this book a treasure trove
