*In Reforesting the Earth, Thomas K Rudel draws on historical research and case studies to examine the drivers of deforestation and proposes reforestation as an urgent natural solution to the climate crisis. The book advocates for socio-political corporatist processes and local participation to enable successful forest conservation and expansion, offering useful insights for environmentalists, policymakers and activists, writes Mohd Amin Khan.*

**Reforesting the Earth: The Human Drivers of Forest Conservation, Restoration, and Expansion, Thomas K Rudel, Columbia University Press, 2023.**

The global climate crisis poses a serious threat to the earth's ecosystem – its biodiversity, forests, soil fertility, water quality, and atmospheric carbon concentration. The impact on nature in turn has adverse effects on the socio-economic, cultural wellbeing and health of people across the globe, with a markedly unequal distribution of these negative effects on nations and communities. In his latest book, Thomas K Rudel emphasises the need for reforestation as a natural solution to the problems of climate change.

Reforesting the Earth aims to investigate the drivers of forest destruction and the factors influencing reforestation and the expansion of forests. It seeks to comprehend the role of human activity, including socio-political corporatist processes – policies based on the inclusive decision-making and governance of an organisation relating to other stakeholders like politicians, activists, donors, farmers, foresters, indigenous groups, and landowners – in reforestation by applying an integrated, case studies-based global data analysis. The ambition is to contribute to global climate crisis alleviation through natural solutions. The book unfolds over nine chapters, four of which discuss the historical background, concepts, theories, and analysis and the other five of which cover 19 cases studies of forest gain or loss worldwide.

The author begins with historical perspectives on the current political system: the actions and events that have precipitated the climate crisis. He then considers what would be the best approach to mitigate the adverse impacts of the crisis. He grounds his argument by elucidating the ways of living of traditional societies that evinced a respectful rather than an

## Reforestation The Earth:

Reforestation the Earth Thomas K. Rudel, 2023-09-05 Forests offer a natural solution to the climate crisis Conserving and expanding them not only removes carbon from the atmosphere but also protects and fosters biodiversity Yet the results of elite driven reforestation initiatives have been disappointing and in many world regions deforestation continues relentlessly Thomas K Rudel examines a wide range of conservation and reforestation efforts to shed new light on the social factors that lead to success He details effective coalition building strategies and organizational models that have protected restored and expanded forests around the world Rudel argues that successful reforestation projects bring together diverse groups of people with a stake in the land and a commitment to collective decision making They give voice to different economic and social interests including small farmers Indigenous peoples loggers ranchers government officials NGO personnel international donors and climate activists These varied coalition members each make commitments to promote forests Farmers limit the extent of lands under cultivation governments protect land tenure for smallholders and wealthy donors make payments for environmental protections Timely and accessible *Reforestation the Earth* offers a guide to scaling up local efforts to sequester carbon and makes a powerful case for a global reforestation movement *Reforestation the Earth* Sandra Postel, Lori Heise, 1988 This document deals with efforts aimed at reforesting large areas of degraded lands It includes sections on 1 tree cover trends 2 fuelwood challenges of the future 3 the need to supply industrial wood 4 stabilizing soil and water resources 5 forests and climate change and 6 mobilization for reforestation TW *Saving the Planet* Lester Russell Brown, Christopher Flavin, Sandra Postel, 1991 Describes an environmental research team's plan for a global economy Reforestation and Afforestation Karl Schneider, 1991 Reforestation, and Afforestation of Disturbed Lands, 1979-85 Karl Schneider, 1986 Proceedings of the International Workshop on Large-Scale Reforestation Jack K. creature including humankind is the free self expression of the trinitarian God In this context humanity is revealed as integrally related to all of creation a part of a single cosmic story While at one with creation in evolutionary history humanity is at the same time creation come to self awareness This train of insights leads to principles for an ecological praxis that affirms human value while insisting that humanity is a part of nature The whole reinforces commitment to sustainability and a Franciscan attitude of reverence toward God s creation Jesus the Wisdom of God in a disciplined yet clear way crafts an alternative to the anthropocentrism and alienation of much of Christian tradition by finding in the very roots of Christian mysticism and Christian identity a truly ecological theology for our time It is profound reading for students theologians and all Christians concerned with ecology and with the interface of science and theology *Future Survey Annual 1988-1989*

*Global Climate Change* James C. White, 2012-12-06

Bacteria in a test tube and humans on our planet follow the same population curve as time elapses We on this earth largely through control of disease are rapidly approaching maximum population and through energy demands are using up our resources and accumulating wastes We have come to realize the danger of a maturing system but have made

essential ly no impact in mitigating or preventing the problems we face While we have been able to change the world we live in most of our effects have been to degrade the planet We have nibbled away at the quality of the atmosphere for centuries and the ac cumulated damage has resulted in changing the world s climate at an ever increasing rate We now face the possibility of higher average temperatures over most of our planet changing patterns of rainfall rising sea levels aggravated storm systems and a myriad of social effects

*China* Robert B. Marks,2017-02-13 This deeply informed and clearly written text provides a comprehensive and comprehensible history of China from prehistory to the present Now updated to include recent political events and scientific research the book focuses on the interaction of humans and their environment Tracing changes in the physical and cultural world that is home to a fifth of humankind Robert B Marks illuminates the paradoxes inherent in China s environmental narrative demonstrating how historically sustainable practices can in fact be profoundly ecologically unsound The author also reevaluates China s traditional heroic storyline highlighting the marginalization of nature and contacts with other peoples that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment Unmatched in his ability to synthesize a complex subject clearly and cogently Marks has written an accessible yet nuanced history for any student interested in China past or present or indeed in the world s environmental future
