Reflections Of A Ghost:

Spectral Analysis and Filter Theory in Applied Geophysics Burkhard Buttkus, 2012-12-06 This book is intended to be an introduction to the fundamentals and methods of spectral analysis and filter theory and their applications in geophysics. The principles and theoretical basis of the various methods are described, their efficiency and effectiveness evaluated, and instructions provided for their practical application. Besides the conventional methods, newer methods are discussed, such as the spectral analysis of random processes by fitting models to the observed data, maximum entropy spectral analysis, and maximum likelihood spectral analysis. The Wiener and Kalman filtering methods, homomorphic deconvolution, and adaptive methods for nonstationary processes. Multidimensional spectral analysis and filtering, as well as multichannel filters, are given extensive treatment. The book provides a survey of the state of the art of spectral analysis and filter theory. The importance and possibilities of spectral analysis and filter theory in geophysics for data acquisition, processing, and evaluation are illustrated with practical examples from various fields of applied geophysics. Although this book was planned primarily as a textbook for a course on the analysis of geophysical time series, it may also be of interest to scientists and engineers who process other digital data. It provides a comprehensive discussion of the theoretical fundamentals and a compilation of the extensive literature on the subject. I hope that I have succeeded in presenting the various principles and methods of time series analysis comprehensively and without error. Comments on errors or suggestions for improvements are welcome.

Seismic Reflection Processing S.K. Upadhyay, 2013-03-09 The author coherently presents the physical concepts, mathematical details, and methodology for optimizing results of reservoir modeling under conditions of isotropy and anisotropy. The most common form of anisotropy, the transverse isotropy, is dealt with in detail. Besides practical aspects in reservoir engineering, such as interval isotropic or anisotropic properties of layered media, identifying lithology, pore fluid types, and saturation, and determining crack fracture orientations and density, form the core of discussions. This book incorporates significant new developments in isotropic and anisotropic reflection processing while organizing them to improve the interpretation of seismic reflection data and optimizing the modeling of hydrocarbon reservoirs. The text contains exercises and problems, and solutions are provided for the exercises. This book is written primarily for graduate/postgraduate students and research workers in geophysics.

Seismic Interferometry Deyan Draganov, Johan O. A. Robertsson, 2008 Seismic Interferometry: History and Present Status. SEG Geophysics Reprint Series No. 26 shows that developments in seismic interferometry, the methodology of generating new seismic responses by cross-correlation, have taken an enormous flight since the beginning of this century. In 2006, the editors of this volume compiled a supplement to Geophysics dedicated to this

new branch of science The 22 papers of the well received supplement recognized by one award for best paper and two honorable mentions for best paper in Geophysics and more than 100 citations in the first 20 months form the basis for this reprint volume The editors have added 50 papers from SEG and other journals including Science Physical Review and Geophysical Research Letters The book contains an editors introduction with extensive references and chapters on seismic interferometry without equations highlights of the history of seismic interferometry from 1968 until 2003 and a more detailed overview of the rapid developments since 2004 Seismic Interferometry is an invaluable source for researchers and students interested in the theory and applications of interferometry in geophysical exploration seismic and EM seismology ultrasonics and underwater acoustics Geophysical Abstracts ,1971-07 **Practical Reflections for Every Day in the Year.
